Cybersecurity Without the Chaos: A Step-by-Step Roadmap

DATE/TIME: **Tuesday, September 23 | 12:30–1:15 PM**

LOCATION: **Roman II** (PROMENADE)

SPEAKER: **James Tarala, SANS Senior Instructor**

**Space is Limited – Advanced Registration Required On-Site*

Balancing the scales between safeguarding information assets and enabling business growth demands not just technical acumen but a strategic mindset. This presentation is tailored to demystify the complexities of cybersecurity risk management, offering actionable insights and practical strategies for CISOs and cybersecurity leaders.

LUNCH & LEARN

RECEPTION

Cyber Connections: Pre-Keynote Networking Reception

DATE/TIME: **Tuesday, September 23 | 5:30–6:30 PM**

LOCATION: **Pompeian Foyer** (PROMENADE)

FEATURED KEYNOTE

Vulnerability Chaining:

An Exploration into Mapping Vulnerabilities for Effective Vulnerability Management

DATE: **Tue, Sept 23**

TIME: **6:30–7:30 PM**

LOCATION: **Pompeian I & II**
(PROMENADE)

SPEAKER: **Nikki Robinson, DSc, PhD**

Vulnerability chaining is the combination of low and medium vulnerabilities to create critical attacks. Due to the massive backlog and sheer volume of vulnerabilities that exist today, it is difficult to remediate every vulnerability across an organization. Come learn about vulnerability chaining identification and remediation to create a holistic and effective vulnerability management program.

ALUMNIGHT WORKSHOP

POWERED BY DFIR:

From Smartphones to Intelligent Phones: How Mobile Devices are Constantly Changing in the Wake of AI

DATE/TIME: **Wednesday, September 24 | 6:45–7:45 PM**

LOCATION: **Milano V (PROMENADE)**

Our smartphones have been utilizing machine learning for years to make the everyday tasks we take for granted easier and more efficient. As we continue to see advancements in photo editing, virtual assistance, language translation, and improved search capabilities, we will be forced to investigate artifacts that often blur the lines when it comes to attribution.

This workshop will break down some of the common ways smartphones are utilizing machine learning and dig into the artifacts to make sense of just how that data was generated. We will touch upon how our current tools have adapted to utilize machine-learning capabilities to expedite certain tasks over time and explore using the machine-learning capabilities native to our devices to assist with forensic analysis.

LUNCH & LEARN

AI Tooling for Security Professionals

DATE/TIME: **Thursday, September 25 | 12:30–1:15 PM**

LOCATION: **Roman II (PROMENADE)**

SPEAKER: **Jon Zeolla, Certified Instructor**

***Space is Limited – Advanced Registration Required On-Site**

How can we use AI tools to get more work done, as security professionals?

Join me as we demonstrate some of the killer productivity features of AI tools, specific to security professionals. We'll use AI tools and MCP servers to:

- Use cloud-native techniques like Policy as Code to act as AI guardrails, ensuring they can only do what we want them to do
- Augment threat modeling by asking and answering questions, identifying potential attack vectors and brainstorming mitigations
- Review code for security vulnerabilities or unwanted design patterns, and suggest alternatives
- Build project plans and then automatically execute on them
- Write code faster than ever, while still following our security requirements
- Triage and prioritize ever-growing lists of tasks
- ...and more

BONUS SESSIONS

SPECIAL EVENT

Microsoft Fireside Chat: **AI: Where is AI Good and Bad** **for Security and Defense?**

DATE/TIME: **Thursday, September 25 | 5:30–6:30 PM**

LOCATION: **Pompeian I & II (PROMENADE)**

SPEAKERS: **Simon Vernon, SANS Certified Instructor**
Kelly Bissell, Microsoft CVP

AI is reshaping security — but is it our greatest ally or most dangerous adversary? Join SANS Instructor Simon Vernon and Microsoft CVP Kelly Bissell for a fireside chat exploring both sides: AI's power to drive fraud detection and defense, and its risks of bias, privacy loss, and adversarial misuse. This open discussion promises candid insights, practical takeaways, and a glimpse into the future of cybersecurity you won't want to miss.

Cybersecurity Insights: An Interactive Fireside Chat with US Department of State's Gharun Lacy

SPEAKER: **Gharun S. Lacy**,
Deputy Assistant
Secretary at Directorate
of Cyber and
Technology Security

As a known hub for the direction of geopolitics, sanctions, and trade, the Department of State is an attractive target for advanced nation-state threat actors motivated more by a desire for information than by greed, and as public-facing representatives of the U.S. overseas, diplomat staff and buildings don't have the benefit of anonymity.

Deputy Assistant Secretary Gharun Lacy will share Diplomatic Security's cybersecurity strategies for navigating the evolving cyber threat landscape and leveraging emerging technologies as a uniquely positioned law enforcement entity in the U.S. government's most global agency.
