

# Eucalyptus

## Sourcing and Impact

In Australia—the ancestral home of the plant—we source **three** varieties there: *Eucalyptus kochii*, *lox liss*, and *polybractea*

In Eswatini's mountainous Hhohho region, *Eucalyptus radiata* forests are managed with a **focus on fire prevention and forest health** to promote longevity.

### Mobile distillation units

are used at harvest sites in Australia to **reduce fuel use**

In Rwanda, *Eucalyptus globulus* leaves are **harvested by hand** and sometimes distilled in community-based facilities, supporting local involvement

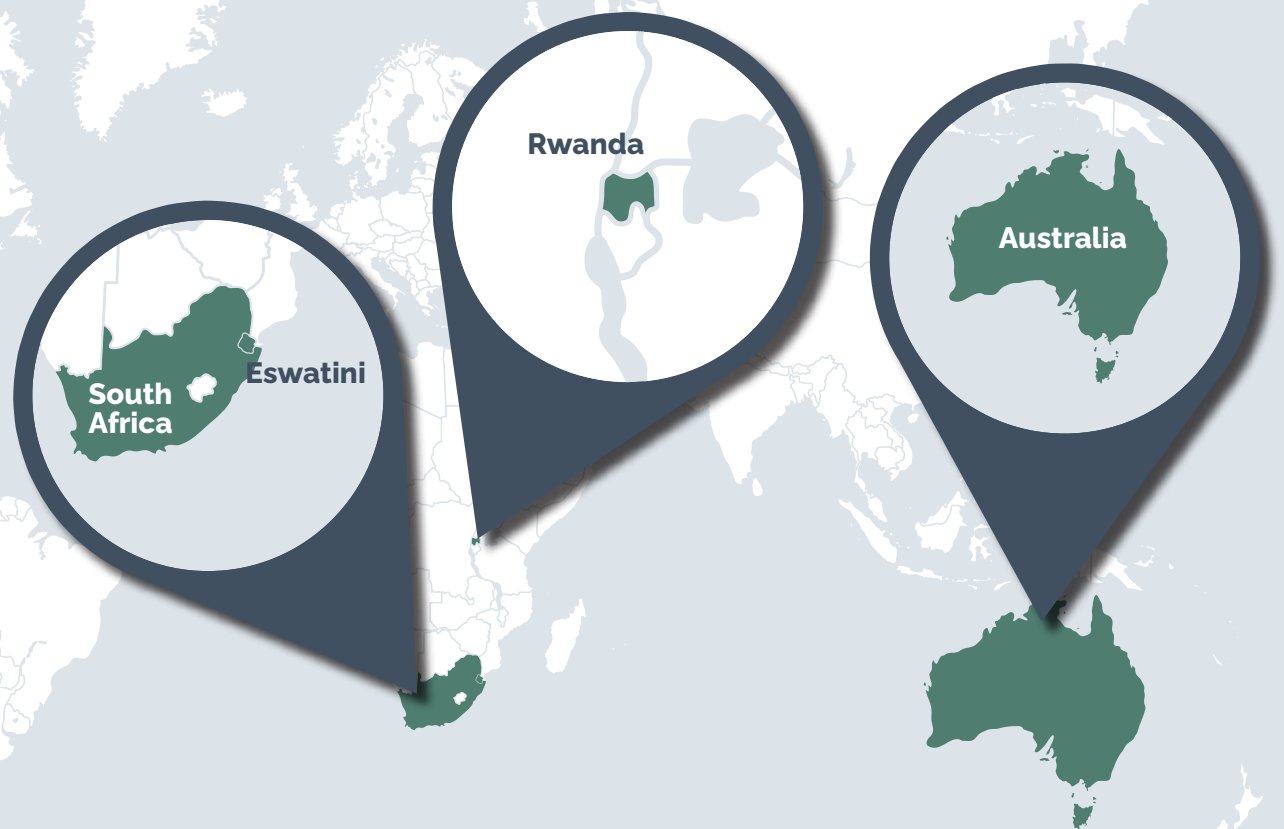

Eucalyptus trees recoppice, meaning they regrow by themselves from the root system—allowing for **regenerative harvests every 2–3 years**

## Sourced From:

Eucalyptus in Rwanda

In Australia, some **distilled biomass is reused** for biochar production for plant growth while

**wind turbines contribute electricity**

at one farm and distillery

During COVID-19, dōTERRA supported our sourcing partner in South Africa to distribute **emergency food relief** to over 6,700 community members

In Rwanda, eucalyptus production has led to the construction of

**11 Early Childhood Development classrooms**

In South Africa, eucalyptus cultivation and training have become a unifying force between historically divided communities,

**fostering collaboration and mutual respect**

In Eswatini, eucalyptus contributes to **orphan care, education, and infrastructure**
