

**TECNIS**  
Eyhance® IOL

**TECNIS**  
Eyhance® Toric II IOL  
with TECNIS SIMPLICITY™ Delivery System  
Toric II

**LIVE THE LIFE YOU WANT TO SEE.**

**INDICATIONS FOR USE**

The TECNIS Eyhance™ IOL is indicated for the visual correction of aphakia in adult patients in whom a cataractous lens has been removed by extracapsular cataract extraction. The lens extends the depth of focus, which improves vision for intermediate tasks, and provide similar distance vision as compared to a standard aspheric monofocal IOL. The lens is indicated for placement in the capsular bag only.

The TECNIS Eyhance™ Toric II IOL is indicated for the visual correction of aphakia and pre-existing corneal astigmatism in adult patients with or without presbyopia in whom a cataractous lens has been removed by extracapsular cataract extraction and who desire improved uncorrected distance vision, reduction in residual refractive cylinder, and increased spectacle independence for distance vision compared to a non-toric IOL. The lens also extends the depth of focus, which improves vision for intermediate tasks, and provides similar distance vision as compared to a standard aspheric monofocal IOL. The lens is indicated for placement in the capsular bag only.

**CONTRAINDICATIONS:**

There are no known conditions under which the TECNIS Eyhance™ and TECNIS Eyhance™ Toric II IOLs should not be used.

**RISKS:**

There are risks to routine cataract surgery. This is irrelevant to the lens you choose. The problems could be minor, temporary, or affect your vision permanently. Complications are rare. These may include worsening of your vision, bleeding, or infection. Similar to other monofocal IOLs, patients implanted with the TECNIS Eyhance™ or TECNIS Eyhance™ Toric II IOLs may require glasses for some tasks. Discuss all risks and benefits with your eye doctor prior to surgery.

**WARNINGS:**

Pre-existing diseases or conditions may place you at higher risk of experiencing complications (e.g., more difficult recovery) after routine cataract surgery. Examples of pre-existing diseases or conditions include, but are not limited to: ocular inflammation, surgical difficulties at the time of cataract extraction, suspected eye infection, congenital bilateral cataract, history or predisposition to retinal detachment, patients with only one good eye with potentially good vision, medically uncontrollable glaucoma, diabetes, heart disease, and previous trauma to your eye good eye with potentially good vision, medically uncontrollable glaucoma, diabetes, heart disease, and previous trauma to your eye. The TECNIS Eyhance™ Toric II IOL corrects astigmatism when it is placed correctly in the eye. There is a chance that the TECNIS Eyhance™ Toric II IOL could be placed incorrectly or could move within the eye, resulting in visual distortions. A second surgery may be needed to properly position the lens. These lenses have not been evaluated for use in children.

**PRECAUTIONS:**

If your eye is not healthy (including glaucoma), your vision may not be good even after your cataract is removed. In this case, you may not get the full benefit of the TECNIS Eyhance™ and TECNIS Eyhance™ Toric II IOLs. Before surgery, your eye doctor will check if you have any eye diseases that may influence your IOL selection. In rare instances, the TECNIS Eyhance™ and TECNIS Eyhance™ Toric II IOLs may make some types of retinal treatment (e.g., retinal tear repair) more difficult. Take all prescribed medicines and apply eye drops as instructed to avoid inflammation and infection. Your eye doctor may tell you if you should avoid certain activities after surgery.

**SIDE EFFECTS:**

Side effects of cataract surgery with the TECNIS Eyhance™ and TECNIS Eyhance™ Toric II IOLs may include swelling/thickening of an area of the retina, and/or the need for a second surgery to reposition the lens, repair the retina, or remove the new lens.

**ATTENTION:**

Reference the Directions for Use for a complete listing of Indications and Important Safety Information.

Toric II

After cataract surgery, you'll see through a new lens implant called an Intraocular lens (IOL). The question is: which lens implant is right for you? While most standard monofocal IOLs offer quality distance vision, you can now expect more.

**Introducing the TECNIS Eyhance® IOL - the next generation of enhanced refractive IOL technology, available for patients with or without astigmatism.**

# EXPERIENCE ENHANCED INTERMEDIATE VISION AND HIGH-QUALITY DISTANCE VISION.<sup>1</sup>

The **TECNIS Eyhance**<sup>®</sup> IOL defies conventional thinking about IOLs by delivering not only high-quality distance vision, but also enhancing vision and better low-light contrast.<sup>1,2</sup>

You live for your favourite activities. Find it hard to focus on your GPS while driving? Have trouble reading signs in a store? Does the TV look blurry? Worried about walking on uneven surfaces?

