

IAPP ANZ Summit 2025

Training 4-5 Dec.

Conference 2-3 Dec.

SYDNEY

#ANZsummit25

From AI governance to growth

Accelerate deployment of AI governance and platform enablement with data governance

Welcome and introductions

Kris Brown

Executive VP of Partners and Solution Engineering

Kris Brown helps organizations move from governance to growth.

With more than 20 years in enterprise content and information management, Kris has led technology change across Australia, New Zealand, the UK, and the US. He brings deep expertise in the needs of highly regulated industries and how trust and transparency underpin successful data strategies.

Solving the \$40b AI productivity gap

Wasted investment

Enterprises have spent \$30–40 billion on high-profile generative AI tools.

The GenAI Divide: State of AI in Business 2025
Report by MIT NANDA

Limited measurable ROI

However, 95% of generative AI pilots deliver no measurable ROI.

Report by MIT

Shadow AI economy

There is clearly an AI need – roughly 90% of employees use personal AI tools, even as formal pilots stall.

Article by Forbes

Insufficient governance and risk management

58% of enterprises cite disconnected systems as the top blocker to moving projects into production and 44% say governance processes are too slow.

What's slowing AI innovation?

1

Shadow AI and lack of visibility

"We don't know what AI tools our teams are using."

2

Sensitive data exposure

"Our data isn't AI-ready, but people are using it anyway."

