

Few investments deliver a **551% ROI**.

**MOSAIC** does.

After implementing Mosaic, Strategy's universal semantic layer, **global retail, finance, and tech leaders** reported an average of

**551% return on investment**

with a **2-month** payback period

The impact starts with smarter resource allocation:

**67%**

of Mosaic customers report reduced dependency on IT.

//

*Once we implemented Strategy's semantic layer, users didn't need a technical background to pull reports—it's all drag-and-drop."*

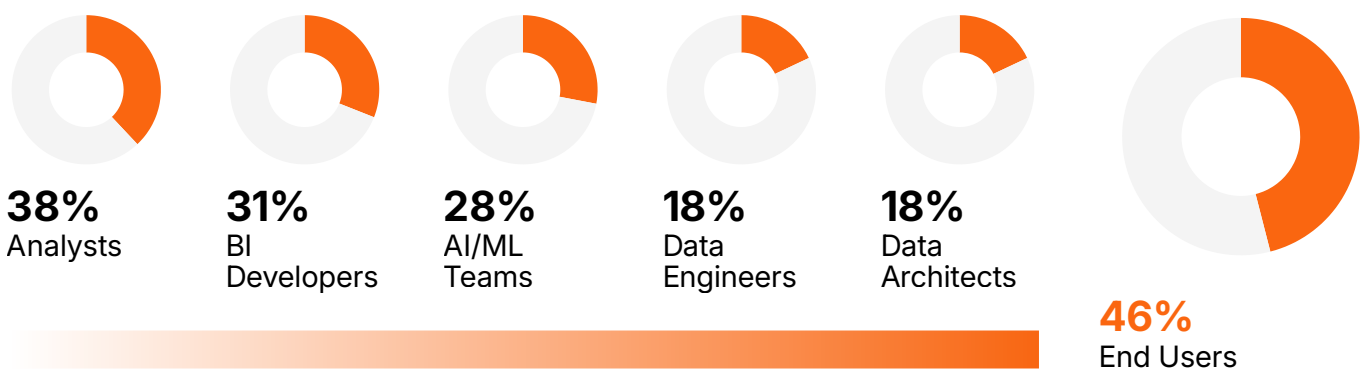

— Senior Manager of Reporting & Insights at a Fortune 500 retail network

**Every team reported time savings, from analysts to end users:**

**28%**

Faster deployment of AI/ML and agentic workflows

Time saved by teams thanks to **Strategy Mosaic**:

Average annual labor cost savings: **\$3.5M**

//

*We've been able to get back over \$80,000,000 annually because our financial service representatives and branch/store managers have three to four more hours to book loans instead of manually consolidating data. Strategy's semantic layer has not only led to cost savings, but increases in revenue—and profit—for our organization."*

— Director of Business Intelligence, financial services firm

The benefits of a semantic layer go deeper than time savings. **After deploying Mosaic:**

Customers cut down **downstream compute/capacity usage** by

**20%**

Their **confidence in metric consistency** and report accuracy increased by

**80%**

**Additional annual cost savings:**

**\$138K**

in tool consolidation

**\$375.5K**

from reduced infrastructure costs

Altogether, customers realized **\$280K per month** in value → payback period of just over **2 months**.
