Policies and procedures concerning the choice of bank depositories, custodians, and counter-parties:

tastyfx holds its operating and customer funds in accounts at sizable, highly reputable banks. Before selecting a new bank depository, a thorough review of the bank’s credit rating and financial information is completed. tastyfx utilizes an evaluation process to determine the financial condition of the bank. For any bank where tastyfx holds customer funds, thorough reviews are done at least annually to ensure its continued credit worthiness.

05

ECP COUNTERPARTY MATERIAL RISKS

When an ECP’s total deposited funds are insufficient to cover any trading losses incurred, this signifies a credit risk. An ECP’s total deposited funds may be insufficient to cover trading losses if there is a sudden and significant movement in the market relating to an instrument in which an ECP customer has an open position. tastyfx mitigates the risks associated with ECP trading activities by requiring ECPs to deposit sufficient margin. tastyfx does not allow ECPs to enter into trades if the ECP has not deposited a sufficient amount of margin. In addition, the tastyfx trading platform also manages this risk by automatically closing out of any ECP’s open positions when there is insufficient margin on deposit.

tastyfx hedges its customer transactions through an affiliate ECP. This affiliate firm also hedges customer transactions with other affiliates through the world. If there is a sudden and significant movement in the market relating to an instrument for which our customers or any of our affiliates’ customers has an open position, then the IG Group could incur significant losses.

The IG Group mitigates the risks associated with customer trading activities by requiring all IG Group customers to deposit sufficient margin, and hedging its exposure in the underlying market. In addition, the electronic trading platform manages this risk by automatically closing out of any customers’ open positions when there is insufficient margin on deposit.
