

# African Hut

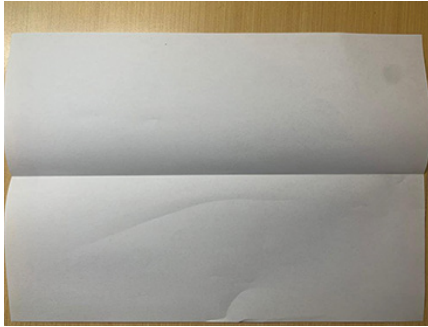

# Instructions

Tools:  
Scissors, Glue

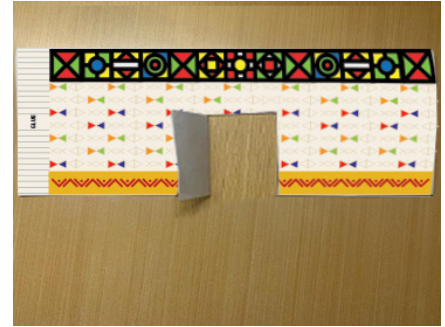

How to make it:

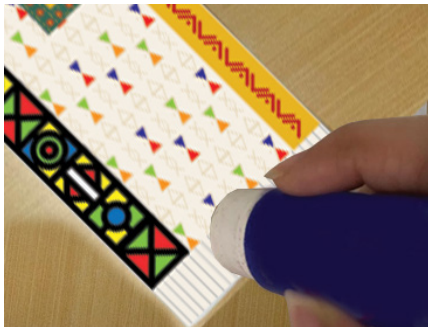

Print sheet 1 and fold the paper as shown. Please ensure to keep blank side of the paper inside.

Keep the open sides towards you. Cut along the dotted lines to make the door.

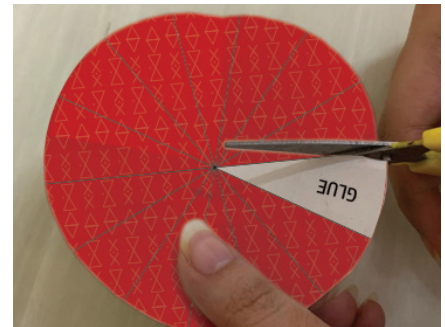

Fold the door outwards and inwards to make a crease so that it easily opens and closes.

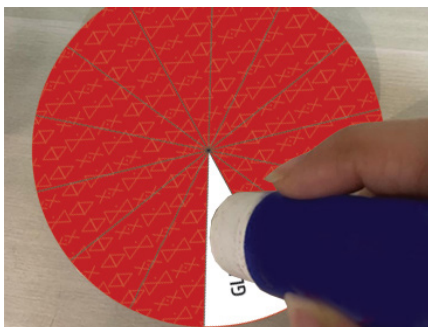

Apply glue on the glue area and paste it with the other end of the paper.

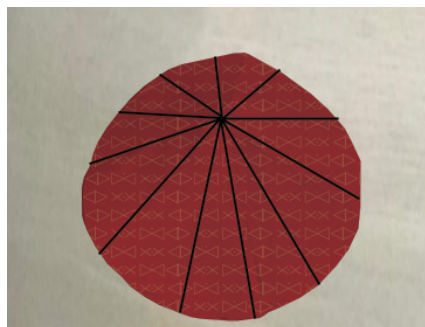

You will see a circular shape forming.

Cut the shape given on sheet 2. Make the cut on the dotted line as shown.

Apply glue on one end of the bigger cut and paste it as shown.

Your hut roof is ready. Apply glue on top of the circular shape and paste the roof on it.

Your hut is ready. Keep it in your room or flaunt it in the living room!
