GEL-KAYANO™ 31 RRP \$280

NEW

Consumer Profile

A stability trainer designed to provide adaptive, holistic stability and high cushioning for distance training and easy runs. Ideally suited for runners who tend to heel strike, overstride, land heavily and have a low cadence.

Key Features

UPPER

- Technical engineered mesh upper with improved breathability and fit.
- Rib knit collar and heel pull tab and asymmetrical upper mesh panels.

MIDSOLE

- The 4D GUIDANCE SYSTEM™ provides a holistic approach to stability via the shoe's wider basenets, increased heel bevel, flared midsole geometry, lateral guidance line and softer medial foam (HC43).
- Full length FF BLAST™ PLUS ECO (HC48) midsole foam.
- PureGEL™ technology in the rearfoot (HC15).
- ORTHOLITE™ X-55 sockliner.

OUTSOLE

- Full ground contact outsole for a smoother, more efficient ride.
- HYBRID ASICSGRIP™ outsole with ASICS AHAR™ Low Density rubber at the toe and AHARPLUS™ at the heel.

Men's Lateral View

Women's Medial View

Men's Outsole

GT-4000™ 4 RRP \$260

NEW

Consumer Profile

A maximum support trainer for those with flat or hypermobile feet that are looking for high levels of support.

This runner appreciates rearfoot and midfoot support.

Key Features

UPPER

- Engineered mesh material with interior backing to reinforce high wear areas.
- Bunion window mesh panel on the medial forefoot of the upper focusing on minimising irritation and overlays.
- Six eyelet holes for better lockdown.
- Asymmetrical tongue wing to provide premium in step feel.

MIDSOLE

- Full length FLYTEFOAM™ BLAST (HC50) offers great comfort and cushioning.
- PureGEL™ Technology (HC15) in the rearfoot for impact absorption.
- LITETRUSST™ technology (HC58) offers medial support functional for the consumer's needs.
- ORTHOLITE™ HYBRID X-30 sockliner.

OUTSOLE

- Full ground contact outsole geometry for a smoother, more efficient ride.
- AHARPLUS™ outsole is placed in critical areas of the outsole for exceptional durability.

GT-2000™ 13 RRP \$240

NEW

Consumer Profile

A lightweight stability trainer that suits lighter runners with a high velocity foot strike, or those who impact the midsole with a greater load, who transition with prolonged midstance timing, or lack of plyometric bound looking for a responsive, stable ride.

Key Features

UPPER

- Lean Back Achilles Construction that helps reduce irritation against the back of the foot for improved comfort.
- Monofilament mesh upper material.

MIDSOLE

- Full-length FF BLAST™PLUS (HC48) cushioning for an energised toe-off with cloud-like softness underfoot.
- PureGEL™ technology (HC15) in the rearfoot for impact absorption.
- 3D Guidance System: wide base at the heel and forefoot for greater ground contact; lateral guidance line for stability; midsole geometry designed for more deformation on the lateral side; Foot sits in a deep and cradled position in the midsole for secure hold.
- ORTHOLITE™ X-30 sockliner.

OUTSOLE

- Full ground contact outsole for a smoother, more efficient ride.
- AHAR™ outsole rubber with AHARPLUS™ in high wear areas.

Women's Outsole

GT-1000™ 13 RRP \$200

NEW

Consumer Profile

A stability trainer for runners who tends to heel strike, overstride, land heavily and have a low cadence. Versatile for walking and gym.

Key Features

UPPER

- Technical engineered mesh upper with lean back heel design.

MIDSOLE

- FLYTEFOAM™ cushion (HC48) in the midsole is lightweight and provides soft cushioning with +2mm thickness vs previous version.
- PureGEL™ Technology (HC15) in the rearfoot for impact absorption.
- 3D Guidance System: wide base at the heel and forefoot for greater ground contact; lateral guidance line for stability; midsole geometry designed for more deformation on the lateral side; Foot sits in a deep and cradled position in the midsole for secure hold.
- ORTHOLITE™ HYBRID MAXLITE sockliner.

