Lab Quality Management Certificate

ASTM International is pleased to introduce the **Lab Quality Management Certificate** program from Lab Manager Academy. This comprehensive training is designed to elevate your expertise in laboratory quality practices. **Led by expert instructor Dan Zuccarello**, the program equips lab professionals with the essential tools required to foster a culture of quality, implement robust quality management systems, and drive continuous improvement.

Whether you're advancing your career or enhancing your lab's operations, this program offers valuable insights into the foundations and responsibilities of quality management.
