

paper garden

Materials:

Scissors

Printed Template

Glue

Textas/Crayons/Pencils

Other mixed crafts

Cardboard or a toilet roll

Instructions:

Step 1: print and cut out your template pieces.

Step 2: the cabbage and cauliflower can be made 3D by wrapping the larger pieces around the smaller ones to build the shape.

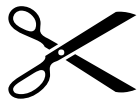

Step 3: build flowers of your choice by layering the different petal shapes. You can make mini flower pots for them to sit on by curling cardboard or cutting the base off a toilet roll!

Step 4: using craft materials and textures, make your own flowers and plants! Pom poms can make great flower centres, ribbons can make stems, and magazines can be cut out to make more leaves and flowers.

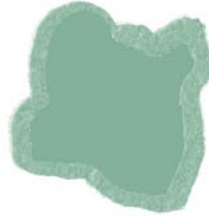

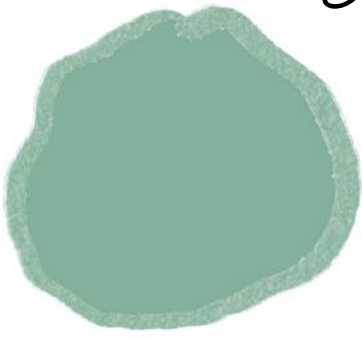

Step 5: your garden is blooming!

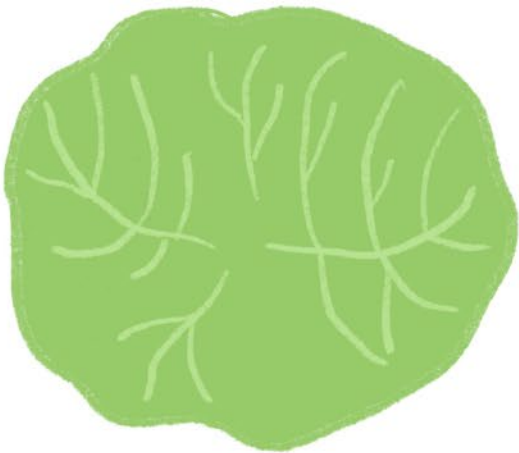

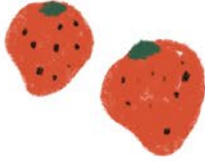

cut around each piece
