Vendors by Product Category

Product Category Descriptions

ASSURANCE AND AUDITING

Independent audits and evaluation of services and methodologies that help organizations demonstrate compliance with internal policies, standards and regulatory requirements.

CONSULTING AND ADVISORY

Advisory services supporting strategic planning, organizational readiness, capability-building and implementation of governance programs.

POLICY AND COMPLIANCE

Tools and services focused on internal principles policy development, creation of internal and external governance boards, regulatory alignment and compliance support, documentation, risk identification and management, and internal governance and procurement processes.

TECHNICAL ASSESSMENTS AND EVALUATIONS

Tools and capabilities dedicated to analyzing data quality, robustness, model performance, safety and fairness, and other factors that impact the development and ongoing monitoring of AI systems.

AI Governance VENDOR REPORT 2026

Understanding the evolving AI governance vendor ecosystem

As organizations deepen their adoption of artificial intelligence, the need for clear and operational governance structures has never been more important.

A continual theme from our ongoing AI governance landscape research is that AI governance is not a single function, discipline or technology. Our diagram, "**Mapping and understanding the AI governance ecosystem,**" highlights the many different actors and functions involved in designing, developing and delivering AI governance. This includes external service providers, or AI governance vendors, as we will refer to this grouping of companies.

While AI governance companies started appearing in the marketplace as early as 2010, there has been a significant increase in the need for these types of services in recent years. This has led to a significant increase in companies launching AI governance businesses. While many of these efforts are not new, there are many companies that have expanded their business offerings to meet this new demand.

When we originally conducted research for the ecosystem map, we saw that AI governance vendors were grouped into two categories: 1) assurance and tools, and 2) service, compliance and advisory.

Since last year when we started this research, we saw a maturation of what AI governance service providers offer. That is why we have now expanded the types of service providers into four categories, which are described in further detail below. We anticipate that in future versions of this report these categories will continue to expand or be refined.

Before getting to the classification that we created, the types of offerings that we saw throughout the industry are described here:

A continual theme from our ongoing AI governance landscape research is that AI governance is not a single function, discipline or technology.

AI governance is multifaceted

In early 2025, we spoke with many companies working with the AI governance vendor community to both identify vendors and understand where they required their assistance. Many vendors were already known to IAPP since they are already part of our community. Finally, we did extensive research to identify AI governance vendors.

In order to know what to look for, we worked through the various tasks that AI governance vendors perform. We saw that across the market, organizations in the AI governance vendor community represent a wide range of services and specializations. These offerings span the full lifecycle of AI development and oversight, including:

- **Testing and evaluation:** Tools and services aimed at assessing safety, security, model performance, robustness and other metrics essential to responsible AI deployment.
- **Model and solutions development services:** Providers supporting the design, development and implementation of AI systems consistent with governance requirements.
- **System integration:** Organizations helping enterprises embed AI solutions in production environments while managing operational and compliance risks.
- **AI auditors:** Firms offering independent assessments of AI systems against emerging standards, regulations and organizational policies.
- **Investment and venture capital:** Funds directing capital toward technologies and companies focused on responsible AI and governance infrastructure.
- **Operations:** Platforms and services focused on monitoring, observability, incident response and the ongoing management of AI systems.
- **Legal services:** Law firms and advisory groups providing guidance on regulatory compliance, contractual risk, policy interpretation and emerging legal frameworks for AI.
- **Code and data review:** Providers supporting transparency, quality assessment, and documentation of data and software assets that underpin AI systems.
- **Data infrastructure and analytics:** Platforms enabling secure data management, lineage, quality assurance and analytics capabilities needed to support AI governance.
- **Process orchestration:** Tools that help organizations coordinate governance activities, workflows, documentation and review processes across teams.

Together, these capabilities demonstrate the breadth of functions required to govern AI effectively. No single provider or tool spans all of the above tasks.

From our discussions, organizations often use AI governance vendors to augment work that they cannot do on their own or provide an external perspective.

In many circumstances – primarily large and multi-national organizations – we saw several examples of organizations leveraging multiple vendors working in the different areas mentioned above to fulfil their governance needs.

To help others navigate what is available, it was important for us to group these various

tasks into broader categories. This helped us to develop a framework to describe the AI governance market.

A framework for understanding the market

To bring structure to this rapidly evolving ecosystem, the IAPP has grouped AI governance capabilities into four overarching categories. These categories reflect both the functional needs of organizations and the patterns emerging across market offerings:

1. **Policy and Compliance**
   Tools and services focused on internal principles policy development, creation of internal and external governance boards, regulatory alignment and compliance support, documentation, risk identification and management, and internal governance and procurement processes.