OUTSOLE

- Full ground contact outsole for a smoother, more efficient ride.
- AHAR™ Low density rubber outsole with AHARPLUS™ in high wear areas.

GEL-NIMBUS™ 26 RRP \$260

Consumer Profile

Highly cushioned, stable neutral daily trainer for easy runs and recovery runs for all runners, novice or experienced, who tend to heel strike.

Key Features

UPPER

- An improved knit upper for added breathability.
- Stretch / knit tongue and collar construction delivers an easier step-in and a more adaptive fit.

MIDSOLE

- One-piece FF BLAST™ PLUS ECO midsole foam (HC43).
- Encapsulated PureGEL™ (HC15) positioned at the rearfoot for improved softness and shock attenuation as well as underfoot feel.
- Wider basenet adding to the stable nature of the platform.
- ORTHOLITE™ X-55 removable sockliner.

OUTSOLE

- Hybrid ASICSGRIP™ rubber with AHARPLUS™ heel plug for added traction and durability.

Men's Outsole

GLIDERIDE MAX RRP \$250

NEW

Consumer Profile

A maximum cushioned trainer for long, recovery runs, providing energy savings and smooth transition. Ideal for those seeking forefoot stiffness.

Key Features

UPPER

- Engineered mesh upper provides a softer feel against the foot while increasing breathability.

MIDSOLE

- FF BLAST™ MAX (HC43) top layer / FF BLAST™ PLUS ECO (HC43).
- Hardened Press EVA plate between the two layers of foam (HC92) allowing a smooth and efficient heel to toe transition.
- GUIDESOLE technology is a combination of increased toe spring, stiffer forefoot through a hardened EVA plate at the forefoot and guidance line. This is designed to create a smoother transition from midfoot to forefoot, decreasing the load placed on the lower limbs.
- ORTHOLITE™ X-55 sockliner.

OUTSOLE

- Full ground contact outsole geometry, coupled with a wide basenet, delivers a stable, smooth and efficient ride.
- Combination of HYBRID ASICSGRIP™ outsole rubber and AHAR™ rubber with AHARPLUS™ at the heel.

METAFUJI TRAIL RRP \$310

NEW

Consumer Profile

Maximum cushioned trail shoe for the experienced trail runner looking to go fast. This shoe provides a combination of protection, lightweight and durability delivering high-performance off-road capabilities for long distances on runnable terrain.

Key Features

UPPER

- TPE material upper provides lightweight, soft, stretching fit.
- Midfoot is reinforced by PEBAX Yarn material for increased lockdown and durability.
- Lace in Lace system.
- Guesseted tongue.

MIDSOLE

- FF BLAST™ TURBO (HC50) and FF BLAST™ PLUS (HC43) foams combine for extra cushioning, protection and recovery.
- Full-length trail specific Carbon Fibre plate helps stabilise the foam. The forked plate will allow for more breaking control and localised flexibility downhill while maintaining propulsion uphill and on the flat. The wavy structure on the lateral side allows for more foam compression on the lateral forefoot where most athletes come into contact with the ground when going downhill.

OUTSOLE

- ASICSGRIP™ outsole technology with 4.5mm lugs.
- Wide basenet for more downhill stability .

KIDS

Protection and Function

- GEL™ cushioning technology.
- Cm/EVA midsole (not cupped/hollow).
- Removable sockliner.

- CUB MATCH™ sockliner: Available in all PS/TS models, this sockliner helps kids recognise the left shoe from the right shoe.

- ASICS SIZE CHECKER™: The toe print on the removable sockliner helps kids and parents identify when they are outgrowing their shoes. This feature is available in key GS/PS/TS styles.

Durability

- Medial wrap-up outsole onto midsole.

- Stitched rubber toe cap.

- Solid Rubber outsole.

