A Note to the Teacher...

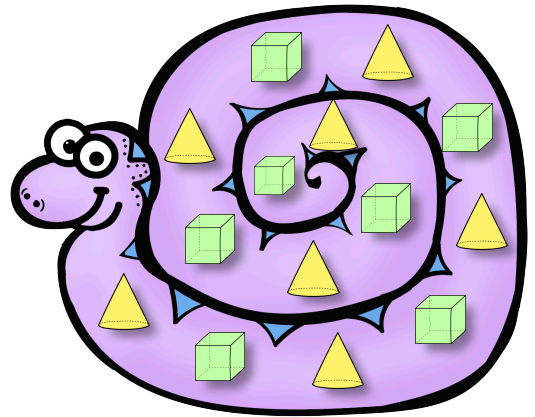

This resource integrates art and math for a hands-on way to reinforce math concepts!

Math Concept: **Patterning & Geometry**

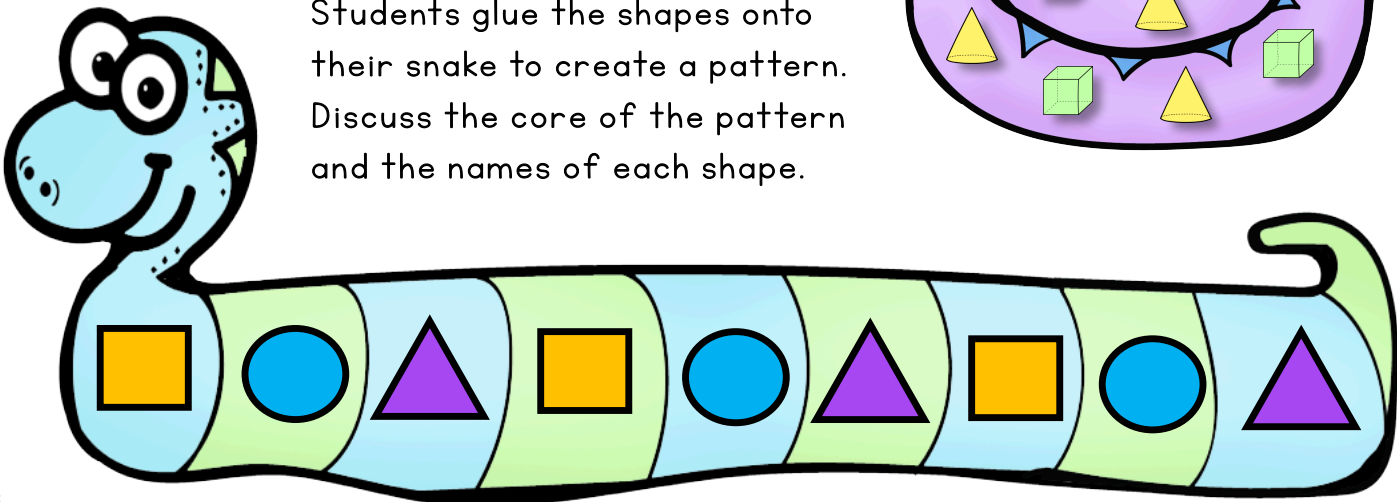

Directions: Discuss different kinds of patterns with your students: AB, ABB, AAB, ABC, AABB, etc.

Copy a snake for each student to color and cut out. Copy a set of shapes for students to color and cut out. Alternately, students can cut out their own shapes from colored paper.