2. **Technical Assessments and Evaluations**
   Tools and capabilities dedicated to analyzing data quality, robustness, model performance, safety, fairness and other factors that impact the development and ongoing monitoring of AI systems.

3. **Assurance and Auditing**
   Independent audits and evaluation of services and methodologies that help organizations demonstrate compliance with internal policies, standards and regulatory requirements.

4. **Consulting and Advisory**
   Advisory services supporting strategic planning, organizational readiness, capacity building and implementation of governance programs.

This framework is not intended to be a rigid taxonomy. Many organizations operate across multiple categories, and the boundaries between them may shift as the market matures. Instead, these groupings are designed to provide practitioners with a practical structure for evaluating vendors and understanding where different capabilities fit.

> *As a policy neutral organization that seeks to advance the AI governance community, including vendors, we wanted to provide an objective view of the market as we currently understand it.*

When developing our report, we relied primarily on publicly available information. It is likely that in future versions of this report, there will be more comprehensive public information or self-reporting from vendors to the IAPP, which will help to develop a stronger classification.

It was important for us to try to categorize AI governance vendors into this framework as we receive many questions about what AI governance vendors provide, what sectors they operate in, what regions they serve and what type of experience they have.

As a policy neutral organization that seeks to advance the AI governance community, including vendors, we wanted to provide an objective view of the market as we currently understand it.

Industry specialization

Part of our research was to look at the different industries in which these AI governance vendors were operating. While it is clear that some vendors have started to move toward specializing in various sectors, there are many that remain "cross-sectoral" or "unidentified" in our report. This could be due to the information that was publicly available or as a result of organizations not yet choosing a focus.

Through conversations with the vendor community, we found those that identify the domains in which they specialize often take place because of demand or due to the background of their teams. There are several vendors that indicated they were working in compliance in a particular sector previously and have now expanded to offer AI governance services.

> *The landscape of AI governance providers is dynamic and expanding. The organizations included in this analysis represent a starting point, not a definitive list.*

It remains an open question whether the market will evolve toward sector-specific offerings —particularly in highly regulated fields such as healthcare, financial services and public administration or if this trend of vendors working across all sectors will continue. It will remain an area of active observation for future iterations of our report.

Current focus on comprehensive providers

This report focuses only on comprehensive AI governance providers, rather than vendors offering isolated components such as single-purpose model evaluation tools or standalone data quality solutions. This distinction was important as we are starting to see more AI governance offerings embedded in tools like government-relation systems.

As the ecosystem continues to grow, distinguishing between full-stack governance offerings and specialized components will become increasingly important for practitioners who are navigating AI procurement and adoption decisions.

Help us build a more complete picture

The landscape of AI governance providers is dynamic and expanding. The organizations included in this analysis represent a starting point, not a definitive list.

If you or an organization you collaborate with offers comprehensive AI governance capabilities and is not yet represented, we encourage you to share details through the **submission form we have provided**. Your input will help us ensure that future reports reflect the breadth and diversity of the global AI governance ecosystem.

Next steps

It was clear from our research that the AI governance community remains an emerging sector. Specific needs from organizations appear to be in a steady state of flux. As such, we expect that this industry will continue to evolve, both in terms of the needs and offerings. We have not yet established a timeline for updating the report but anticipate to do so at least annually.

2021.ai

Location: Denmark

Number of employees: Under 50

Founded: 2016

Funded: Private

Sectors served: Legal; finance and banking; software and technology; manufacturing; life science; transportation; public sector

Description: 2021.AI empowers organizations with sovereign, resilient AI solutions through our GRACE AI Platform. We enable regulated industries to operationalize AI at scale while ensuring compliance with EU AI Act, NIST AI RMF, and ISO/IEC standards. Our platform combines MLOps lifecycle management, AI observability, bias detection, and automated compliance reporting. Featured by IDC, Markets & Markets, Quadrant Knowledge Solutions, and Frost & Sullivan, we seek analyst awareness of our capabilities for inclusion in upcoming AI governance, MLOps, and responsible AI coverage.

ASSURANCE AND AUDITING | CONSULTING AND ADVISORY | POLICY AND COMPLIANCE | TECHNICAL ASSESSMENTS AND EVALUATIONS

2B Advice LLC

Location: Germany

Number of employees: Unknown

Founded: 2003

Funded: Private

Sectors served: Not identified

Description: Ailance is an integrated risk management platform. On this platform, use existing solutions such as Ailance RoPA or build your own data protection or compliance solutions.

