15mm socket	TS15M
5/8", 16mm socket	TS16M
17mm socket	TS17M
3/4", 19mm socket	TS19M
punch	0300-P

Twist sockets are specifically designed to easily remove damaged, rounded or corroded nuts, wheel lugs, bolts, pipes, pipe nipples or studs.

Simply place the socket so it barely catches the head of the fastener and turn with an air ratchet, hand ratchet, or breaker bar.

1. To remove damaged fastener, place **Twist Socket** on lug so it just catches a portion of head *(Do not place socket on so it completely covers wheel lug. Allow room for* **Twist Socket** *to draw itself onto lug.)*
2. Turn counter-clockwise with a 3/8" impact, breaker bar, ratchet or related tool. (**DO NOT pound** socket onto damaged wheel lug.)
