NEW
JUL

Consumer Profile

Designed to provide adaptive, holistic stability and high cushioning for distance training and easy runs. Ideally suited for runners who tend to heel strike, overstride, have a slow cadence and deviate medially on the platform.

Key Features

UPPER

- New engineered mesh upper.
- New eyelet system.
- Updated tongue and heel construction.

MIDSOLE

- Dual layer foaming: FF BLAST™ MAX top layer / FF BLAST™ PLUS bottom layer .
- PureGEL™ technology in the rearfoot for impact absorption.
- Updated stability features: FLUIDSUPPORT™ to help runners transition smoothly into propulsion.
- Improved heel bevel.

OUTSOLE

- New Hybrid ASICSGRIP™: A combination of AHARPLUS™ (laterally) and ASICSGRIP™ (forefoot and medially).

Men's Lateral View

Women's Medial View

Men's Outsole

GT-4000™ 4 RRP \$260

Consumer Profile

A maximum support trainer for those with flat or hypermobile feet that are looking for high levels of support.

This runner appreciates rearfoot and midfoot support.

Key Features

UPPER

- Engineered Mesh material with interior backing to reinforce high wear areas.
- Bunion window mesh panel on the medial forefoot of the upper focusing on minimising irritation and overlays.
- 6 eyelet holes for better lockdown.
- Asymmetrical tongue wing to provide premium in step feel.

MIDSOLE

- FF BLAST™ offers great comfort and cushioning.
- PureGEL™ technology in the rearfoot for impact absorption.
- LITETRUSST™ technology offers medial support functional for the consumer's needs .

OUTSOLE

- AHARPLUS™ outsole is placed in critical areas of the outsole for exceptional durability.

GLIDERIDE™ MAX 2 RRP \$260

Consumer Profile

A maximum cushioned trainer for long, recovery runs, providing energy savings and smooth transition. Ideal for those seeking forefoot stiffness.

Key Features

UPPER

- Engineered woven upper.
- Updated heel construction and pull tab vs previous model.

MIDSOLE

- FF BLAST™ MAX top layer / FF BLAST™ PLUS bottom layer foam.
- Hardened Press EVA plate between the two layers of foam allowing a smooth and efficient heel to toe transition.
- GUIDESOLE™ technology is a combination of increased toe spring, stiffer forefoot through a hardened EVA plate at the forefoot and Guidance line. This is designed to create a smoother transition from midfoot to forefoot, decreasing the load placed on the lower limbs.

OUTSOLE

- HYBRID ASICSGRIP™ outsole rubber.

KIDS

Support and Function

- GEL™ cushioning technology.
- Cm/EVA midsole (not cupped/hollow).
- Removable sockliner.

Durability

- Medial wrap-up outsole onto midsole.

- CUB MATCH™ sockliner: Available in all PS/TS models, this sockliner helps kids recognise the left shoe from the right shoe.

- Stitched rubber toe cap.

- ASICS SIZE CHECKER™: The toe print on the removable sockliner helps kids and parents identify when they are outgrowing their shoes. This feature is available in key GS/PS/TS styles.

- Solid Rubber outsole.

Specific Last

ASICS kid's shoes are designed to support the natural growth and development of children's feet. The kid's specific last creates a more spacious fit through the forefoot with better support in the midfoot and rearfoot, allowing for a smooth transition and relevance when you move from TS – PS – GS.

