

Instructions:

1. Print out this page, preferably onto thin white card.
2. Using a pair of scissors, cut round the image.
3. Poke a hole through the middle of the eyes, then go in with your scissors to carefully cut the white space out. Alternatively, use a craft knife for this step.

4. Fold your mask in half to help it sit well when worn.
5. Finally, either staple or securely tape two pieces of string or ribbon on either side so they can be tied around the head. Your mask is complete and ready for some feline fun!

Black Cat Mask

Cut roughly along the yellow dotted line first of all, then take your time trimming the paper to the edge of the design. This way you're not fighting with the excess paper and can get a neater finish.

Why not add some craft embellishments on top of the paper design to add some glitz? *