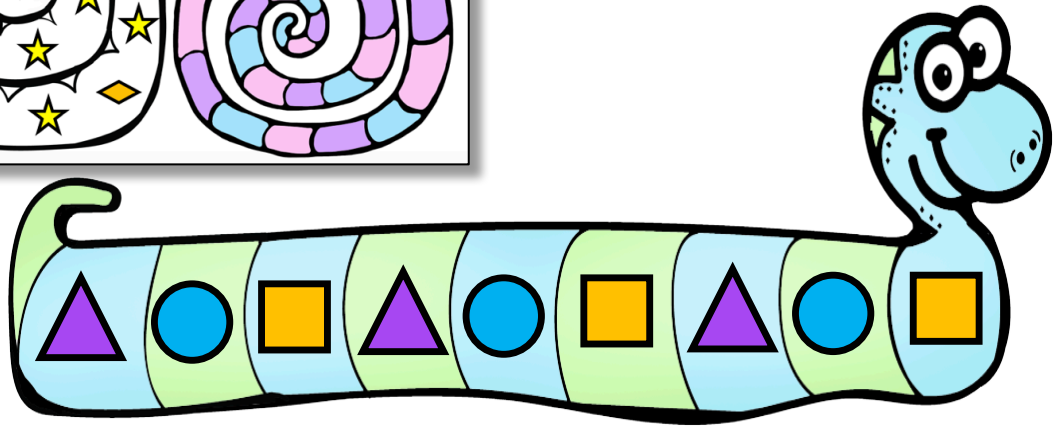

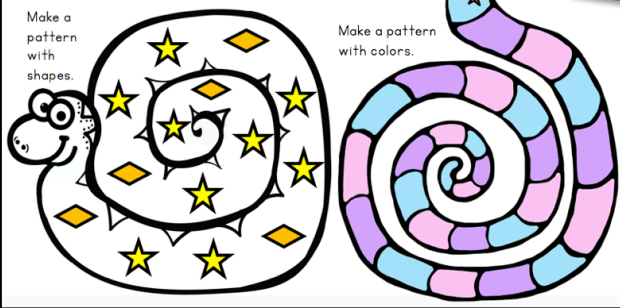

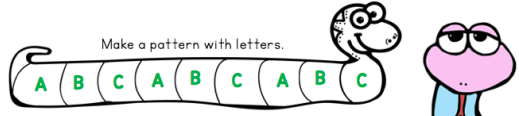

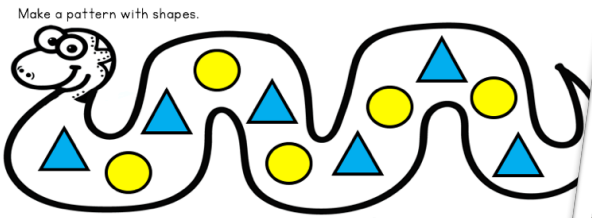

