

# SANS Security Awareness

Manage human risk and change behavior through measurement, training, and simulation

When it comes to security, trust matters. We know this, which is why our products and training have been created by an entire fleet of experts who have been on the front lines battling every cyber threat imaginable over the last 30 years.

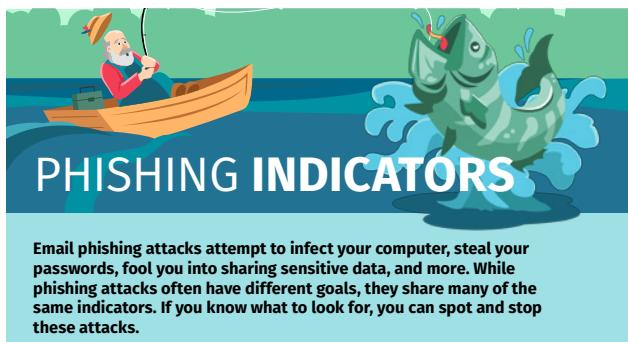

Backed by proven learning principles, our security awareness and role-based training programs combine content from hundreds of the world's best cyber security practitioners, security awareness officers, and learning behavior specialists to reflect real-world cyber- attacks that engage and educate users, empowering them to contribute to cultural change and prevent attacks.

**Thousands of Clients. Millions of Learners. One Mission.**

# Get support, connect with the community, and change human behavior which leads to information security risks

## Actionable Content

Our training content is the most trusted in the world—expertly-created comprehensive training builds a powerful program that embodies organizational needs and learning levels.

### SECURING YOUR HOME WIFI NETWORK

## Robust Resources

Mature your program, improve your learner's awareness with our comprehensive collection of resources, topics and techniques, from subject matter experts.

## Client Success Services

The Client Success Team at SANS offers tailored programs to plan, deploy, and manage the growth of your awareness program, enhancing ROI and meeting the needs of any organization, regardless of size or program maturity.

## World's Largest Community Engagement

Become part of this vendor-neutral global group of dedicated security awareness peers — advance your career and share best practices to grow your program.

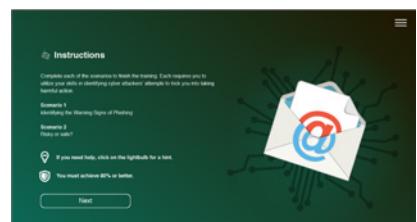

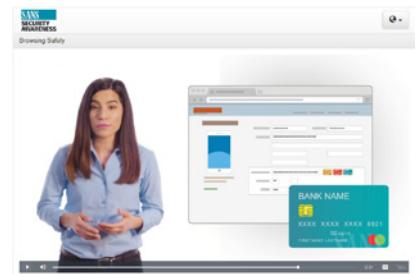

# Explore our product offerings, delivering all of the elements you need to manage human risk

## Cyber Risk Insight Suite™

### Change User Behavior with Training for All

To manage human risk, a holistic approach is needed that considers organizational culture, human behavior and technical controls. Our multilingual assessments highlight the cyber security areas that require the most attention.

- Knowledge Assessment
- Culture Assessment

## EndUser Training

### Easily identify Acute Human Cyber Risk

Short-format, effective and most of all, easy to implement. Besides a full library of computer-based training, we give you the support and resources needed to move beyond compliance and build a truly mature awareness program.

## Phishing Platform

### Reduce Human Risk

Developed by the world's leading phishing experts, our phishing solution is designed to integrate within the other activities of your security awareness program. Our unique tiered-template methodology allows you to train learners at any level.

## Specialized Technical Training

### Get Security Awareness Training Specific to Your Industry

As organizations increase their online footprint, cybersecurity training becomes essential for a wider range of job roles and responsibilities. Whether that means secure code training for developers, a detailed understanding of NERC CIP policy or PCI DSS requirements, proper handling of Industrial Control Systems (ICS) incidents, cyber-secure network and system administration, or specific training for your business and cyber leaders. Training content from SANS Security Awareness has your organization covered.

- Developer
- ICS Engineer
- NERC CIP
- PCI DSS
- Security Essentials for IT Administrators
- Security Essentials for Business Leaders and Managers
- AI Security Essentials for Business Leaders
- Workforce Risk Management Fundamentals for AI

## SANS Security Awareness Flexible Content Delivery

All training modules are SCORM, meaning you can use your organization's SCORM-compliant Learning Management System if you have one or train your employees on the SANS-hosted platform, Litmos. Add our training modules to your custom content to build the security awareness program specific to your organization's needs.

**“SANS Security Awareness is one of the best security awareness programs I have seen in my 20+ years as a technologist.”**

- James Gentile, CIO , Arizona Medical Board

Protect your organization. Keep your learners sharp. Get a custom demo for the most relevant security awareness training program that fits your needs.
