Final Consultation Reminder: Change in Reconstitution Schedule for the Morningstar LSTA US Leveraged Loan 100 Index and other indexes in the Global & Tradeable Leveraged Loan Index series

## **Background**

Certain indexes in the Global & Tradeable Leveraged Loan series, including the Morningstar LSTA US Leveraged Loan 100 Index, have either a semiannual reconstitution, which takes place on the last business day of June and December, or a quarterly reconstitution, which takes place on the last business day of March, June, September, and December.

Due to this schedule, reconstitutions and rebalances, which occur on Fridays, can be separated by a few days, resulting in increased operational burden for clients to manage the reconstitution and rebalance processes. Additionally, the December reconstitution often falls near the New Year's holiday, which can create challenges surrounding operational processes and trading due to limited market activity and/or market closures.

## **Proposed Change in Reconstitution Schedule**

Morningstar Indexes is proposing to move up the semiannual and quarterly reconstitutions to the second Friday of the applicable month across leveraged loan indexes that are subject to semiannual or quarterly reconstitutions, effective December 13, 2024. This change allows the reconstitution to align with the timing of Friday rebalancing and avoid key reconstituted index membership changes occurring immediately before a holiday.

Please see Exhibit 1 with additional details for the proposed revised reconstitution dates.
