Wrestling Definitions

Decisions: If no fall has resulted after the expiration of the three regular periods of any match, the referee shall award the match to the contestant who has scored the greater number of points as provided by the points system. If there is a tie in the number of points scored, the referee shall declare the match a draw in dual meets.

Default: A default is awarded in a match when one of the contestants is unable to continue wrestling for any reason.

Disqualification: Disqualification is a situation in which a contestant is banned from participating in accordance with the Penalty Chart.

Escape: DEFENSIVE WRESTLER: Bottom man; OFFENSIVE WRESTLER: Top Man. An escape occurs when the defensive wrestler gains a neutral position and the offensive wrestler has lost control while supporting points of either wrestler are within the wrestling area.

Fall: Any part of both shoulders or area of both scapulas held in contact with the mat for one second constitutes a fall. The one-second count (one thousand and one) shall be a silent count by the referee and shall start only after the referee is in such a position that he can observe that a fall is imminent, after which the shoulders or the scapula area must be held in continuous contact with the mat in bounds for one second before a fall is awarded. A) A fall shall not be awarded when one of both shoulders of the defensive wrestler are out of bounds. B) If either wrestler is handicapped by having any portion of his body out of bounds, no fall shall be awarded and out-of-bounds shall be declared. C) When the match is stopped for out-of-bounds in a fall situation, the match shall be resumed in the starting position on the mat.

Forfeit: A forfeit is received by a wrestler when his opponent, for any reason, fails to appear for the match. In order to receive a forfeit, a wrestler must be dressed in wrestling uniform and appear on the mat.

Neutral Position: A neutral position is a position in which neither wrestler has control.

Near Fall: A near fall is a position in which the offensive wrestler has control of his opponent in a pinning situation, 2 points shall be awarded. The criteria for a near-fall having been met uninterrupted for five seconds, three points shall be awarded. Whenever possible, a visual hand count is to be used in determining a three-point near fall.

Reversal: A reversal occurs when the defensive wrestler comes from underneath and gains control of his opponent, either on the mat or in a standing position, while the supporting points of either wrestler are within the wrestling area.

Stalemate: When the contestants are interlocked in an other than pinning situation in which neither wrestler can improve his position, the referee shall, as soon as possible, stop the match and wrestling will be resumed for an out-of-bounds.

Takedown: When, from the neutral position, a contestant gains control and places his opponent's supporting points down on the mat (Held beyond reaction time, while the supporting points of either wrestler are within the wrestling area), he has gained a takedown.

Time Advantage: The offensive wrestler who has control in an advantage position over his opponent is gaining time advantage. At the end of the match, if the contestant with the greater time advantage has less than one minute of net time advantage, no point is awarded. If he has one minute or more of time advantage, he is awarded a maximum of one point.
