

2024 Prescription Drug List

TRADITIONAL 5-TIER FOR
QUALIFIED HEALTH PLANS

St Luke's[™]
+ Health Plan

Last updated April 2024

Welcome!

St. Luke's Health Plan Inc. Pharmacy Benefit Manager (St. Luke's PBM) administers pharmacy benefits for the St. Luke's Health Plan to ensure you have access to safe, effective, and affordable medications.

Prescription Drug List (PDL)

This document is often referred to as a Prescription Drug List (PDL) or drug formulary and contains a list of the most commonly prescribed outpatient medications covered by your plan. The PDL is typically updated on a monthly basis. The date of the most recent update can be found in the lower right hand corner of the cover page of the document. We do not routinely notify members or providers with the PDL is updated. However, we will notify you if you are negatively impacted by a formulary change, for example, if a medication you are currently taking is removed from the formulary or is moved to a different Tier. This formulary includes both brand name and generic medications approved by the Food and Drug Administration (FDA). Brand name medications are capitalized and generic medications are in lowercase. Not all medications approved by the FDA are covered under your Health Plan.

Please make sure that you are using the PDL on the website to ensure you are using the most up to date version. The inclusion of a drug on this list does not imply coverage under all plans. Coverage of listed products will be subject to limitations of the prescription drug benefit plan design. Members should consult their prescription drug benefit plan or contact a customer service representative to determine specific coverage at 833-975-1281. Where a difference exists between this document and the benefit plan documents, the benefit plan documents rule.

How to Use the PDL

Members are encouraged to review the PDL to see if currently prescribed medications are covered. Providers and pharmacists are encouraged to review the PDL and utilize it when prescribing for our members. Products on the PDL may not include all strengths or dosage forms associated with the brand name product.

This document is searchable. On your keyboard, press Ctrl+F (Command+F for Mac), type in the medication you are looking for into the search box, and the search function will locate the medication in the document.

Reading the PDL

Within this document you will find a list of FDA approved medications covered by the Plan, which tier the medication belongs to, and any specific requirements as required by The Plan. Please see the medication tier explanations in the table below, medications with a lower tier will represent the lowest out-of-pocket costs for the member.

Tier	Description
ACA	Affordable Care Act Medications, offered at no cost to members without meeting the deductible
1	Preferred Generic Medications, offered at a \$0 copay on many of our plans
2	Non-preferred Generic Medications
3	Preferred Brand Name Medications
4	Non-preferred Brand Name Medications
5	Specialty Medications. These medications are limited to a 30-day supply per fill and most specialty medications are required to be filled through St. Luke's Specialty Pharmacy
**Please refer to the plan documents for copay and coinsurance information	

ACA Preventive Drugs

The Patient Protection and Affordable Care Act of 2010 (ACA) designates certain categories of medications as “preventive” and requires these categories contain options that are covered at no cost to you. The categories include specific preventive medications for children, women, and adults that you will not have to pay a copay or coinsurance for, even if you have not met your deductible. Preventive categories are listed below and are designated as “ACA” on the PDL.

- Bowel Prep Agents
- Folic Acid for women of childbearing age
- Iron Supplements for children between 6-12 months
- Contraceptives
- Oral Fluoride Supplements in certain locations
- Preventive Breast Cancer Medications for women aged 35 years or older with prior breast cancer diagnosis
- Tobacco cessation products
- Certain Vaccines (Flu, Shingles)
- Statins for qualifying patients
- Select antiretrovirals for preventive use

How are Medications Assessed for Plan Coverage

The PDL reflects the current judgement of the Pharmacy and Therapeutics (P&T) Committee, which consists of physicians, pharmacists, and medical experts. The committee reviews medications in each therapeutic class for safety, effectiveness, and cost of treatment. Then agents are selected in each category for inclusion/exclusion on the formulary. The maintenance of the formulary is a dynamic process where new medications and information concerning existing medications are continually reviewed by the P&T Committee.

