

Instructor Computer Courses / IT Trainer for children (m/f/x)

We are looking for further trainers to support our Digital School for Children. Teach our young learners F2F or virtually on a freelance basis.

*international,
dynamic,
professional*

Your responsibilities

- Teaching children and teens aged 7-15 years to program and create their first own computer games, apps, and websites.
- Supporting and motivating children to achieve their learning goals and present their own projects.
- Creating a lively, active and positive atmosphere in the classroom that will enable your learners to have fun with these topics and enjoy their first digital successes.
- Providing feedback on learners' progress and recommendations for the further development of lesson plans.

Your profil

- You have expertise in software development and in-house programming.
- You enjoy introducing children and teens to digital topics and awakening their enthusiasm for these.
- You possess very good pedagogical and communicative skills, and ideally already have some teaching or tutoring experience.
- You also ideally have project experience and a basic knowledge of Code.org or Scratch.

We offer you

- Live and online trainings on the teaching software and lesson plans.
- Continuous pedagogical support and local contact partners.
- An open, friendly and international atmosphere.
- A flexible time schedule with a variable range of hours.
