SANS The most trusted source for cybersecurity training, certifications, degrees, and research

SANS SLTT Government Partnership

Aggregate Buy Program | www.sans.org/partnerships/sltt

The SLTT Government partnership program draws on SANS Institute's mission to ensure InfoSec practitioners in critical organizations have the skills needed to protect networks, critical infrastructure, sensitive data, and enhance the cybersecurity readiness and response of state, provincial, local, tribal, and territorial government entities.

Through the SANS SLTT Government Partnership aggregate buy program, you can get the training you need at an affordable cost and improve your organization's security posture against ransomware, phishing, and other cyber-attacks. The secret to this successful program is cost reduction realized by "aggregate" economies of scale.

This program offers both security awareness and technical training courses to qualifying organizations at substantial cost savings, during special purchase windows.

Technical Training Courses

SANS technical courses deliver and validate hands on cybersecurity skills. Learn from real-world experts and gain immediately applicable skills. Students choose from SANS' three available online training formats offering flexible and effective options for information security professionals of all experience levels. Complete SANS training anywhere in the world in your preferred format.

- **In-Person Events:** Intensive, face-to-face training with expert instructors.
- **Live Online:** The classroom experience without having to travel.
- **OnDemand:** Flexible, self-paced online training with four months of access to course content and repeatable lab exercises.

Which Training Method is Best for You?

This comparison chart will help you decide.

	IN-PERSON	ONDEMAND	LIVE ONLINE
Taught by an unparalleled faculty of information security leaders	✓	✓	✓
All required supporting materials, media, and exercises	✓	✓	✓
Flexible, self-paced training platform with four months of access		✓

GIAC
CERTIFICATIONS

Cybersecurity Certifications

GIAC develops and administers premier, professional information security certifications. More than 35 practitioner cybersecurity certifications align with SANS training and ensure mastery in critical, specialized InfoSec domains. GIAC Certifications provide the highest and most rigorous assurance of cybersecurity knowledge and skill available to industry, government, and military clients across the world.

A GIAC Certification ensures master of real-world knowledge and skills.

- **Tests on pragmatics rather than theory**
- **Certifications are valid for four years**
- **A renewal process that keeps you up to date on the latest industry trends**
- **Advanced certification options: Publishing a Gold Paper through GIAC and/or obtaining the GIAC Security Expert Certification**

Top Four Reasons to Get GIAC Certified:

1. **Promotes hands-on technical skills and improves knowledge retention**
2. **Provides credible proof of technical know-how**
3. **Creates opportunity for promotion and respect from peers**
4. **Demonstrates technical qualifications to hiring managers for career growth**

SANS
CYBER RANGES

Self-Paced, Hands-On Cybersecurity Training

What are SANS Self-Paced Cyber Ranges?

SANS self-paced ranges are a hands-on training solution with 24/7 access, covering a wide range of cybersecurity topics designed with challenges and hints that support continuous knowledge and skill development.

It allows participants to advance their hands-on technical skills at their own pace, essential for mastering the latest defense techniques and technologies in the industry.

Participants may choose from one of two solutions: **SANS Skills Quest by NetWars-Core Edition** or **DFIR NetWars Continuous** to experiment with real-world scenarios and develop hands-on skills.

Anytime, Anywhere

- **Flexible Access—**Train and practice online anytime and anywhere. Crucial for individuals who need to balance training with other commitments, and reduce travel costs, ensuring that individuals can delve into the material at a comfortable speed and maximize retention.
- **Proficiency Tool—**Organizations can assess the proficiency of their teams, identify areas for improvement, and ensure that employees are up to date with the evolving field of information security challenges. Use our personalized scorecard to create a customized training program for a team or individual.
- **Extended Engagement—**With a comprehensive content selection, the subscription allows users to explore the intricacies of a topic thoroughly, particularly valuable for practitioners who aim to master complex topics in information security.

SANS Skills Quest by NetWars - Core Edition | Topics

Run Time: Six months

Help computer scientists and cryptologists of the past solve mysteries. They will test our defensive, offensive, forensic, and threat intelligence aptitude.

- Bash and PowerShell skills
- Scanning and enumeration
- Web application security
- Cyber threat intelligence
- Malware analysis
- Cryptographic security and exploitation
- Exploitation and
- shellcoding, and more

DFIR NetWars Continuous | Topics

Run Time: Four months

Take on the role of cyber investigator and uncover key clues from the evidence. Parse through challenges and reveal key facts within files, processes and programs.

- Windows/Endpoint incident response Windows forensics
- Mac forensics
- Network forensics
- Cyber threat intelligence
- Smartphone/mobile forensics
- Malware analysis, and more

Pricing

$495 per user for either version.

Workforce Security and Risk Training

Workforce Security and Risk Training

Security Awareness training is a critical component of a comprehensive security program. Compliance and behavior change becomes difficult for non-technical individuals without the proper content. SANS Workforce Security and Risk Training delivers market-leading security awareness, risk management, and compliance training to drive behavior change across the workforce. This Partnership Program includes several key products to train your workforce

- **EndUser Security Awareness—**Comprehensive security awareness training for all users covering the most pressing risk and compliance topics to address employee security behaviors
- **Phishing—**Test your employees through phishing simulations consistent with real-world threats and attacks
- **Business Leaders and Managers—**Leadership-focused cybersecurity training to secure business processes
- **Developer—**Train your developers in secure coding techniques and how to recognize current threat vectors in applications
- **Industrial Control Systems—**Rigorous computer-based training for those interacting with or operating ICS/SCADA Systems
- **IT Administrator—**Ensure staff with privileged access understand security concepts to protect your organization
- **Role-Based PCI-DSS—**Equip staff to understand and safeguard cardholder data per the 2024 PCI 4 standards
- **Workforce Risk Mgt for AI—**Equip your staff with the essential knowledge and skills to navigate the complex AI landscape
- **NERC/CIP—**Relevant training addresses NERC CIP Reliability standards for the utility industry
