The Berlitz Method

Effective

Our goal is to build your confidence in using your target language.

Every lesson follows the same pattern, ensuring that language skills get reinforced and become ingrained through active use - regardless of learning style.

1

PRESENT

Each class begins by introducing the current topic, including new vocabulary and expressions.

2

PRACTICE

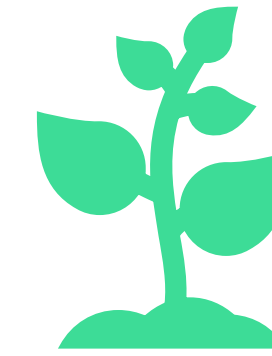

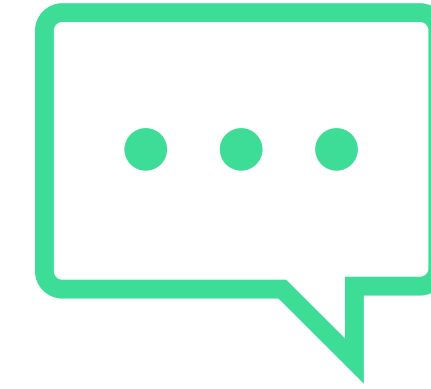

Thanks to the high ratio of speaking and interactive activities, you will absorb the new knowledge during the lesson itself.

3

PERFORM

By the end of the lesson, you will be able to use what you've learned independently, without needing teacher assistance.

The Berlitz Experience

Monolingual

In our classes, we use only the target language.

Instead of learning how to translate, you will learn how to effectively use the language in context.

Natural

Speaking skills are the primary focus. You will acquire the target language in the same way you learned your native tongue:

- Frequent repetition.
- Practicing everyday and common business scenarios.
- Learning grammar through usage while speaking.

Extra Feature: Cultural Competence

You will gain valuable insights into the cultural nuances of the language you're learning.

Our instructors

Are native or bilingual speakers.

In class, they use the target language only.

Before beginning their teaching roles, all instructors participate in our comprehensive training program, where they:

- are introduced to both the conceptual and practical elements of the Berlitz Method,
- familiarize themselves with the course material,
- and learn effective classroom management techniques.
