INSTRUCTIONS

Step 1

Open the bag and turn Shelter upside down. Open the support stay, fanning it out into the shape of an 'X'.

Step 2

Insert the rounded ends of the support stay into the 4 corresponding loops on the underside of Shelter. Fasten the center of the support stay securely in place.

Step 3

Flip Shelter back to its upright position and place it on top of your Fire Pit Surround.

TIPS AND GOOD THINGS TO KNOW

- **IMPORTANT:** Shelter is not high heat-resistant. Allow your Surround and fire pit to cool completely before covering with Shelter to avoid damage.
- Support stays are slightly curved, and should be positioned to create a dome shape over your Surround.
- Shelter can be more rigid in cooler temperatures. If it's a tight fit, let Shelter warm to room temperature before placing it over your Surround.
