

SCHNEIDER BULK INTERMODAL GREASES THE GEARS

An oil company experienced capacity and on-time delivery issues with its over-the-road carrier that struggled with gear oil deliveries to cruise ships. Schneider initiated a multimodal solution to create time and cost efficiencies, while uncovering unexpected savings in recovered oil.

THE SITUATION

Shipping solely over-the-road led to inconsistent capacity and increased transportation costs

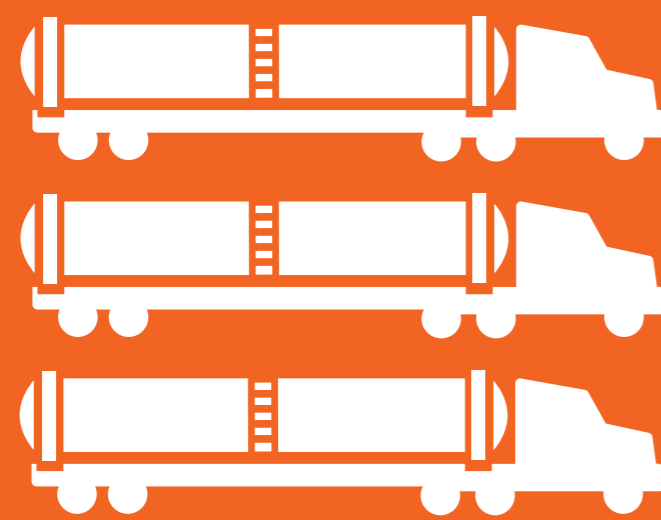

The capacity shortage delayed deliveries, causing the company to miss tight deadlines

The difficult unloading process meant oil and profits were left on the table

THE SCHNEIDER SOLUTION

Schneider deployed its fleet of 40-ft bulk Intermodal containers for more efficient shipments

Schneider's Intermodal network, strong rail relationships and dray capacity provided a consistent delivery schedule

Schneider worked with a tank-cleaning vendor to package remnant oil and save the company money

THE RESULTS

PROJECTED ANNUAL FREIGHT COST SAVINGS OF **35%**

INCREASED BULK INTERMODAL

FREED UP OVER-THE-ROAD CAPACITY TO ACCOMMODATE GROWTH AND SURGES

ONGOING SAVINGS IN RECOVERED OIL FROM EMPTY CONTAINERS

Schneider's Bulk Intermodal offering complemented its Over-the-Road offering to create consistent capacity. The oil company is now able to meet the demands of its customers.

Find out how Schneider's Bulk Intermodal offering can meet and exceed capacity demands.
