<b>Disease site specific</b>				
<b>Chronic Kidney Disease</b>				
<b>NAPRTCS Registry</b>	<b>NAPRTCS Registry</b>	Registry	Dr. Julia Steinke	<b>Julia Steinke, MD</b> julia.steinke@spectrumhealth.org 616.267.2400
<p><i>The purpose of the registry is to enter scientific data on the care and treatment of pediatric kidney disease and transplantation into a national registry. Collecting this data into one nationwide registry is expected to improve medical care of children including those who have received renal transplants.</i></p>				
<b>Other</b>				
<b>Cure GN</b>	<b>Cure Glomerulonephropathy Network</b>	Registry	Dr. Jens Goebel	<b>Kelly Nguyen</b> kelly.nguyen@spectrumhealth.org
<p>The purpose of the CureGN is to create a source of information so that researchers can easily and effectively study rare glomerular disease such as MCD, FSGS, MN and IgAN, the underlying causes, identify markers of disease, and identify and evaluate new therapies.</p>				
<b>Kaneka Liposorber LA-15 PAS</b>	<b>Treatment of Drug-resistant Pediatric Primary Focal Segmental Glomerulosclerosis Using the Liposorber® LA-15 System: Post Approval Study</b>	Observational	Dr. Alejandro Quiroga Chand	
<p>This is an observational research study for patients who have agreed to receive treatment with the Liposorber System. An observational study is a type of research in which individuals are observed over a period of time to measure outcomes, and no changes are made to the treatment participants receive. For this study we will collect information (or “data”) about your health and your treatment with the Liposorber system, and we will collect blood and urine samples at some visits for research lab tests. The information collected from study participants will be used to further evaluate the safety and probable benefit of this treatment.</p>
