FOUR CARD POKER

Four Card Poker features heads up play against the dealer and an optional bonus bet.

RANKING OF HANDS

Four-of-a-kind, straight flush, three-of-a-kind, flush, straight, two pair, pair and high card.

GETTING STARTED

Make an ante bet to play against the dealer. Make an *Aces UP*[®] bet to play against the bonus payable. You will then receive five cards to make your best four-card poker hand. Four-card straights are straights, four-card flushes are flushes, etc. The dealer receives six cards and turns his top card face-up.

DECISION TIME

After looking at your hand, you have a choice: fold or bet 1 x to 3x your ante.

WINNING AND LOSING

The dealer then reveals his cards and announces his four-card poker hand. If your hand beats or ties the dealer's, your ante and play bets win even money. If your hand loses to the dealer's, your ante and play bets lose.

AUTOMATIC BONUSES

The top three hands in the game (four-of-a-kind, straight flush and three-of-a-kind) receive automatic bonuses, paid on the ante. You receive these bonuses even if you lose to the dealer. See layout for odds.

ACES UP[®]

The *Aces UP*[®] side bet pays if your hand is a pair of aces or better. The *Aces UP*[®] bonus always pays, even if the dealer has a better hand. The higher your hand, the more you win. See layout for odds.

PROGRESSIVE PAYOUTS

The progressive bet qualifies you for the payouts from the incrementing jackpot. See table for odds.
