

# Nature Painting

Go on a nature walk, find some vibrant coloured leaves and flowers and use them to turn this page into a masterpiece.

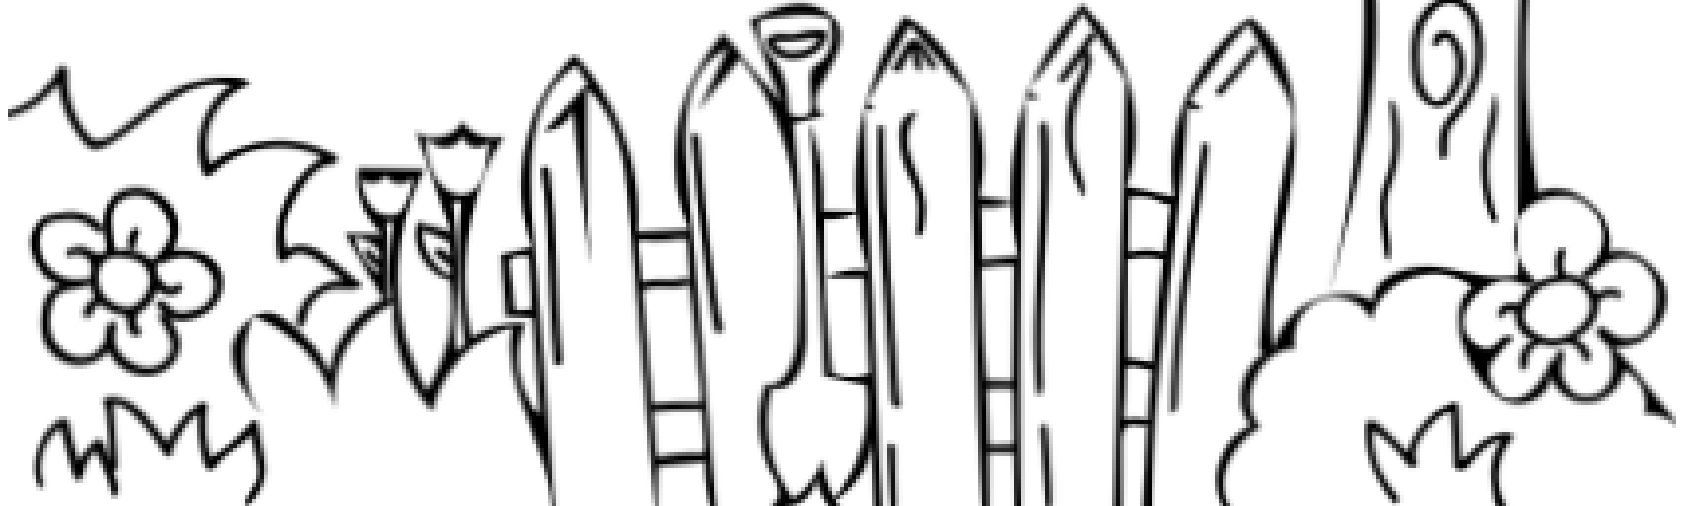

Can you find a yellow or orange flower to colour the sun?

Can you find any soil to colour the trunk of the tree?

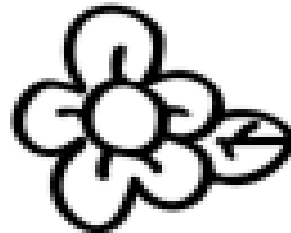

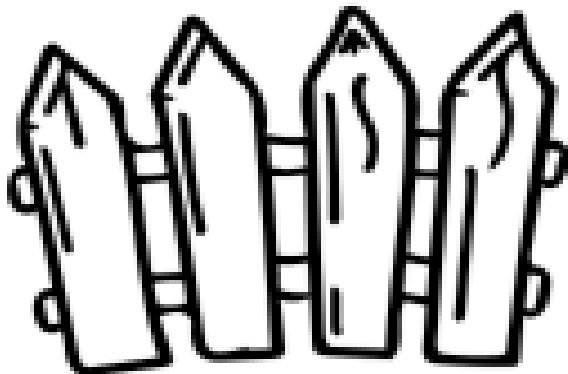

Can you use a leaf to colour the bushes? What do you notice about different leaves?

Use these images to create your own masterpiece.

You can colour, cut and stick them or you can use this as a tracing stencil but be sure to use nature's colours.

Try using a wet paintbrush to see what effect it has on nature's colours. What do you notice?