POLICY AND COMPLIANCE

Accedere

Location: United States

Number of employees: 16

Founded: 2017

Funded: Private

Sectors served: Not identified

Description: Accedere delivers expert SOC2 reports, ISO and cloud privacy certifications. With deep knowledge of frameworks across cybersecurity, cloud security, privacy and AI security, we help organizations of every size secure data, stay compliant and earn the confidence of clients, partners and regulators.

ASSURANCE AND AUDITING

Accenture Responsible AI Governance

Location: Global

Number of employees: Unknown

Founded: 2018

Funded: Private

Sectors served: Not identified

Description: Make responsible AI pervasive and systematic in the enterprise. Reduce risk through compliance, trust and value, and retained talent.

CONSULTING AND ADVISORY | POLICY AND COMPLIANCE

Activefence

Location: United Kingdom

Number of employees: 200

Founded: 2018

Funded: Private

Sectors served: Security

Description: We pioneered trust and safety for the world's largest platforms, building the expertise and technology to stop harmful content, behavior and abuse at scale. We bring proven experience to the era of generative AI, helping organizations build and scale AI-powered experiences with confidence.

TECHNICAL ASSESSMENTS AND EVALUATIONS

AI & Partners

Location: Netherlands

Number of employees: 32

Founded: 2021

Funded: Private

Sectors served: Not identified

Description: AI & Partners provides an AI governance enablement platform that supports organizations in implementing and operating responsible AI across the AI lifecycle (design, development, deployment, operation, decommission). Delivered as a centralized software system, the platform combines policy and compliance management, technical risk assessments, and audit-ready governance capabilities. It supports automated AI system discovery and inventory, structured risk assessments, model testing and monitoring, and configurable workflows aligned with widely recognised, peer-developed governance frameworks and global AI regulations (e.g. EU AI Act).

ASSURANCE AND AUDITING | POLICY AND COMPLIANCE | TECHNICAL ASSESSMENTS AND EVALUATIONS

AI Assurance Limited

Location: United Kingdom
Number of employees: 6
Founded: 2025
Funded: Private
Sectors served: Not identified

Description: Our AI Quality Management System platform delivers full compliance with EU AI Act Article 17 and prEN 18286 standards, automating intricate regulatory demands for high-risk AI. It accelerates conformity through streamlined processes, standard operating procedures, mandatory records and proactive regulatory risk mitigation to prevent disruptions. Supported by in-house experts and comprehensive tools, it guides organizations throughout their EU AI Act compliance journey.

ASSURANCE AND AUDITING | CONSULTING AND ADVISORY | POLICY AND COMPLIANCE | TECHNICAL ASSESSMENTS AND EVALUATIONS

AI Ethics Lab

Location: United States
Number of employees: 2
Founded: 2017
Funded: Private
Sectors served: Not identified

Description: AI Ethics Lab brings together researchers and practitioners from various disciplines to detect and solve issues related to ethical design in AI. Through collaboration between computer scientists, practicing lawyers and legal scholars, and philosophers, the Lab offers a comprehensive approach to ethical design of AI-related technology. Our goal is to enhance technology development by integrating ethics from the earliest stages of design and development for the mutual benefit of industry and communities. Our work aims to provide ethics guidance to researchers, developers and legislators.

CONSULTING AND ADVISORY

AI Guardian

Location: United States
Number of employees: 3
Founded: 2013
Funded: Private
Sectors served: Not identified

Description: Our focus is on managing the risks that are unique to AI and its adoption so that all businesses can reach their full potential by leveraging AI. Ensuring that AI is safe, secure, monitored, compliant, auditable and ethically deployed across all teams will ensure maximum return on AI investments and lead to advancements that benefit those we serve.

TECHNICAL ASSESSMENTS AND EVALUATIONS

aiaudit.org

Location: Germany
Number of employees: 931
Founded: 2021
Funded: Non-profit/community
Sectors served: Cross-industry
Description: Community resources and guidelines for AI audits and governance practice.

ASSURANCE AND AUDITING

aiEthix from Securys

Location: United Kingdom
Number of employees: Less than 50
Founded: 2014
Funded: Private
Sectors served: Not identified
Description: We help organisations implement and scale AI to transform organisational performance. At aiEthix, AI governance is not a dry exercise in compliance but a proactive function that unlocks your organisation's data resources and turns them from a risk into an asset. We combine our AI implementation experience with our specialist insight into data governance, risk management, data protection and employee training to make sure your AI workstreams have the best possible inputs — and therefore produce the best possible results.