Generic Medications

The St. Luke's PBM prioritizes the use of generic medications whenever possible. The term generic is usually used to describe a less-expensive product that is a safe and effective alternative to a brand-name product. A generic drug is identical, or bioequivalent, to a brand-name drug. Although generic drugs are chemically identical to their branded counterparts, they are typically sold at substantial discounts from the brand-name drug. The Food and Drug Administration (FDA) works with pharmaceutical companies to ensure drugs (both brand and generic) meet specific requirements for quality, strength, purity, and potency.

Generic Drug Substitution Requirement

If you purchase a brand-name drug when a generic substitution is required, you must pay the difference between the Allowed Amount for the Generic Drug and the Allowed Amount for the brand-name drug, plus your Copay/ Coinsurance or Deductible. Some Prescription Medications are excluded from this requirement.

Coverage Requests

If you would like to request a preauthorization or formulary exception, please have your provider call the St. Luke's PBM at **833-975-1281** to obtain the appropriate form. For formulary exceptions due to medical necessity, the request should include medical records that describe the condition being treated, other treatments previously tried, and reason for not using formulary alternatives.

Pharmacy Network

Our pharmacy network is broad, and you can find a pharmacy near you with our pharmacy lookup tool on your pharmacy member portal. Prescriptions filled at a non-network pharmacy may be covered at a higher cost to you.

If your prescription is filled at an in-network pharmacy, you will pay less.

St. Luke's Health Plan offers a maintenance Pharmacy Benefit, allowing you to obtain up to a 100-day supply of certain medications through St. Luke's Outpatient Pharmacies or St. Luke's Mail Order Pharmacy. Some exceptions may apply.

Specialty medications are high-cost medications used to treat rare or complicated conditions such as cancer, rheumatoid arthritis, and multiple sclerosis, to name a few. Specialty medications are listed as tier 5. Most specialty medications are required to be filled through St. Luke's Specialty Pharmacy. The St. Luke's Specialty Pharmacy offers best in class care and support. To learn more about the preferred specialty pharmacy call **208-205-7779**.

Plan ID Card

Your Plan ID card works for both your doctor's visits and filling medications at the pharmacy. To get the most from your benefits, provide your pharmacy ID card to the pharmacy when dropping off or calling in your prescription.

Your ID card will communicate with the SLHS PBM database to review for drug interactions, potential allergies, improper doses, and more, all while ensuring you get the best price possible.

Term and Acronym Dictionary

Medication Tier:

Tiers are a way for an insurance provider to determine medication costs. The lowest tier (tier 1) will have the least expensive copay. The highest tier (tier 5) will have the most expensive copay.

AL- Age Limit:

This prescription drug may only be covered if you meet the minimum or maximum age limit.

PA - Preauthorization:

Selected high-risk or high-cost medications may require preauthorization to be eligible for coverage under the member's prescription drug benefit. For a member to receive coverage for a medication requiring preauthorization, the member's physician should contact the customer service center at **833-975-1281** to obtain a preauthorization form.

PREV - High Deductible Health Plan Preventive Drug:

Recognizing that preventive services can lead to improved health by identifying and treating illnesses early, St. Luke's Health Plan does not require High Deductible Health Plan (HDHP) participants meet their deductible prior to covering drugs in some drug categories. If you are enrolled in a HDHP you will not have to meet your deductible before the Plan contributes to the cost of your prescription for medications listed in the categories below. Refer to the Prescription Drug List for a list of medications in the following categories:

- Asthma and COPD
- Blood Thinners
- Brand Contraceptives
- Cardiovascular
- Cholesterol
- Diabetes (Insulin, Non-Insulin, and Test Strips)
- Osteoporosis

QL - Quantity Limit:

Some medications are subject to limits on the amount of medication per prescription in line with recommendations from the manufacturer. If your prescriber deems it Medically Necessary to have a higher quantity limit, a formulary exception request may be submitted.

ST - Step Therapy:

Certain medications require you to have already tried an alternative medication preferred by St. Luke's Health Plan. This process is called "step therapy". The alternative medication is generally a more cost-effective therapy that does not compromise clinical quality. If your Provider feels that the alternative medication does not meet your needs, St. Luke's Health Plan may cover the medication without step therapy if St. Luke's Health Plan determines it is Medically Necessary. Medication samples may not be applicable to satisfying the step therapy requirement.
