

Students and the IAPP

Exclusive student opportunities

Save up to 85% on certifications, training and IAPP membership

Certification bundles

Begin your professional journey with globally acknowledged IAPP certifications and training. Student bundles include:

- Self-paced online training, digital textbooks when available and certification voucher to take the certification exam in person or remotely.
- One year of IAPP student membership.

IAPP student membership

Not ready to certify? IAPP annual membership opens the door to a community of like-minded professionals and exclusive data protection tools and resources to help you achieve the tall task of “doing privacy right” including:

- Access to member-only reports, research, surveys and free live and recorded web conferences.
- Member-only privacy, AI governance and cybersecurity law job board.
- Networking opportunities through affinity groups, roundtables and your local KnowledgeNet chapter.
- Member discounts on IAPP products such as books, exams, practice exams, events, training and more.

IAPP event scholarships

IAPP conferences are a great way to network in person with peers and industry leaders, learn from experts and gain invaluable experience. IAPP event scholarships allow students to access select conferences at no cost.

All event scholarships include a complimentary conference pass and access to exclusive student networking sessions. Some event scholarships include a travel stipend.

Full-time students who have not previously received a scholarship are encouraged to apply.

Academic and career support for students

Build your professional network and stay up to date on the latest developments in digital governance using our resources, such as:

- Academic resources and industry newsletters.
- Networking opportunities at conferences, local chapter meetings and more.
- Peer groups based on specific subjects.

About the IAPP

The IAPP is a policy-neutral, not-for-profit association that supports digital responsibility professionals including programs and scholarships for students and other newcomers.

Our membership includes 90,000 established and rising professionals working in the fields of privacy, artificial intelligence governance and cybersecurity law around the world.

We connect students with transformative experiences and professional opportunities by building relationships with academic institutions across the globe.
