Boardroom vs. Breach: Beat the Clock with an AI Wingman

SEC wants breach details in four days. NIS 2 started the 24-hour sprint on 17 Oct 2024. DORA, CMMC, and every regulator with a badge have your board's names on the paperwork.

This talk hands directors the cheat codes: how to slash incident to disclosure time, aim AI at the grunt work, and pepper the C-Suite with questions that end waffle sessions fast. You'll leave knowing exactly where to point budget, how to keep regulators calm, and why AI can save your skin—without turning you into a prompt zombie. Snacks optional; urgency mandatory.
