

Stork Pop Up Card

By @jessdeaconworks

For this craft you'll need:

- * Scissors or a craft knife
- * Glue (I use UHU all purpose)
- * A glue spreader or craft syringe (or a small folded piece of paper) to apply the glue.

Welcome the arrival of a new baby with this fun stork themed pop up card. Included in this printable are different colour options for the stork's bundle, as well as a selection of messages to cut and paste as you choose.

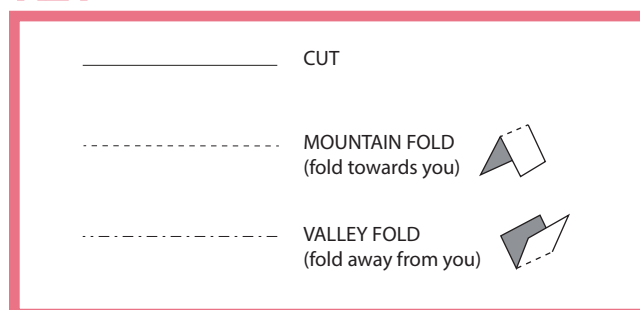

Stork Pop Up Card

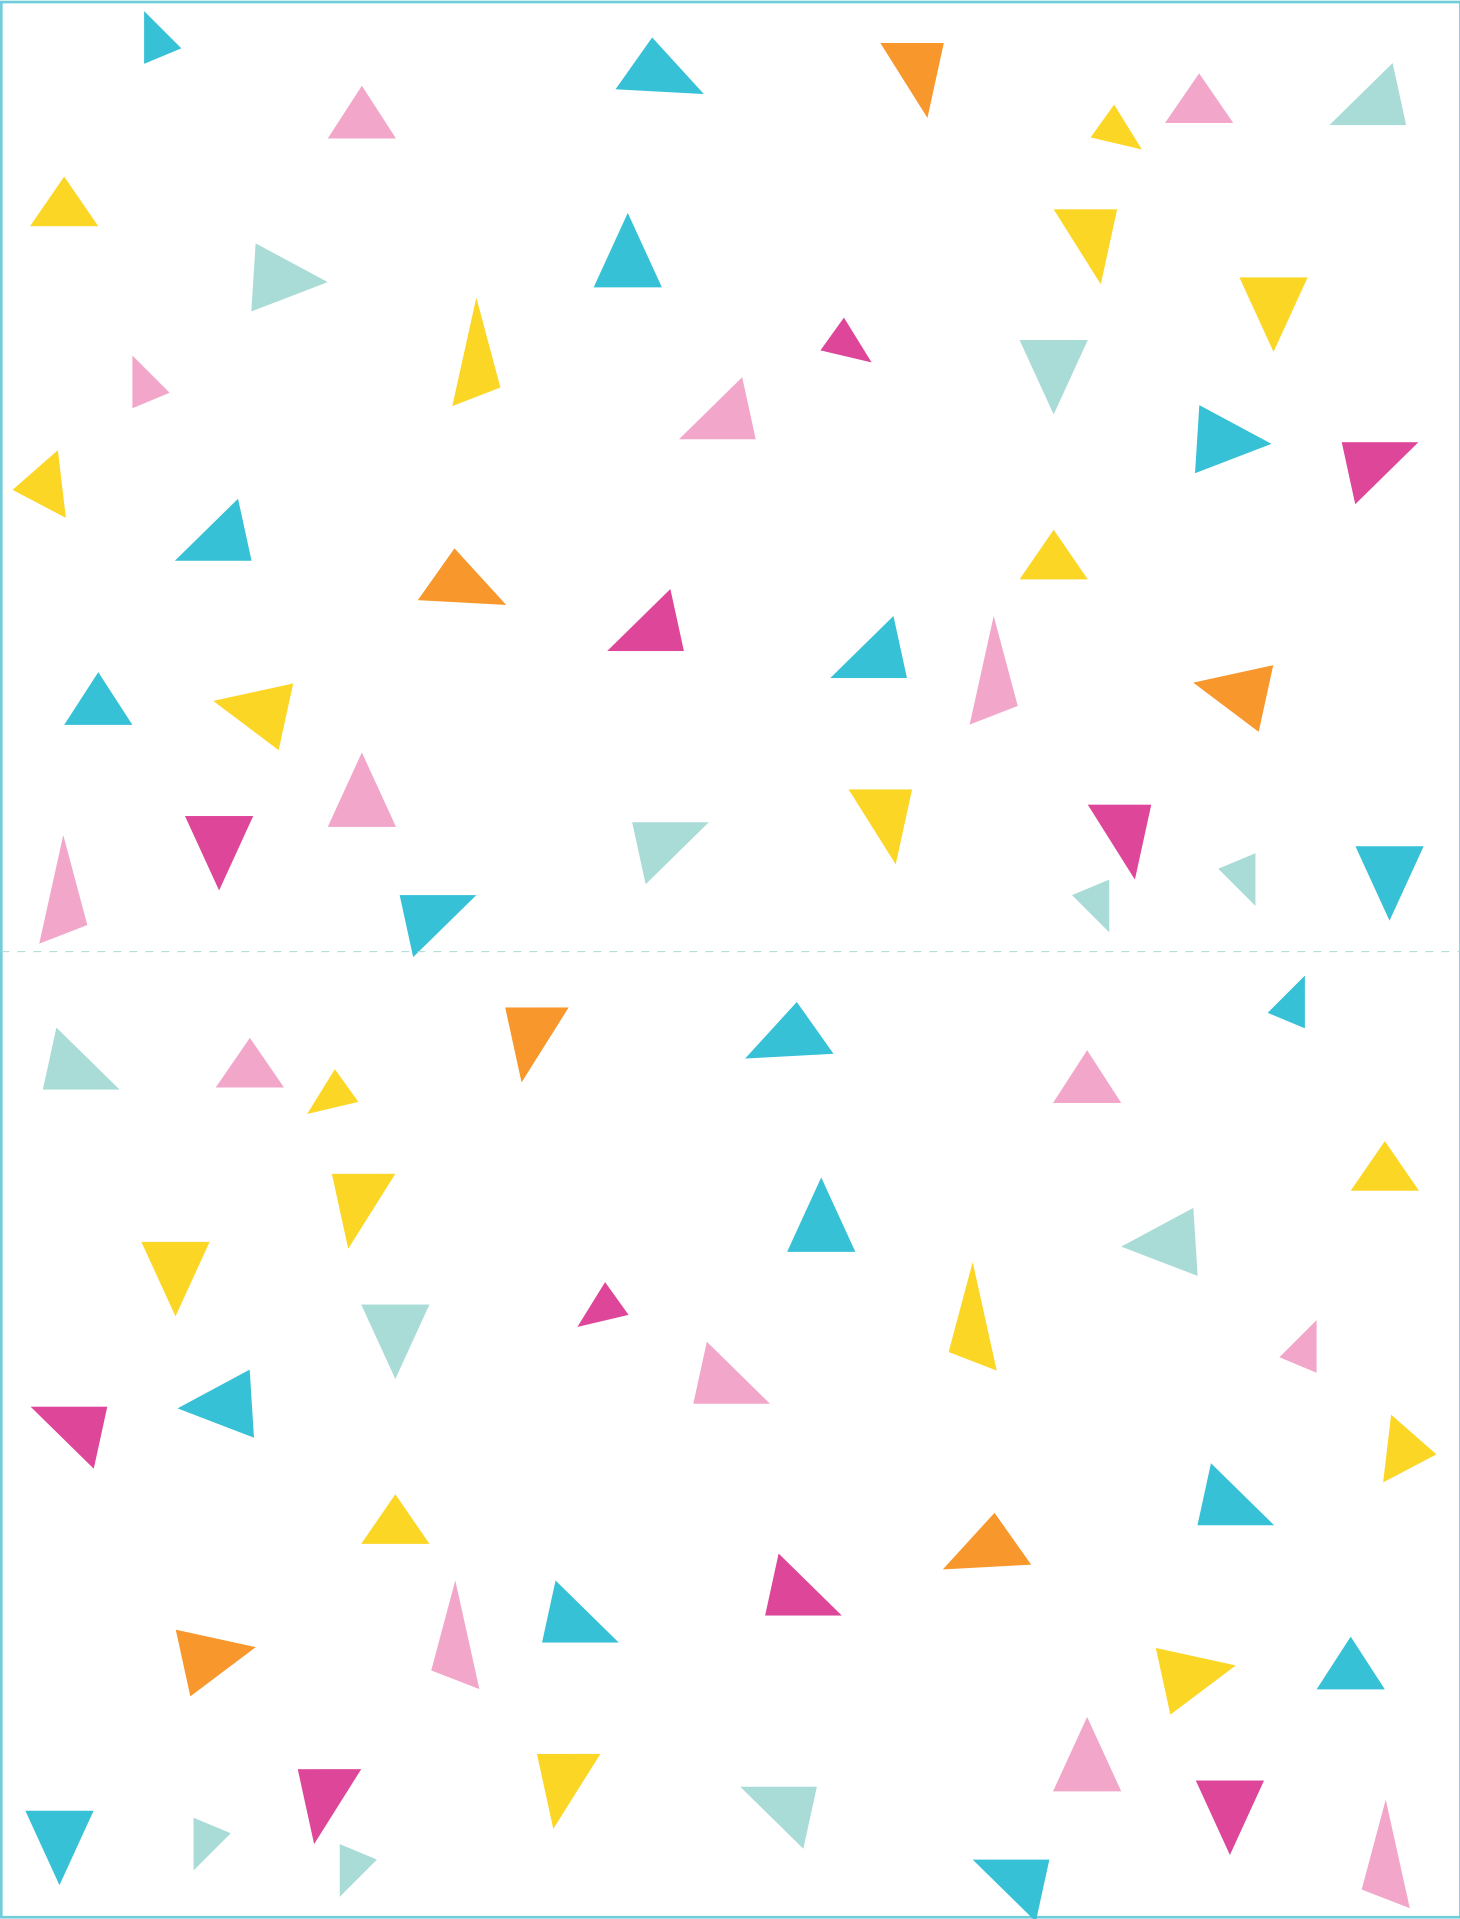

By @jessdeaconworks

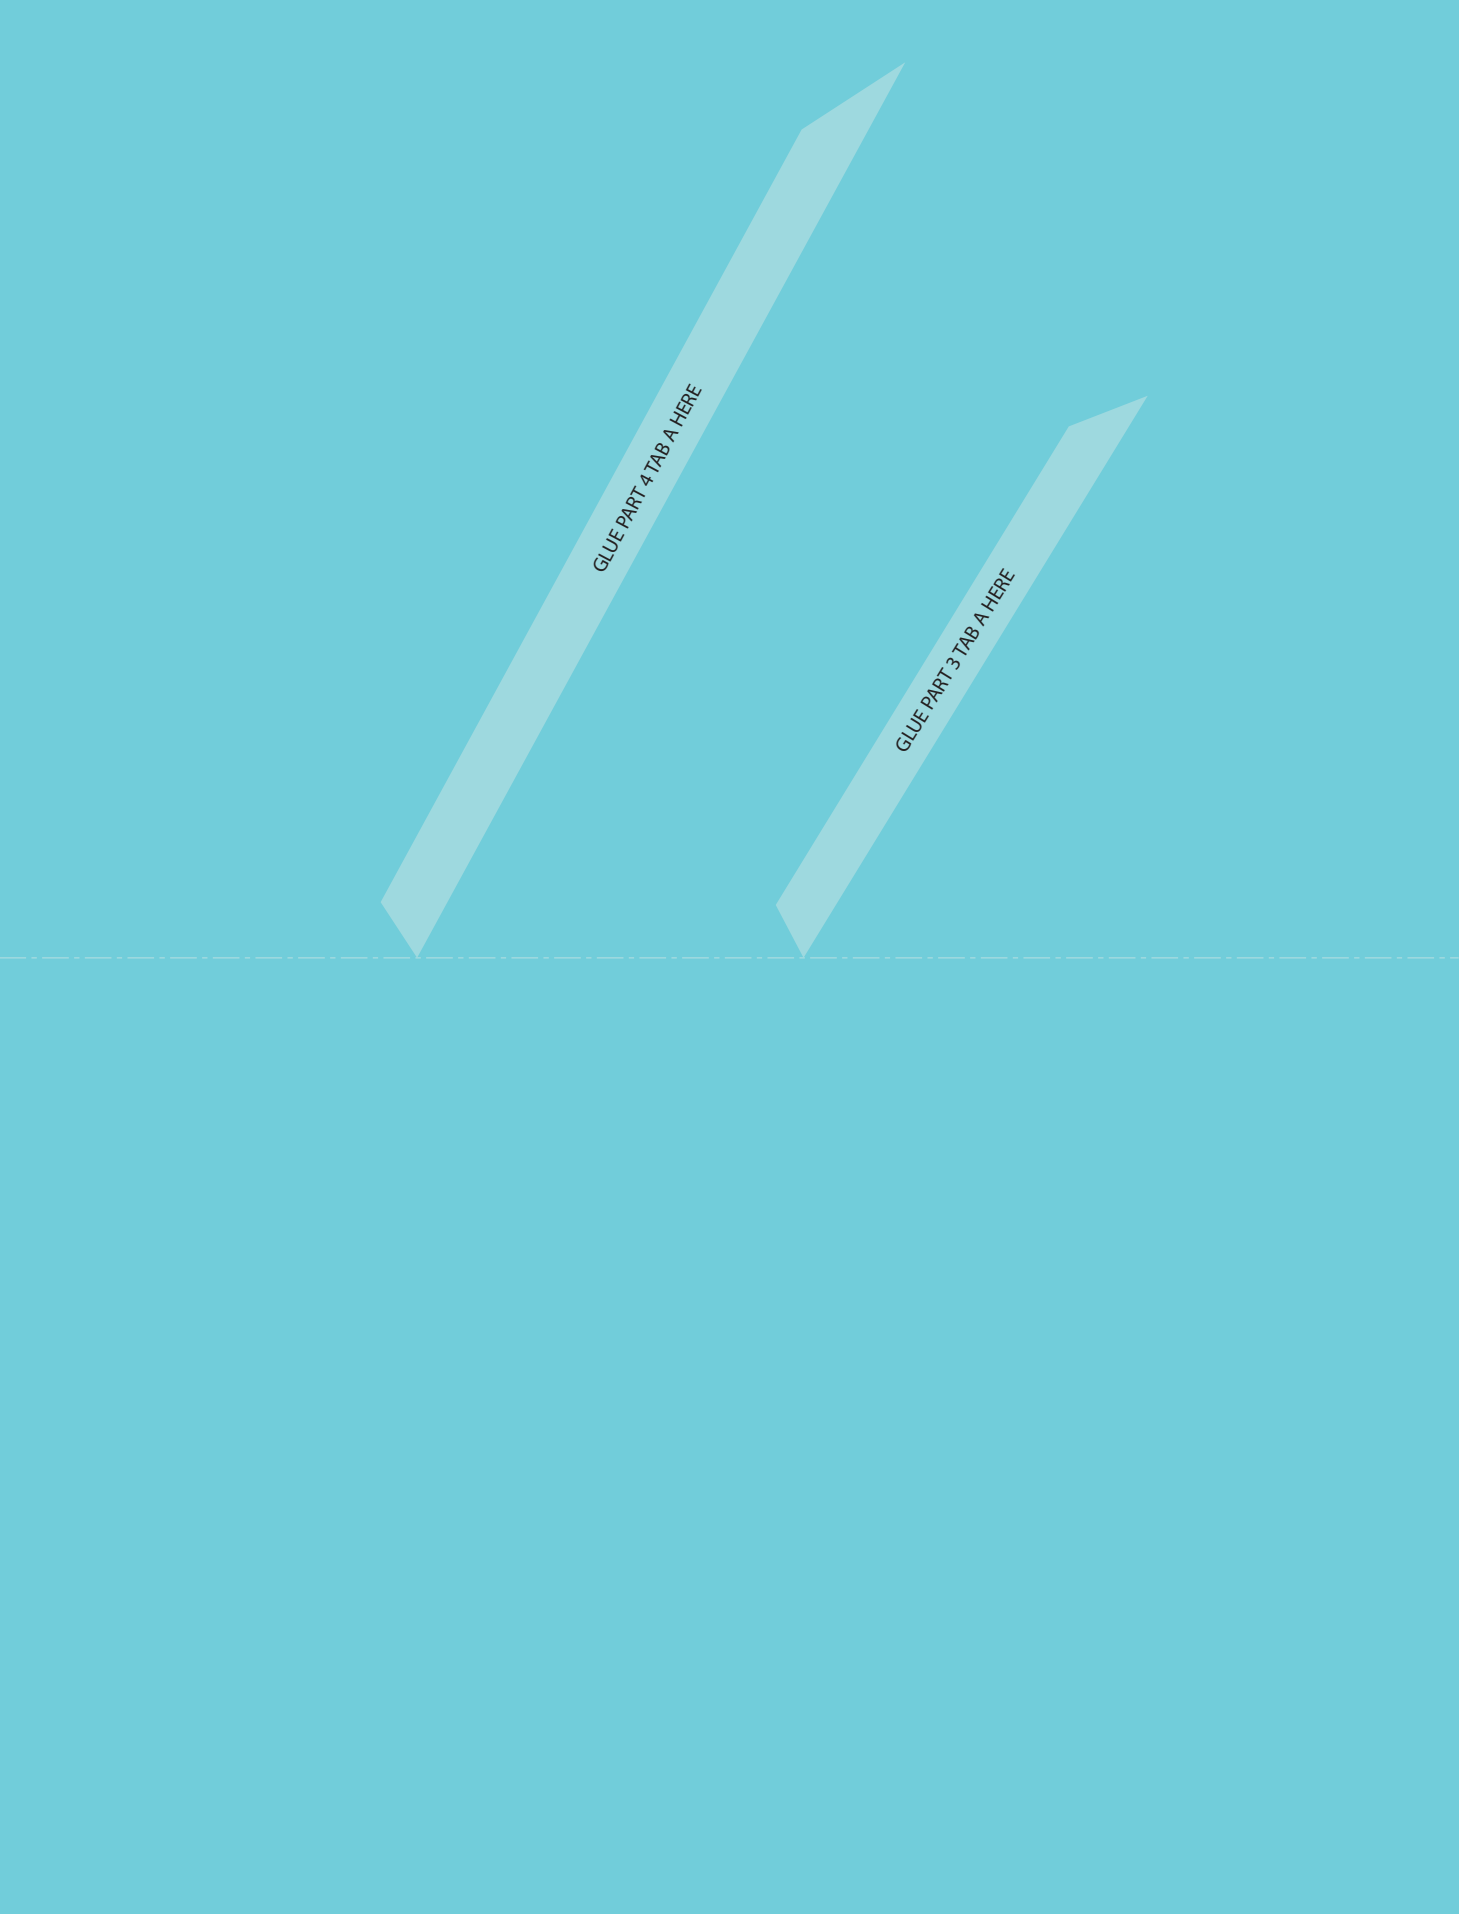

Instructions

1. Cut out all parts using a craft knife or scissors. For the messages and baby bundles, you can just cut out the parts you want to use.
2. Carefully fold along all fold lines (see key for direction of folds). Before folding it is recommended to score the line lightly with a craft knife or a ballpoint pen that no longer has ink in it. This will make folding easier and more precise.
3. Take part 3 and fold in half, paying close attention to which direction the fold lines fold.
4. Positioning part 3 so that the stork is facing forward, glue tab A into place on part 2 (with the tab hidden behind the cloud). You'll need to make sure the middle fold is right up against the middle fold of part 2. Once it is in place (and making sure no glue has escaped) shut the card (part 2) to make sure part 3 doesn't stop the card from shutting.
5. Now put glue onto tab B (of part 3) and, keeping part 3 folded, shut the card again. The tab will now be glued to the left side of the card.
6. Repeat this process with part 4, starting with tab A.
7. Take part 5 (whichever colour you have chosen) and fold over and glue together (white side inside). Gently push the top of part 5 through the cut line in the stork's beak from the bottom up. Then fold over part 6 (white side inside) and attach to the top of part 5, sandwiching the top of part 5 inside and completing the bundle.
8. Choose your message and stick it inside the card, avoiding the centre fold.
9. Apply a line of glue to the spine of part 2 (the white side) and stick it to the inside spine (the white side) of part 1. It is important to leave the rest unglued to allow movement when the card opens.