ASSURANCE AND AUDITING | CONSULTING AND ADVISORY | POLICY AND COMPLIANCE | TECHNICAL ASSESSMENTS AND EVALUATIONS

AlgoViva

Location: South Africa
Number of employees: Less than 50
Founded: 2025
Funded: Private
Sectors served: Not identified
Description: AlgoViva is an AI assurance, governance and digital-rights company. We help organizations unlock the value of AI and emerging technologies in ways that are productive, safe and ethical. Our work balances ethics with organizational imperatives across systems, strategy and culture. We exist to ensure that AI and other emerging technologies serve people and the planet and that it is adopted to optimise ROI.

ASSURANCE AND AUDITING | CONSULTING AND ADVISORY | POLICY AND COMPLIANCE | TECHNICAL ASSESSMENTS AND EVALUATIONS

Amworkplace, Ltd.

Location: Canada

Number of employees: Less than 50

Founded: 2026

Funded: Private

Sectors served: Not identified

Description: BoundaryAI is an external deterministic enforcement engine that evaluates every AI agent and autonomous machine action against safety policies before execution, returning allow, block, or confirm decisions in 26 microseconds. Unlike embedded guardrails, enforcement operates outside the AI model using pure boolean logic, making it architecturally immune to jailbreaking and prompt injection. The platform covers three domains through a single API: digital agent safety, physical machine safety (ISO/TS 15066), and data governance (GDPR, EU AI Act). Patent pending, US #64/029,125.

POLICY AND COMPLIANCE | TECHNICAL ASSESSMENTS AND EVALUATIONS

Anove International

Location: Netherlands

Number of employees: Less than 50

Founded: 2023

Funded: Private

Sectors served: Not identified

Description: Anove is an all-European AI management system designed for automated compliance mapping, risk scoring and cross-border data insights. It detects shadow AI and empowers organizations to ensure EU AI Act compliance, while documenting AI transparency at scale. Built on decades of European cybersecurity, GRC and data protection expertise, Anove prioritizes EU data sovereignty and regulatory alignment (NIS 2, GDPR, DORA). It delivers actionable governance, helping enterprises mitigate risk, streamline audits and future-proof AI adoption while keeping data within EU borders.

ASSURANCE AND AUDITING | CONSULTING AND ADVISORY | POLICY AND COMPLIANCE | TECHNICAL ASSESSMENTS AND EVALUATIONS

Armilla.ai

Location: Canada

Number of employees: Less than 50

Founded: 2021

Funded: Private

Sectors served: Cross-industry

Description: Lloyd's-backed pioneer of AI insurance, AI performance warranties and third-party evaluations of generative AI applications and AI agents.

ASSURANCE AND AUDITING

Arthur.Ai

Location: United States

Number of employees: Less than 50

Founded: 2018

Funded: Private

Sectors served: Cross-industry

Description: AI performance and governance platform for monitoring, evaluation, guardrails and model risk across LLMs/ML, supporting on-prem and data-local deployments.

TECHNICAL ASSESSMENTS AND EVALUATIONS

Asenion (formerly FAIRLY and Anch.AI)

Location: Canada

Number of employees: Less than 50

Founded: 2020

Funded: Private

Sectors served: AI management system offering risk intelligence and continuous compliance monitoring with policy controls, testing and reporting.

Description: AI management system offering risk intelligence and continuous compliance monitoring with policy controls, testing and reporting.

ASSURANCE AND AUDITING

POLICY AND COMPLIANCE

BABL AI

Location: United Kingdom

Number of employees: Less than 50

Founded: 2018

Funded: Private

Sectors served: Finance/insurtech; HR; edtech; surveillance; autonomous vehicles; and defence

Description: Even though BABL AI started as company mainly focused on AI auditing, we have since evolved into consulting and advisory-style engagements both on technical aspects of AI (internal technical testing or system level evaluations) as well as on governance and policy questions. Through our Fractional AI Compliance Officer program, we help companies build up governance structures, write policies or setup technical testing infrastructure.

