

Harlori K. Bains, MD

Assistant Program Director

What I love most about HDVCH and this residency is...how much of an impact and change that come from our residents!

About Me

- I grew up in mid-Michigan, and even convinced my husband (born and raised in the south) to move back to the state. There is just nothing that beats the fall colors & autumn festivities here.
- I have two small dogs, and I talk to them like they are humans.
- We are expecting our first human baby right in the midst of the 2023-2024 interview season, so I apologize that I will not get to meet most of you!

My Training

- Undergraduate: Michigan State University, Human Biology
- Medical School: Wayne State University
- Residency: Phoenix Children's Hospital
- Fellowship: Barrow Neurological Institute – Neuroimmunology & Multiple Sclerosis

My Clinical Interests

- Pediatric-Onset Multiple Sclerosis
- Autoimmune Encephalitis
- Acute Flaccid Myelitis

My Hobbies

- Classical Indian Dance (I have been learning Kathak virtually)
- Traveling to mountain-scapes and finding scenic Air BN&B's to stay in
