# About Wekan

We help entrepreneurs and corporate leaders drive innovation in the cloud. We have experience architecting and implementing complex cloud native applications in high-availability environments leveraging the MongoDB developer data platform.

UX & UI Design

From mapping stakeholders needs, to running competitive analysis and defining use personas. Our team of design experts help create journeys that stick by reducing pain points and creating value for the users
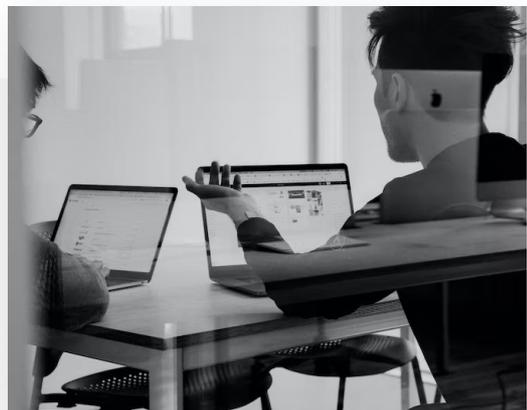

Engineering Services

We help our customers define scalable architectures, leveraging the latest technologies and selecting services that suit their performance and data availability needs. Our team of cloud versed software architects and developers support our customers all the way through their engineering journey.

Staff Augmentation Support

WeKan streamlines sourcing and the onboarding of vetted engineering talent that is then deployed within customer teams. All administrative hassle is handled by WeKan...
