

## MODULE 3: CURB APPEAL

Now that we have the house, let's add some curb appeal! What other features make a house unique?

First up, let's build some stairs.

1. Select the Rectangle tool.
2. Draw a horizontal rectangle on the bottom edge of the house.
3. Select the Line tool, and divide the rectangle in half by drawing a line in the midpoint.

4. Select the Push/Pull tool.
5. Adjust the depth of the rectangles to create the front steps.

## Adding Doors and Windows

1. Select the Rectangle tool.
2. Make a door.
3. Add some windows.
4. Use the Offset tool to give your door and windows to give the look of door and window frames.
5. Use the Push/Pull tool to give your door and windows additional depth.

## MATERIALS TOOL

Time to decorate! You can use the Materials tool to make any face appear to have a different material, such as concrete or glass.

1. Select the Materials tool, located on the right toolbar.
2. A window will open, showing a selection of colours. To access the rest of the options, click the magnifying glass to the right of the house (see below).

3. Choose a material.
4. Click a face to change it. If you select glass, you may be able to check on Rachel, who is now living in your house.
5. Decorate to your heart's delight.
