MicroStrategy   **Google** Cloud

Turn insights into action with MicroStrategy and Google Cloud

Move from data to decisions faster with AI-powered analytics from MicroStrategy ONE on Google Cloud.

Spend less time finding data and more time making a true business impact. MicroStrategy ONE, optimized for Google Cloud, delivers AI-powered pervasive analytics at scale. An all-in-one AI + BI platform, MicroStrategy ONE, combined with scalable infrastructure from Google Cloud, extends data accessibility across your organization for better decision-making and advanced productivity. Make analyzing, building, and collaborating easier than ever before with intuitive interfaces, conversational AI, and enhanced governance and security.

Key benefits

Drive pervasive adoption of AI-powered analytics
Serve a wider range of analytic needs while eliminating tech debt. MicroStrategy infuses AI-powered analytics into your users' daily workflows, while the Semantic Graph creates a shared understanding of data and business rules, all built on Google Cloud infrastructure for optimal performance and reliability.

Accelerate digital transformation with scalable, reliable analytics
Easily handle growing data volumes and user demands with containerized and microservices architecture from MicroStrategy on Google Cloud. Deliver fast response times and high availability for even the most complex queries against massive datasets.

Enhance analytics security and governance
Safeguard sensitive information, prioritize data security, and ensure required compliance with comprehensive security features from MicroStrategy ONE and Google Cloud. Protect your data at rest and in transit with industry-standard encryption and fine-grained permissions.

The MicroStrategy ONE platform has been recognized as a Market Leader in Enterprise BI and Analytics Platforms for the second year running by BARC, one of Europe's leading analyst firms for business software that specializes in BI and analytics space.