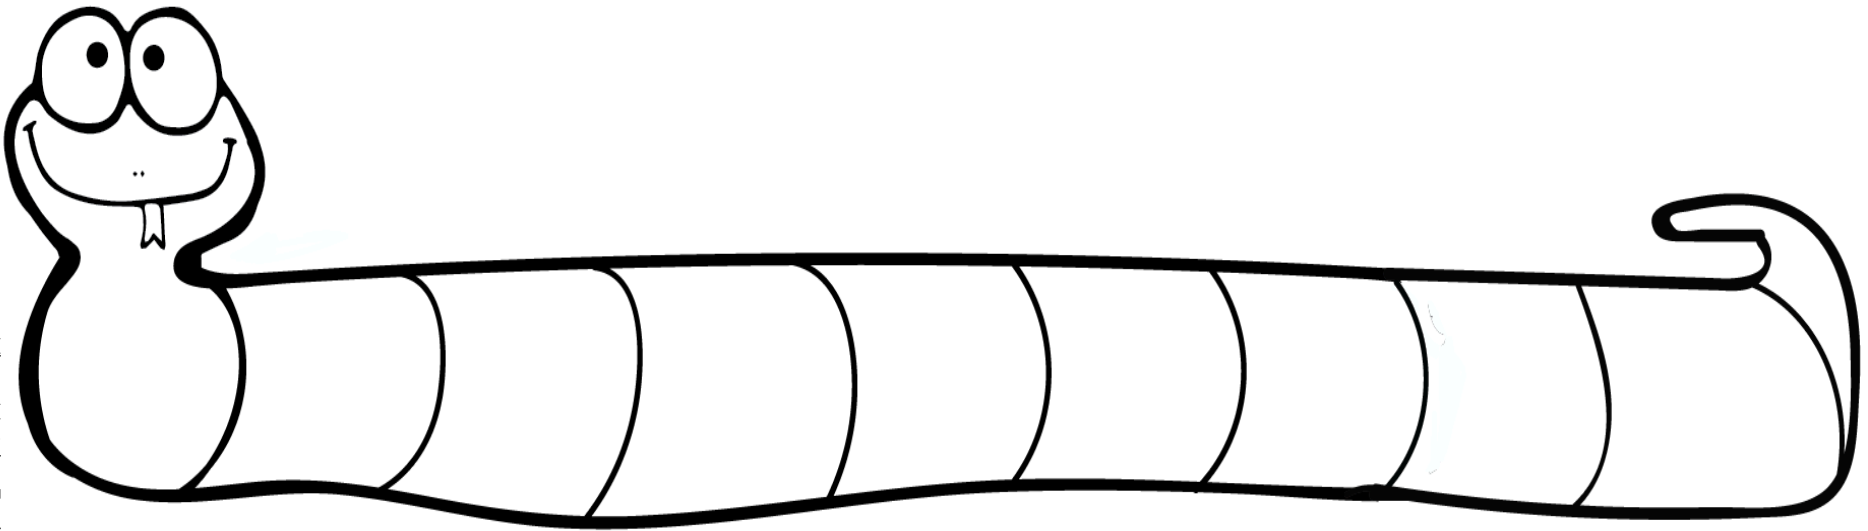

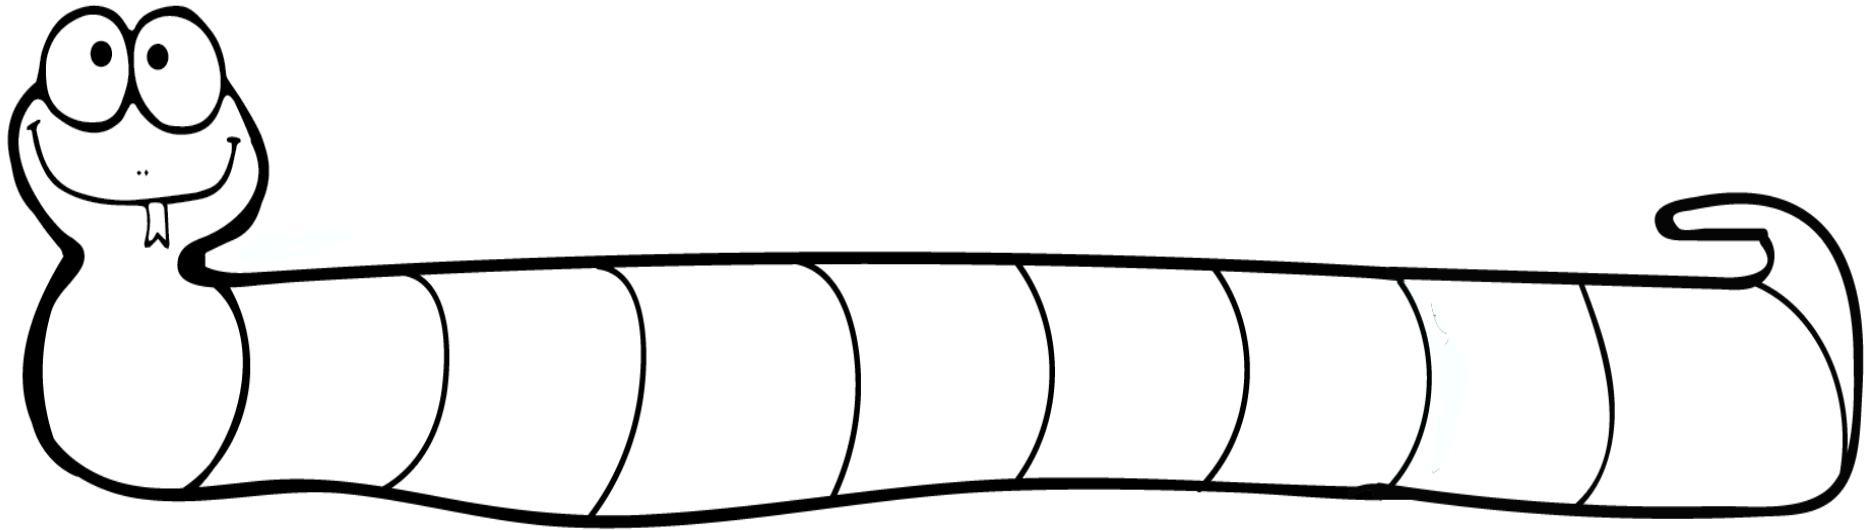

Students glue the shapes onto their snake to create a pattern. Discuss the core of the pattern and the names of each shape.
