

Berlitz®

Speak with confidence

Open your world with the language skills,
cultural smarts, and self-assurance that Berlitz offers.

The Berlitz Experience

Our methodology, refined over 150 years,
ensures effective and natural language learning.

[Here is what sets us apart:](#)

Monolingual Approach

We use the target language only. Instead of learning how to translate, you are here to use the language and learn to speak with confidence.

Natural Learning

Just like you learned your first language, you'll pick up the new one through practical situations, conversations, and lots of repetition with grammar coming naturally as you go.

Proven Effectiveness

Each lesson follows the same pattern: presentation, practice, and performance. By the end of the lesson — in the performance segment— you'll be able to demonstrate what you've learned.

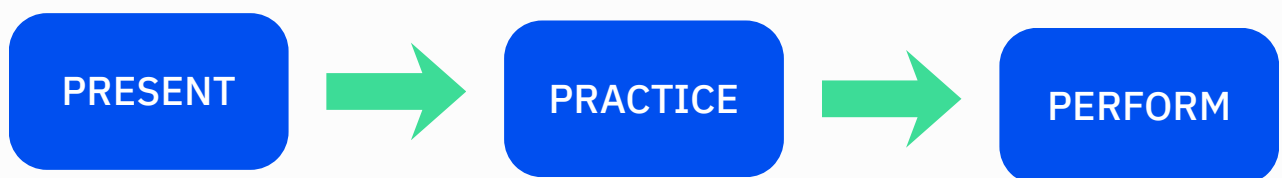

Global Perspective

Our instructors come from different parts of the world and provide an immersive, culturally rich experience that will help students become more open and receptive toward other cultures.

The Berlitz Method

Each lesson follows the same structure
to help you really soak in your new language.

Your instructor starts
with a new topic
and fresh material.

You dive into both guided
and free-style practice.

You show off
what you've learned.