Biotale

Location: United States

Number of employees: Less than 50

Founded: 2023

Funded: Private

Sectors served: Not identified

Description: Biotale accelerates enterprise growth by embedding Generative AI into core business models and operations with a product-first mindset. Its BioFlow™ product suite includes AI platforms, operating models, and governance tools that help organizations adopt, scale, and control AI responsibly. Biotale goes beyond principles to operationalize AI governance, compliance, and risk management, ensuring transparency, accountability, and measurable value from AI across the enterprise.

CONSULTING AND ADVISORY | POLICY AND COMPLIANCE

BCG

Location: Global

Number of employees: 33,000+

Founded: 1963

Funded: Private

Sectors served: Finance; insurance; healthcare; public sector; consumer; industrial goods; private investors and private equity; retail; technology

Description: BCG's Responsible AI offering helps organizations strategically develop, deploy and scale AI in ways that align with ethical values and business goals. Leveraging BCG's strengths in strategy, change management and technology, the approach accelerates progress toward responsible AI maturity while maximizing value from AI investments. Our five-pillar Responsible AI framework—covering strategy, governance, technology, processes and culture—is tailored to each organization's unique context. BCG X's GenAI Evaluator strengthens this with rigorous evaluation and risk management to ensure AI and agentic systems are safe, secure and effective at scale.

CONSULTING AND ADVISORY | POLICY AND COMPLIANCE | TECHNICAL ASSESSMENTS AND EVALUATIONS

Breeple.ai

Location: Australia

Number of employees: Less than 50

Founded: 2025

Funded: Private

Sectors served: Not identified

Description: Breeple.ai provides governance infrastructure for AI systems, enabling organizations to operationalize policy, enforce controls, and generate audit-ready evidence across the lifecycle. The platform integrates with enterprise tooling to perform technical assessments, execution gating, and continuous monitoring at runtime. It supports compliance with frameworks like the EU AI Act, ISO/IEC 42001, and NIST AI RMF by translating regulatory requirements into enforceable workflows and risk controls within production environments, ensuring scalable, automated AI safety and accountability.

Description: RAIGE is an acronym for Responsible AI Governance and Ethics. At RAIGE Advisors, we empower organizations to navigate the complexities of AI by implementing robust frameworks that promote ethical and responsible AI practices, enhance regulatory compliance and build stakeholder trust. Our mission is to help clients achieve ethical, accountable and transparent AI outcomes that foster confidence among customers, employees and regulators.

CONSULTING AND ADVISORY POLICY AND COMPLIANCE TECHNICAL ASSESSMENTS AND EVALUATIONS

Relyance AI

Location: United States
Number of employees: Less than 50
Founded: 2020
Funded: Private
Sectors served: Cross-industry
Description: We secure the future of data-driven enterprises by making every data journey visible, controlled and compliant, from the first line of code to the final AI output.

CONSULTING AND ADVISORY | POLICY AND COMPLIANCE

Resaro

Location: Singapore and Germany
Number of employees: 35
Founded: 2023
Funded: Private
Sectors served: Not identified
Description: Resaro is an independent, third-party AI assurance provider that builds AI testing tools to evaluate the performance, safety and security of dual-use AI systems. With co-headquarters in Singapore and Europe, Resaro combines its global engineering capabilities with deep domain expertise in mission-critical use cases to offer scientific and reliable approaches to testing.

ASSURANCE AND AUDITING | CONSULTING AND ADVISORY | POLICY AND COMPLIANCE | TECHNICAL ASSESSMENTS AND EVALUATIONS

Responsible AI Institute

Location: United States
Number of employees: Less than 10
Founded: 2016
Funded: Non-profit
Sectors served: Cross-industry
Description: The Responsible AI Institute, a global non-profit, provides cutting-edge tools for responsible AI oversight and compliance, ensuring enterprises can deploy AI with confidence in an evolving regulatory and business landscape.

CONSULTING AND ADVISORY

risk3sixty

Location: United States

Number of employees: Less than 50

Founded: 2016

Funded: Private

Sectors served: Not identified

Description: Risk3sixty partners with mid-market and enterprise organizations to comply with complex frameworks, optimize GRC programs with AI-driven automation, and secure their attack surface. These outcomes are powered by its expert team and the fullCircle GRC platform. The firm is a SANS Cybersecurity Company of the Year finalist, a seven-time Atlanta Business Chronicle Best Places to Work winner, a four-time HIRE Vets Medallion recipient, and is led by a Titan 100 CEO. Risk3sixty is also a CMMC RPO, HITRUST Authorized External Assessor, and CREST-accredited for penetration testing.

