The most rapid way to learn a language

Private language classes feature one-on-one lessons with a Berlitz-certified native-fluent instructor. Each lesson incorporates the proven [Berlitz Method](#) into the curriculum, immersing students in the target language to produce the fastest results.

An individual course allows you to [dictate the topics](#) covered in each lesson. This level of customization ensures that you learn the specific language skills you need based on your goals. This could mean a greater emphasis on business conversation skills or focusing on travel-related language skills.

[Cultural tips](#) are part of the package, too. These nuggets about traditions, customs, or even body language give you the tools necessary to feel confident when talking to native speakers wherever you are.

In many ways, the built-in cultural training is as important as the language lessons so you can learn to use the language effortlessly in context.

This goes for all Berlitz Courses.

How learning a language with Berlitz works?

Check out our 7-step guide on the [Berlitz Learning Cycle](#) and get to know what to expect on your journey to proficiency!

We tailor the content to suit your needs.

Total Immersion

As if you were studying abroad

For even more intensive practice, there is a [daily double class](#) where two instructors team up to engage you in natural conversation. You'll even have [lunch](#) with one of them in a nearby restaurant, practicing the language in a chill, social setting. This [fully immersive environment](#) keeps you motivated, and we keep your energy up with refreshments throughout the day.

Immersion Light

A less intensive course can also build up the confidence you need. Practice real-life situations every day with a qualified instructor.