1. Special Grading – Proportional Fit

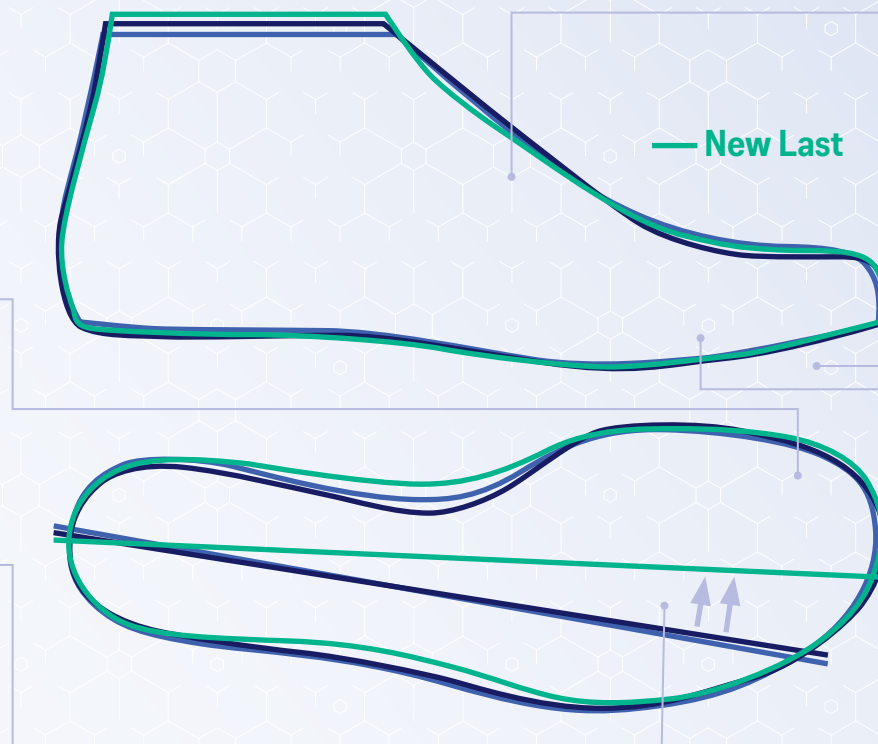

KINEMATIC COMFORT: Offer proportional fit depending on children's growth stage. (PS last proportionally offers more roomy fitting than GS last).

2. Oblique Shape With Roomy Toe Area

Children's toes are oblique – shaped unlike adults. Provide extra space in first toe for free toe movement, which enhances arch formation.

3. Centre Heel Angle

Turn heel centre inward, or more straight, just how children's feet are, to reduce pressure on the pinky toe.

4. Flatter Instep

Children's instep is flatter than adults. In this last, instep is designed flatter, which provides better fit after lacing up.

5. Moderate Toe Spring

If toe spring is too high, it is difficult to move toes freely. If toe spring is too low, children easily trip.

6. 2-5% Growth Margin in Ball Girth

Children grow quickly. Need buffer not to hamper their growth.
– Move toes freely, which enhances arch formation.

LETHAL BLEND™ FF RRP \$240

Consumer Profile

Any football code player who needs extra stability and comfort. The boot can be used as a training boot or on game day on synthetic or natural surfaces.

Key Features

UPPER

- Kangaroo leather vamp upper.
- Internal hot melt support system in the upper midfoot providing support in side to side movements.

MIDSOLE

- FLYTEFOAM™ midsole foam with rearfoot GEL™ for increased comfort by absorbing the impact.
- HG10mm™ technology.
- Removable ORTHOLITE™ sockliner.

OUTSOLE

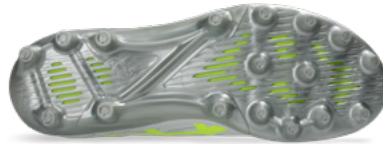

- Reversed N-shape PU Trusstic strategically positioned in the midfoot with more rigidity to improve stability during side to side movements.
- Dual density Solyte polymer outsole for improved flexibility and agility.
- Stud spacing resembles that of TIGREOR™ IT, providing an anti-clogging function.
- Lateral forefoot studs for superior grip in side movements.

GEL-RESOLUTION™ X RRP \$240

Consumer Profile

For the intermediate to elite tennis player who controls the game from the baseline and requires extra stability and support.

Key Features

UPPER

- High medial ankle cut.
- Shoe lace garage for those breaking their laces when sliding or where laces often overhang.
- Lateral double eyelet holes allows for more customised fit.
- DYNALACING™ provides added support by connecting the laces and the upper. This lacing system keeps the foot securely locked in place during the most intense movements.

MIDSOLE

- FLYTEFOAM™ on forefoot, and FF BLAST™ PLUS Foam on the rear foot provide cushioning.
- Forefoot GEL™ technology.
- Updated DYNAWALL™ provides ultimate stability without sacrificing comfort. The innovative design features an opened window on the forefoot, supporting the foot to brake without losing comfort on the little toe.

OUTSOLE

- Tennis-specific AHARPLUS™ (ASICS High Abrasion Rubber).
- Non-Marking outsole.
- Available in Hardcourt and Herringbone (Clay) outsole.