ASSURANCE AND AUDITING | CONSULTING AND ADVISORY | POLICY AND COMPLIANCE

Robust Intelligence

Location: United States

Number of employees: Less than 200

Founded: Unknown

Funded: Private

Sectors served: Finance; insurance; tech; public sector

Description: Pre-deployment and runtime AI risk testing (adversarial robustness, data integrity, policy compliance checks) for ML and LLMs.

TECHNICAL ASSESSMENTS AND EVALUATIONS

Saidot

Location: Finland

Number of employees: Less than 10

Founded: 2018

Funded: Private

Sectors served: Cross-industry

Description: We believe AI can be a force for good if used responsibly. That's why we build technology for aligning AI with human values. The Saidot AI Governance platform enables enterprises and governments to systematically govern and monitor their AI powered systems while fostering transparency with stakeholders.

POLICY AND COMPLIANCE | TECHNICAL ASSESSMENTS AND EVALUATIONS

SAS

Location: United States

Number of employees: 12,000

Founded: 1976

Funded: Private

Sectors served: Not identified

Description: The **SAS AI Governance Infographic** depicts all our AI governance products and advisory services. **SAS Viya** provides integrated tools to assess data quality, robustness, model performance, safety, and fairness, enabling continuous monitoring and oversight to support trustworthy, accountable, and resilient AI systems at scale.

CONSULTING AND ADVISORY | POLICY AND COMPLIANCE | TECHNICAL ASSESSMENTS AND EVALUATIONS

Seclea

Location: United Kingdom

Number of employees: Less than 10

Founded: 2020

Funded: Private

Sectors served: Cross-industry

Description: At Seclea, we are a technology for good company dedicated to promoting the responsible and ethical use of AI. Our solutions enable organisations to comply with regulatory requirements, promote transparency and accountability and enhance stakeholder trust and confidence in their AI solutions. With tools for monitoring and tracking every action taken during the AI lifecycle, custom dashboards and reports, and comprehensive analysis capabilities, our platform ensures that organisations can confidently develop and deploy AI applications while maintaining adherence to ethical and legal requirements.

ASSURANCE AND AUDITING

Secure AI

Location: United States

Number of employees: Less than 50

Founded: 2023

Funded: Private

Sectors served: Not identified

Description: Secure AI provides Prime AI governance, guardrails and security platform to help you manage AI governance at enterprise level. It comes with complete suite of AI governance with intake, risk profiles, custom policies, automated policy checks, automated regulations updates, runtime guardrails like prompt injection, pii, phi checks, hallucinations checks, inbuilt human in the loop workflow and custom policy builders.

CONSULTING AND ADVISORY | POLICY AND COMPLIANCE

Securiti.ai

Location: United States

Number of employees: Less than 1000

Founded: 2019

Funded: Private

Sectors served: Cross-industry

Description: Securiti.ai provides a Data AI Command Center platform using AI and machine learning for data security, privacy, governance and compliance, helping enterprises manage data across hybrid multicloud environments and safely adopt GenAI, with a focus on automating privacy operations. Founded by experienced security professionals, the company offers solutions for data discovery, access control, AI security (including LLM firewalls) and automating tasks like data subject requests, aiming to unify data intelligence and controls.

POLICY AND COMPLIANCE

SIGMA AI

Location: Spain

Number of employees: 400

Founded: 2008

Funded: Private

Sectors served: Not identified

Description: Sigma AI delivers human-in-the-loop evaluation, data annotation, and training data services that power responsible AI development. Our global annotator network spanning hundreds of languages enables rigorous technical assessments of model performance, fairness, safety, and bias at scale. Specializing in generative AI evaluation, we combine proprietary quality frameworks with exceptional ethics and security standards helping frontier AI developers and enterprises build AI systems that are not only capable, but trustworthy and audit-ready.

TECHNICAL ASSESSMENTS AND EVALUATIONS

Sigma Red

Location: Canada

Number of employees: Less than 50

Founded: 2020

Funded: Private

Sectors served: Cross-industry

Description: SigmaRed's AiSCERT Platform Identifies and mitigates AI Risks related to AI fairness, explainability, robustness, regulatory compliance, and ML monitoring and provides ongoing responsible AI assessment and mitigation. The E(ai)SCROW Platform protects PII and business-sensitive information enabling organizations to effectively leverage commercial large language models. This platform also addresses LLM risks like bias, hallucination, prompt injection and toxicity.

