

Co-Management Guidelines for Congenital Hydronephrosis

Inclusion Criteria:
 Obtain prenatal records for anteroposterior diameter on fetal ultrasound equal or greater than 4 mm on the second trimester or 7 mm on third trimester

- Suspected posterior urethral valves?
- Oligohydramnios?
- Bilateral hydronephrosis (\Rightarrow 7 mm 2nd trimester, \Rightarrow 9 mm 3rd trimester)

At any point a febrile UTI should prompt a **referral to Pediatric Nephrology

*Do not send culture unless suspect infection. Culture must be via catheter.
