

FOR IMMEDIATE RELEASE

Gemtech® Releases New ABYSS™ 5.56 Suppressor

SPRINGFIELD, MA., (1/16/2023) - Gemtech®, a leader in cutting-edge innovation and visionary designs within the suppressor industry, is proud to introduce the ABYSS™ 5.56 suppressor.

The durability of the all-new Abyss sets the standard within the heavy use suppressor category. Built on five of Gemtech's patent-pending technologies, its design allows rounds to pass through while gasses expand into the baffle spaces, lowering pressure, minimizing muzzle flash, and significantly reducing decibels. The Abyss also lessens back pressure by routing gasses forward, away from the shooter for increased comfort and reliability.

Constructed from stainless steel and titanium components, this suppressor is designed with greater wall thickness, durability, and can easily be mounted to barrels through direct thread standards or through Gemtech's proprietary flash hider, the ETM™ (Elite Taper Mount). The Abyss offers full-size suppression with compact, lightweight convenience and is fully rated for both short barrels and full-auto operation. Let the Abyss absorb all distractions so you can focus on advanced precision.

Gemtech® is proud to introduce the ABYSS™ 5.56 Suppressor. **Leave Nothing to Chance.**

MSRP: \$849.00