TECHNICAL ASSESSMENTS AND EVALUATIONS

Singular AI

Location: United States

Number of employees: Less than 25

Founded: 2023

Funded: Private

Sectors served: Cross-industry

Description: Singulr AI equips technology leaders with the tools to transform safe AI adoption into a strategic advantage. Our platform provides visibility into AI systems and user activity, streamlines the onboarding of approved AI solutions and mitigates risks such as data leaks, unsafe usage and shadow AI.

POLICY AND COMPLIANCE

Superwise

Location: Israel

Number of employees: Less than 50

Founded: 2019

Funded: Private

Sectors served: Cross-industry

Description: Comprising experts in AI, data integration, user experience, edge computing and cybersecurity, our professionals are dedicated to driving innovation and delivering exceptional solutions. Led by co-founders Russ Blattner and John Leschorn, our leadership team includes accomplished executives who bring a wealth of experience and a shared commitment to excellence. Each member of our team plays a pivotal role in transforming how businesses leverage technology to achieve their goals.

TECHNICAL ASSESSMENTS AND EVALUATIONS

SYEN Systems

Location: United States

Number of employees: Less than 50

Founded: 2024

Funded: Private

Sectors served: Not identified

Description: SYEN Audit is a cryptographically linked, tamper-evident evidence chain for AI decisions in regulated environments. Every record captures policy, identity, data, model execution, human review, and outcome in one signed entry that internal audit, regulators, and courts can verify independently. Aligned to SR 11-7, SEC FY2026 Examination Priorities, NIST AI RMF, and OMB M-25-22.

ASSURANCE AND AUDITING

Symbiotic Dynamics

Location: United Kingdom

Number of employees: Less than 50

Founded: 2025

Funded: Private

Sectors served: Not identified

Description: Symbiotic Dynamics provides a runtime AI governance layer that travels with the deployed agent (digital or embodied) and tells it what it must and must not do. This is the missing link between rules/regulations and autonomy. Policy Cards are machine-readable and executable. They support runtime constraints, explicit escalation, continuous compliance, multi-jurisdictional autonomy, and auditable outputs. Unlike centralized platforms, they ship as part of AI products, giving governance teams a direct engineering interface for high-stakes autonomous systems in healthcare, finance, and beyond.

ASSURANCE AND AUDITING

Synthesized

Location: United Kingdom

Number of employees: Less than 50

Founded: 2018

Funded: Private

Sectors served: Cross-industry

Description: Synthesized is a unified platform to automate data provisioning, accelerate development cycles and minimize compliance risk. It employs enterprise-grade test data automation at the speed of AI and aligns test automation with reliable test data.

TECHNICAL ASSESSMENTS AND EVALUATIONS

Trail ML

Location: Germany

Number of employees: Less than 25

Founded: 2023

Funded: Private

Sectors served: Not identified

Description: Trail generates accurate documentation and reports of ML development from code, data and model to inform you about capabilities and risks—powered by LLMs. Use our governance framework templates or create your own.

POLICY AND COMPLIANCE

Transcend

Location: United States

Number of employees: Less than 200

Founded: 2017

Funded: Private

Sectors served: Cross-industry

Description: Transcend is the compliance layer for customer data, enabling enterprises to activate AI responsibly and at scale. Transcend embeds customer data controls directly into enterprise tech stacks to automatically orchestrate data subject requests, capture consent, enforce AI training preferences, and power risk assessments, so companies can pursue AI innovation, personalization, and data-driven growth with confidence.

ASSURANCE AND AUDITING | POLICY AND COMPLIANCE | TECHNICAL ASSESSMENTS AND EVALUATIONS

Trilateral

Location: United Kingdom

Number of employees: 98

Founded: 2004

Funded: Private

Sectors served: Finance, healthcare

Description: Trilateral delivers end-to-end AI governance, risk and compliance (GRC) services enabling organisations to deploy AI with demonstrable legal compliance and assurance. With over 15 years of applied AI expertise, we support compliance with the EU AI Act, ISO42001 and other global regulatory frameworks across high-risk use cases and complex organisational environments. We embed AI governance into operational practice, supporting oversight, accountability and continuous assurance across the AI lifecycle from strategy through deployment and ongoing operational oversight.

ASSURANCE AND AUDITING | CONSULTING AND ADVISORY | POLICY AND COMPLIANCE | TECHNICAL ASSESSMENTS AND EVALUATIONS

TrojAI

Location: Canada

Number of employees: Less than 50

Founded: 2020

Funded: Private

Sectors served: Cross-industry

Description: Model testing for backdoors/trojans and harmful behaviors; evaluation labs for LLMs and computer vision models.