**TECNIS Eyhance**<sup>®</sup> IOL can help you see what you need to see. It's the next-generation enhanced refractive IOL with the clarity of distance vision you expect from a monofocal – now with the addition of enhanced intermediate vision.<sup>1</sup>

## WITH CATARACTS

Blurry or hazy vision and reduced intensity of colors

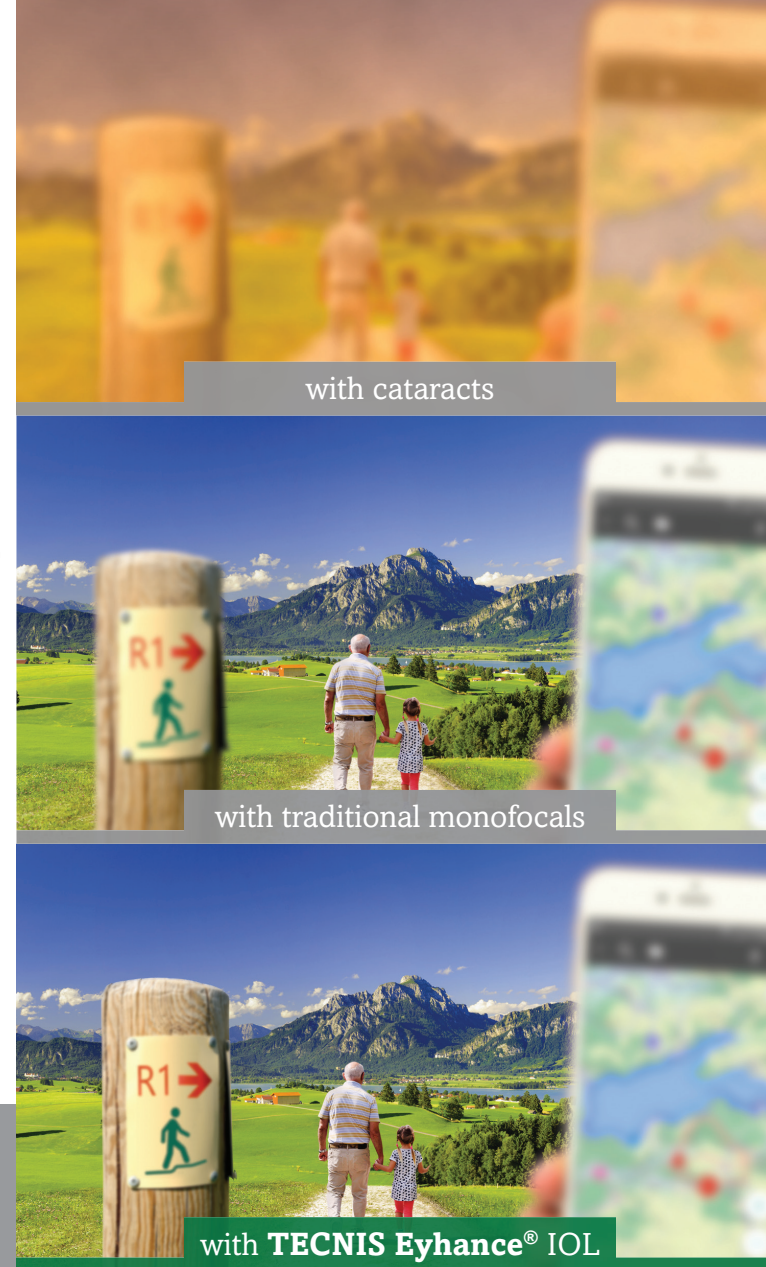

Increased sensitivity to halos and glare around bright lights

Increased difficulty seeing at night

Removed with cataract surgery

*These images are for illustrative purposes only and do not represent actual data derived from studies. These illustrative simulations are intended to help you better understand your vision in certain eye conditions.*

## BENEFITS OF TECNIS EYHANCE<sup>®</sup> IOL

Helps you see objects in the distance like traffic lights, stage performances and sporting events.<sup>1</sup>

May increase safety in low-visibility situations such as driving at night.<sup>1</sup>

Designed for high-quality distance and improved intermediate vision to make everyday tasks easier<sup>1</sup>. You may still need glasses to see closer.

Ask your doctor if you are eligible for other IOL opportunities - including high-contrast continuous vision at your ideal distances.

Additional information on your IOL options and cataracts can be found at [www.beyondcataracts.ca](http://www.beyondcataracts.ca).

**Talk to your doctor about your visual needs and find out if TECNIS Eyhance and TECNIS Eyhance Toric IOLs are right for you.**
