

Active Research Studies at Corewell Health West

6/3/2024

Cancer Health

Bone Marrow Transplant

Mo-Trans *Phase 2b Study with Acute Myeloid Leukemia (AML) patients undergoing Allogeneic Hematopoietic Stem Cell Transplant (HSCT)*

Kymriah *Managed Access Program to provide access to CTL019, for acute lymphoblastic leukemia (ALL) or large B-cell lymphoma patients without specification leukapheresis product and /or manufactured tisagenlecleucel out of specification for commercial release*

General Oncology

MAST *A Phase I, Dose Escalation Safety and Tolerability Study of VAXINIA (CF33-hNIS), Administered Intratumorally or Intravenously as a Monotherapy or in Combination with Pembrolizumab in Adult Patients with Metastatic or Advanced Solid Tumors (MAST).*

EQUATOR *A Phase 3, Randomized, Double-Blind, Placebo-Controlled Multicenter Study of Itolizumab in Combination with Corticosteroids for the Initial Treatment of Acute Graft Versus Host Disease*

HAI for Pancreatic Mets to Liver
03856658 *A Phase II Trial of Hepatic Artery Infusional Floxuridine with Systemic Chemotherapy in the Treatment of Pancreatic Cancer Liver Metastases*

Gynecology

GLORIOSA *Randomized, multicenter, open-label, phase 3 study of mirvetuximab soravtansine in combination with bevacizumab versus bevacizumab alone as maintenance therapy for patients with FRA-positive recurrent platinum-sensitive epithelial ovarian, fallopian tube,*

MAMMOTH *Phase 1/2 dose escalation and dose expansion study of zN-c3 alone or in combination with Niraparib in subjects with platinum resistant ovarian cancer*

Lung Cancer

On- SITE Study *A multicenter study in bronchoscopy combining Stimulated Raman Histology with Artificial Intelligence for rapid lung cancer detection*

RYZ101-101

Phase 1b single arm, open-label trial of RYZ101 in combination with carboplatin + etoposide + atezolizumab in subjects with somatostatin receptor expressing (SSTR+) extensive stage small cell lung cancer (ES-SCLC)

Surgical Oncology

Roux-en-Y

This study is intended to investigate whether roux-en-y bypass surgery is superior to conventional loop gastrojejunostomy in terms of tolerance to solid food intake. We hypothesize that roux-en-y bypass will be associated with improved solid food intake in the first 30 days after surgery.

TENS Efficacy

Transcutaneous electrical nerve stimulation for delayed gastric emptying after pancreaticoduodenectomy.

Urology

Legend

A Phase 1/2 Study of EG-70 as an Intravesical Administration to Patients with BCG-Unresponsive NMIBC and High-Risk NMIBC Patients who are BCG Naïve or Received Incomplete BCG Treatment

G-Major

Genomics in Michigan to Adjust Outcomes in prostate cancer (G-Major): A randomized controlled multi-center study for men with newly diagnosed favorable risk prostate cancer.

CISTO

CISTO: Comparison of Intravesical therapy and Surgery as Treatment Options for Bladder Cancer

BT8009 Monotherapy

A Randomized Open-Label Phase 2/3 Trial of BT8009 Monotherapy or in Combination in Participants with Locally Advanced or Metastatic Urothelial Cancer (Duravelo-2).
