Lab Management Certificate

ASTM International is pleased to introduce the **Lab Management Certificate** program from Lab Manager Academy. The **Lab Management Certificate** equips current and aspiring lab managers with essential leadership and management skills to enhance lab operations and career growth. Covering topics like performance, onboarding, decision-making, lab safety, and conflict management, this comprehensive program includes 20 courses featuring real-life examples applicable to any lab setting. Crafted by **Academy lead instructor Scott Hanton, Ph.D.**, with 30 years of experience in industrial chemistry—20 as a lab manager—the courses provide practical, growth-oriented insights with actionable takeaways.

Earn an official certificate from an IACET-accredited organization, and access training alongside the ASTM technical content you already leverage. Transform your career and become the powerhouse leader your lab deserves!

Lab Management Streams

Each stream consists of five self-paced online courses, which contain a lecture video, supporting slides, activities to practice the skills, interactive elements, and a short quiz at the end. Each stream will benefit existing and potential lab managers.
