

# Fizzy Foam Experiment

## SUPPLY LIST

baking soda  
vinegar  
food coloring  
spoon  
clear egg carton  
large tray or pan

### STEP 1

Put 1-2 drops of food coloring in each cup.

### STEP 2

Cover the drops with a spoonful of baking soda.

# Fizzy Foam Experiment

**STEP 3**

Pour vinegar over top of the baking soda cups and watch the fizzing begin!

**Add small toy dinosaurs or animals for lots of fizzing fun!**

**DID YOU KNOW?** When you mix baking soda and vinegar a chemical reaction causes carbon dioxide to be released. This is what creates the fun fizzing reaction!
