

Closepin announces integration with the leading digital lending software ICE Mortgage Technology™

Mortgage lenders can now obtain an instant compliance verification of 3rd party settlement agents through Closepin's integration with ICE Mortgage Technology™

[Plymouth Meeting, PA] – 11/22/2022 – Closepin, a part of the Grid151 family of companies, today announced a new integration built on the latest Partner Connect API Platform and available through ICE Mortgage Technology™, part of Intercontinental Exchange, Inc. (NYSE: ICE), a leading global provider of data, technology and market infrastructure, to reduce the time, cost, and complexity of validating 3rd party settlement agents for mortgage lenders.

Settlement agent compliance validation is often a manual, time-consuming, and expensive part of a mortgage lender's process, particularly in a purchase-centric market where the introduction of new settlement agents in real time results in an ever-expanding network of more unfamiliar and disparate partners. Collecting wire instructions, licensing, and insurance information and documents from settlement agents can be cumbersome, and often requires multiple attempts and follow-ups. Confidently verifying that information requires in-depth knowledge as requirements vary by state and provider type. Closepin is a comprehensive data-as-a-service solution which provides instant access to verified settlement agent data and documents, empowering lenders to make confident decisions efficiently.

"Most mortgage lenders are manually collecting and verifying wire instructions, E&O, and licensing on every single loan they originate. Closepin's new integration enables Encompass customers to obtain an instant compliance verification from over 30,000+ unique settlement agent offices without ever leaving the LOS. Data can be mapped and automatically populated into commonly used fields for settlement agent provider information to streamline and optimize the workflow," said Clint Casabella, SVP of Business Development for Grid151 (parent company of Closepin).

Closepin has accumulated settlement agent permissioned data on over 90% of providers in the U.S. and utilizes its proprietary verification technology to instantly provide lenders with all data and documents needed to make their own compliance decisions. The technology saves costs for the lender and provides a simple and easy experience for settlement agents. Closepin facilitates the secure sharing of data and documents between settlement agents and mortgage lenders such that provider records in the LOS are updated and validated.