3

Compliance pressure

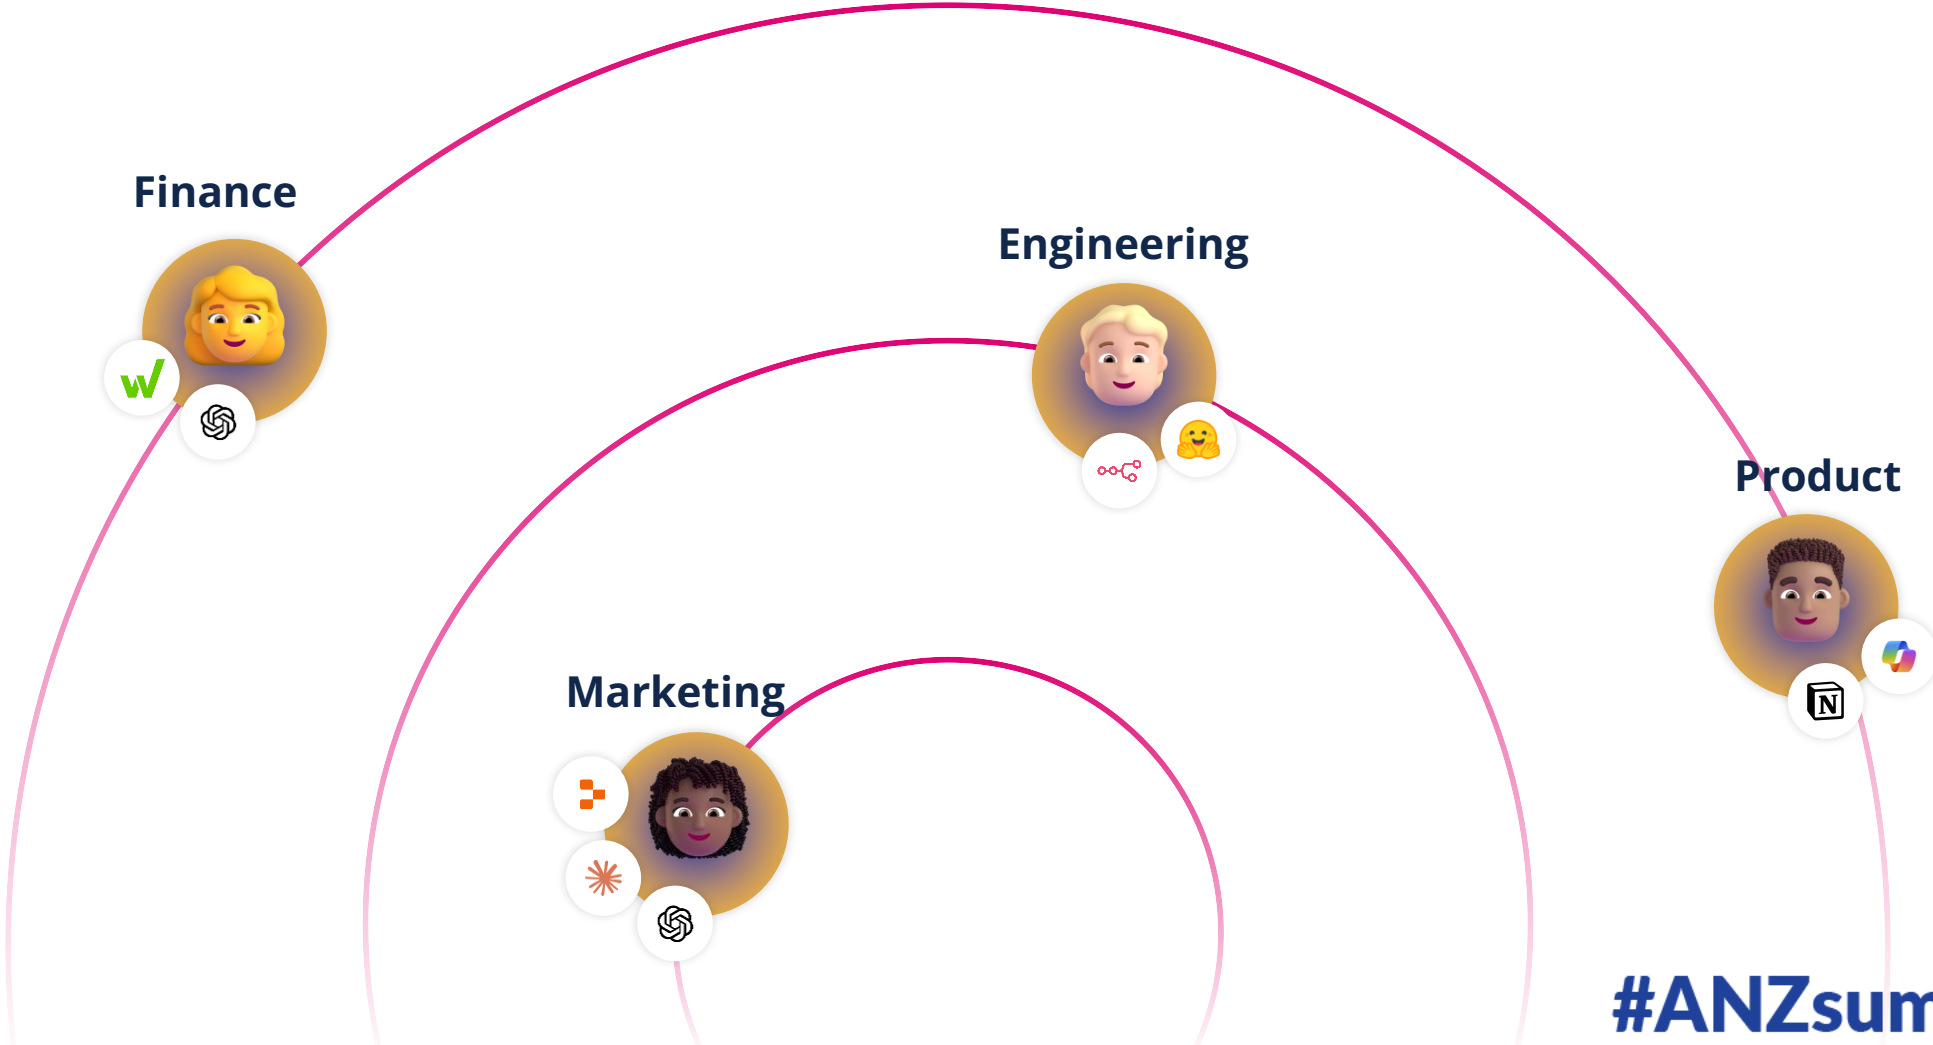

"Which frameworks do we even follow — and how do we prove it?"

4

Static policies that don't scale

"We have an AI policy. Now what?"

Teams are bypassing rules to get work done

... and new

AI consumes everything it can see, not just what it should.

Compliance now extends to how data is used, not just how it's stored.

Governance needs to be proactive and policy-driven before AI ever sees the data.

From chaos to control: your AI governance journey

FROM

- No way to operationalize AI program or policy.
- Sensitive data slipping into AI tools unchecked.
- Public AI exposes too much risk.

TO

- Easily and safely launch your AI program aligned to policy.
- Redact and remove sensitive data before it ever reaches LLMs.
- Deploy secure, compliant small language models powered by governed data.

Your unified data and AI governance platform to reduce data debt

Understand your data

TYPE	NAME	JURISDICTION	POLICY

Manage your data

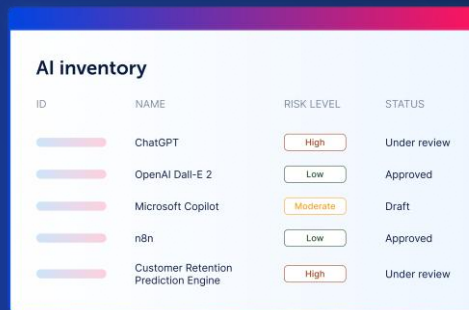

Reduce your data risk

Turn your AI program into action with RexCommand

Full AI visibility

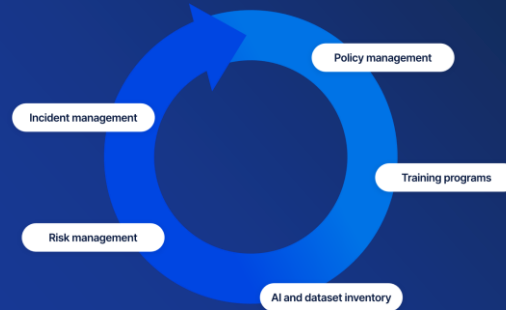

Centralize oversight across your entire AI landscape

ID	NAME	RISK LEVEL	STATUS
	ChatGPT	High	Under review
	OpenAI Dall-E 2	Low	Approved
	Microsoft Copilot	Moderate	Draft
	n8n	Low	Approved
	Customer Retention Prediction Engine	High	Under review

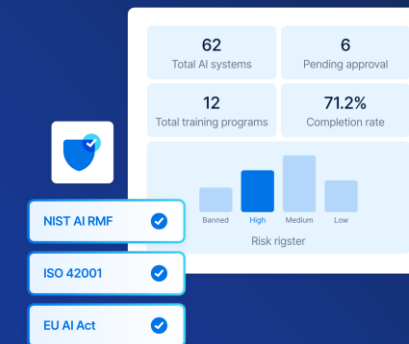

End-to-end AI governance

Enforce governance from development to deployment

Center of compliance enablement

Demonstrate compliance with global frameworks

Mature your AI program with confidence

RexCommand

Centralized hub to track AI systems and associated risk

Q&A

How Did Things Go? (We Really Want To Know)

Did you enjoy this session? Is there any way we could make it better? Let us know by filling out a speaker evaluation.

1. Open the IAPP Events app.
2. Select **IAPP ANZ Summit 2025**.
3. Tap "Schedule" on the bottom navigation bar.
4. Find this session. Click "Rate this Session" within the description.
5. Once you've answered all three questions, tap "Done".

Thank you!