Specific Last

ASICS kid's shoes are designed to support the natural growth and development of children's feet. The kid's specific last creates a more spacious fit through the forefoot with better support in the midfoot and rearfoot, allowing for a smooth transition and relevance when you move from TS – PS – GS.

1. Special Grading – Proportional Fit

KINEMATIC COMFORT: Offer proportional fit depending on children's growth stage. (PS last proportionally offers more roomy fitting than GS last).

2. Oblique Shape With Roomy Toe Area

Children's toes are oblique – shaped unlike adults. Provide extra space in first toe for free toe movement, which enhances arch formation.

3. Centre Heel Angle

Turn heel centre inward, or more straight, just how children's feet are, to reduce pressure on the pinky toe.

4. Flatter Instep

Children's instep is flatter than adults. In this last, instep is designed flatter, which provides better fit after lacing up.

5. Moderate Toe Spring

If toe spring is too high, it is difficult to move toes freely. If toe spring is too low, children easily trip.

6. 2-5% Growth Margin in Ball Girth

Children grow quickly. Need buffer not to hamper their growth.
– Move toes freely, which enhances arch formation.

GEL-KAYANO™ 31 GS RRP \$180

NEW

Consumer Profile

The ultimate in support and cushioning for the Kid athlete.

Adults takedown on a Kid's Last.

GEL-NETBURNER™ 20

NETBURNER™ SHIELD RRP \$240

Consumer Profile

Netball shoe designed for any player searching for ultimate stability and support on court.

Key Features

UPPER

- Seamless mesh upper provides running shoe like comfort while a seamless panel underneath the mesh vamp helps create better support while allowing the foot to move more freely.

MIDSOLE

- The midsole combines a TPU TRUSSTIC™ unit with a Tri-density midsole (DUOMAX™ HC65 at medial midfoot - Medial FLYTEFOAM™ HC58 - Lateral FLYTEFOAM™ HC48) Together, these features improve stability during side-to-side movements and abrupt shifts in direction.

OUTSOLE

- Larger flexion grooves in the outsole's forefoot allow you to experience smoother transitions on the court.
- Solid rubber outsole that fully wraps to maximise durability of the shoe and minimise outsole wear and tear.
- Non-marking outsole.

GEL-NETBURNER™ 20 RRP \$180

Consumer Profile

Netball player looking for a stable and highly durable shoe in a wide fit.

Key Features

UPPER

- Synthetic leather upper with high level of upper support.
- 5/8 cut collar gives increased heel depth and more support to the heel and ankle.

MIDSOLE

- FLYTEFOAM™ (HC57) midsole material providing a lightweight cushioning.
- DUOMAX™ support technology.
- TPU trusstic improves torsional rigidity providing enhanced stability and protection when pivoting and stepping.
- Rearfoot and forefoot GEL™ technology for maximum comfort underfoot.

OUTSOLE

- Solid rubber outsole that fully wraps to maximise durability of the shoe and minimise outsole wear and tear. The outsole is the thickest of any in the range.
- Non-marking outsole.

TRACK & FIELD

METASPRINT

RRP \$320

Consumer Profile

For elite, competitive sprinters seeking a lightweight, spikeless shoe designed to shorten the time period of contact with the ground while increasing propulsion with each stride.

Key Features

UPPER

- HL-O Mesh is seamless, lightweight, (approximately 54% lighter than traditional mesh) whilst still being durable.
- DYNAPWRAP™ technology to improve stability and give a secure fit across the foot.

MIDSOLE

- FLYTEFOAM™ PROPEL midsole foam.
- Non-removable FLYTEFOAM™ sockliner.

OUTSOLE

- Pinless Carbon HEXA-CLAW plate is a honeycomb carbon fibre outsole plate that eliminates the need for spikes (pins) to enhance traction and transfer of power (incr traction due more contact with ground).
- Outsole build up at high contact areas where traditional pins would sit
- 8 clusters of hexagonal shapes .
