

Manufacturer gains reliable and consistent cross-border capacity with Schneider Intermodal

A plumbing and building products manufacturer needed reliable and consistent capacity between Mexico and the U.S.

The situation

Imbalanced cross-border freight demand to and from Mexico

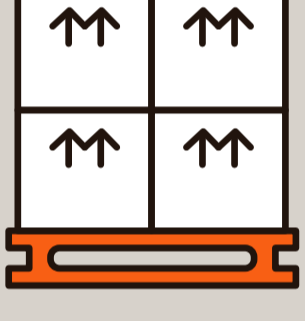

Transportation pipeline blockages led to challenges obtaining capacity

Secure freight practices required

The Schneider solution

Simplified intermodal load configuration for door-to-door service

Efficient capacity planning through joint operations ensures required capacity

Certified C-TPAT carrier base keeps freight secure

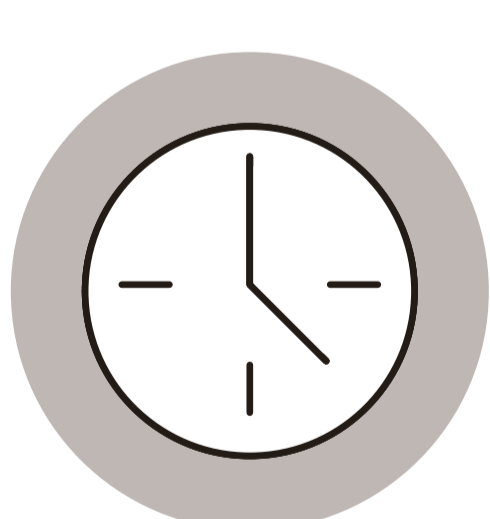

Geofencing tracking system helps keep freight safe and on time

The results

100% order completion

Improved time and cost efficiencies

Reliable and consistent capacity between Mexico and the U.S.

Schneider's door-to-door cross-border intermodal service helped this manufacturer tackle shipping struggles through planning, analysis and secure practices.
