

## ACHIEVING A **STREAMLINED** SUPPLY CHAIN FROM

**PORT TO STORE**

A leading provider of holiday food gifts used multiple carriers for its supply chain, creating an inefficient, fragmented approach. This resulted in excessive damage claims, missed delivery windows and a lack of capacity during peak periods.

### THE SITUATION

Supply chain inefficiencies from using four different transportation providers and poor handoffs between multiple modes of service

Unpredictable transportation caused late freight arrivals and excessive labor costs

Damaged food tins netted \$30,000 in accrued claims

### THE SCHNEIDER SOLUTION

Drayed ocean containers to a transloading facility and assessed for initial damage

Engineer-revised load patterns mitigated further tin damage

Established a pool of containers for more consistent and efficient shipping

Utilized preferred vendor status with retailer for dropping and hooking trailers

### THE RESULTS

**INCREASED**  
**SERVICE LEVELS**

**SLASHED**  
**DAMAGE CLAIMS**

**END-TO-END FREIGHT VISIBILITY**  
**WITH A SINGLE PROVIDER**

Schneider put to work its more than 20 years of experience navigating the port, providing the expertise and guidance the shipper wanted — and delivered impactful results. A streamlined supply chain and improved bottom line were the ultimate gift for the holiday food retailer.