ASSURANCE AND AUDITING

Trustible AI

Location: United States
Number of employees: Less than 25
Founded: 2023
Funded: Private
Sectors served: Health, finance, HR
Description: Trustible is a AI governance platform enabling safe and compliant AI adoption. Our AI governance platform enables enterprises to identify, measure and mitigate AI risk to accelerate AI adoption.

CONSULTING AND ADVISORY | POLICY AND COMPLIANCE | TECHNICAL ASSESSMENTS AND EVALUATIONS

Trustworks

Location: United Kingdom
Number of employees: Unknown
Founded: 2015
Funded: Private
Sectors served: Not identified
Description: Mitigate compliance risks, streamline privacy operations and build trust collaboratively by embedding privacy into your business processes and tools.

POLICY AND COMPLIANCE

Truyo, an IntraEdge Company

Location: United States
Number of employees: 4,000
Founded: 2016
Funded: Private
Sectors served: Not identified
Description: Truyo offers the most mature AI governance platform, in production since 2023, with referenceable enterprise clients in a wide variety of segments, including retail, technology, finance, insurance, sports, SLED, utilities, entertainment, construction, manufacturing and a current expansion into healthcare. Truyo provides a suite of AI governance capabilities, including AI discovery for a comprehensive AI inventory, risk management with model validation, AI consent, regulatory-driven assessments with a risk registry and employee training on ethical and compliance AI usage.

ASSURANCE AND AUDITING | CONSULTING AND ADVISORY | POLICY AND COMPLIANCE | TECHNICAL ASSESSMENTS AND EVALUATIONS

TÜViT

Location: United Kingdom

Number of employees: Unknown

Founded: 2021

Funded: Private

Sectors served: Digital infrastructure, energy, waste disposal, nutrition, finance, health, public sector, transportation and traffic, water, space, defence

Description: TÜV NORD IT Secure Communications is an independent consulting company for security consulting and IT programme management in the secure digitalisation of the public and private sectors.

CONSULTING AND ADVISORY | POLICY AND COMPLIANCE

ValidMind

Location: United States

Number of employees: Less than 50

Founded: Unknown

Funded: Private

Sectors served: Financial services (banks, fintech, insurance)

Description: Model risk management for financial services: documentation, testing, validation and regulatory evidence for ML/LLMs.

POLICY AND COMPLIANCE | TECHNICAL ASSESSMENTS AND EVALUATIONS

VerifyWise

Location: Canada

Number of employees: Less than 50

Founded: 2024

Funded: Private

Sectors served: Not identified

Description: VerifyWise is an open source AI governance platform that helps organizations manage AI systems with visibility, control, and accountability. It centralizes model inventories, risk assessments, compliance mapping, and vendor oversight in one workspace. Teams use it to align with frameworks like the EU AI Act and ISO 42001 while detecting Shadow AI and unsafe usage.

ASSURANCE AND AUDITING | POLICY AND COMPLIANCE | TECHNICAL ASSESSMENTS AND EVALUATIONS

WebGuru

Location: Canada

Number of employees: Less than 50

Founded: 2021

Funded: Private

Sectors served: Not identified

Description: We focus on creating policies and help law firms adopt AI implementations that are secure and reliable for their day-to-day needs.

CONSULTING AND ADVISORY | POLICY AND COMPLIANCE | TECHNICAL ASSESSMENTS AND EVALUATIONS

Witness.ai

Location: United States

Number of employees: Less than 50

Founded: 2023

Funded: Private

Sectors served: Not identified

Description: WitnessAI is building a confidence layer for enterprise AI—architected for this moment, and what's next. A platform that helps enterprises protect and accelerate their AI journey—across the rapidly evolving AI tech stacks.

POLICY AND COMPLIANCE | TECHNICAL ASSESSMENTS AND EVALUATIONS

Yields

Location: Belgium

Number of employees: Less than 50

Founded: 2017

Funded: Private

Sectors served: Not identified

Description: Yields' AI governance software offers complete oversight of the AI landscape, essential for managing AI risks and ensuring compliance during rapid scaling. Our solution was named a Category Leader in the Chartis AI Governance Report 2025, achieving 'Best-in-class' scores across Governance, Data and Model Management, and Workflow. Yields is a trusted partner for over 50 leading organisations mainly tier 1 financial institutions including HSBC, BNP Paribas, and Euroclear, empowering teams to govern every AI system without slowing them down.
