

Schneider FreightPower® Top 5 time-saving app features for better load booking

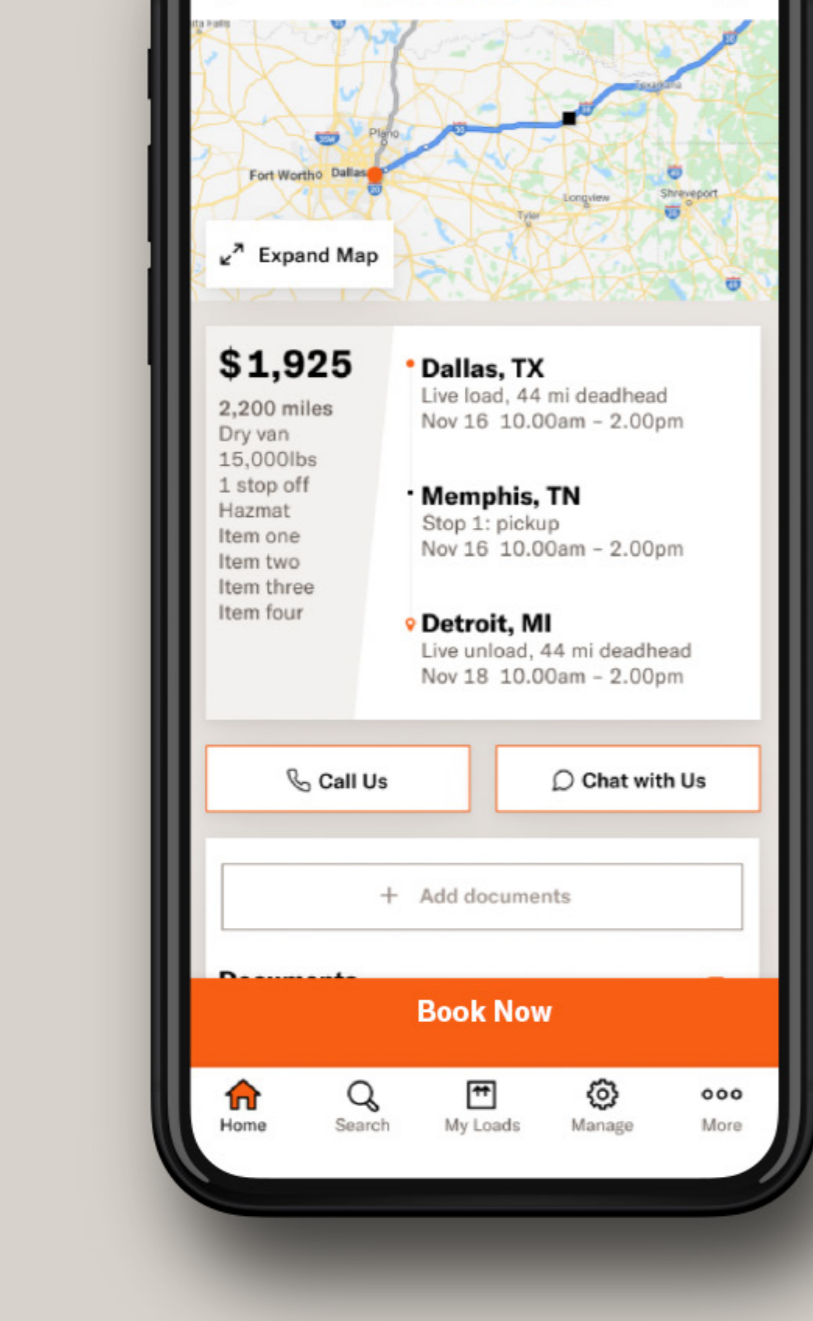

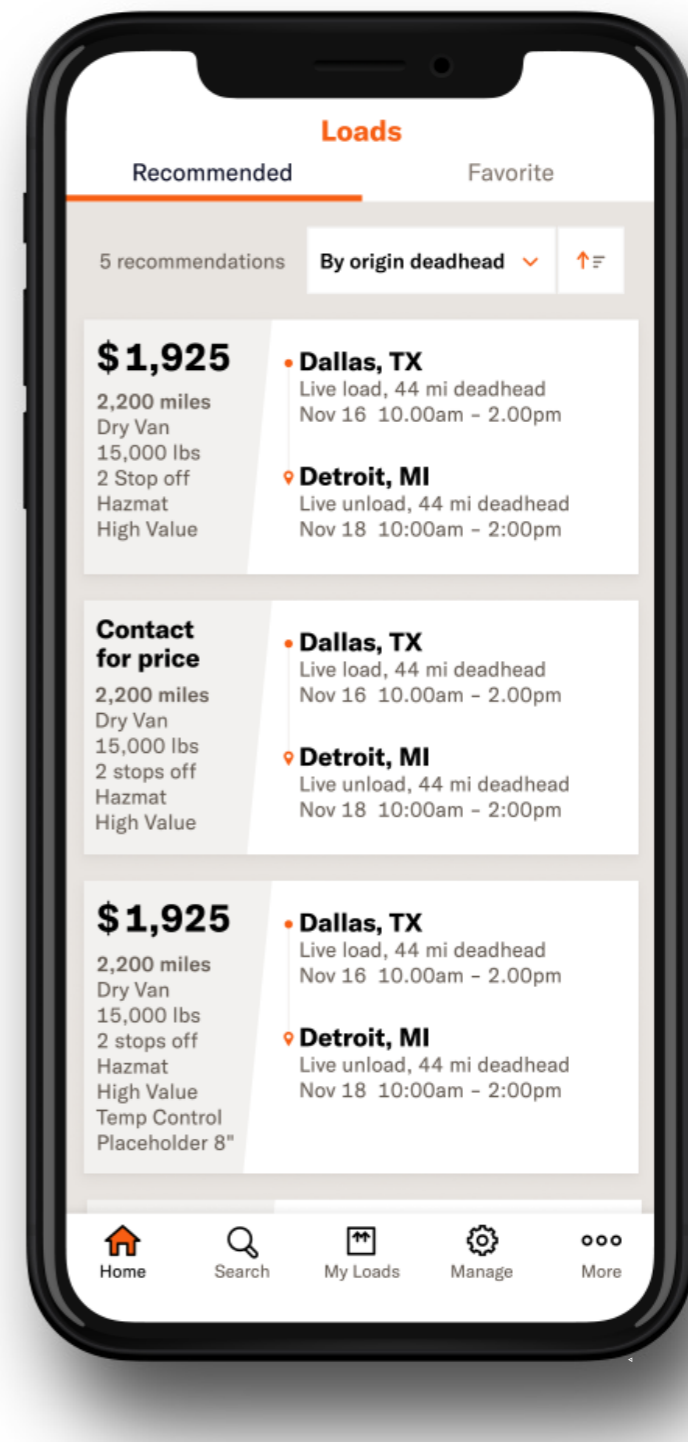

The Schneider FreightPower® app gives carriers more access to reliable freight from blue-chip shippers. Efficiency is at your fingertips with real-time, instant access to quickly book quality loads.

Load recommendations

- › Set parameters around trucks and lanes posted, and pending inbound shipments for personalized suggestions.
- › Enhanced filtering capabilities help you find the loads you want – fast.
- › Filter criteria options include destination deadhead, pickup date, trailer type, revenue and more.

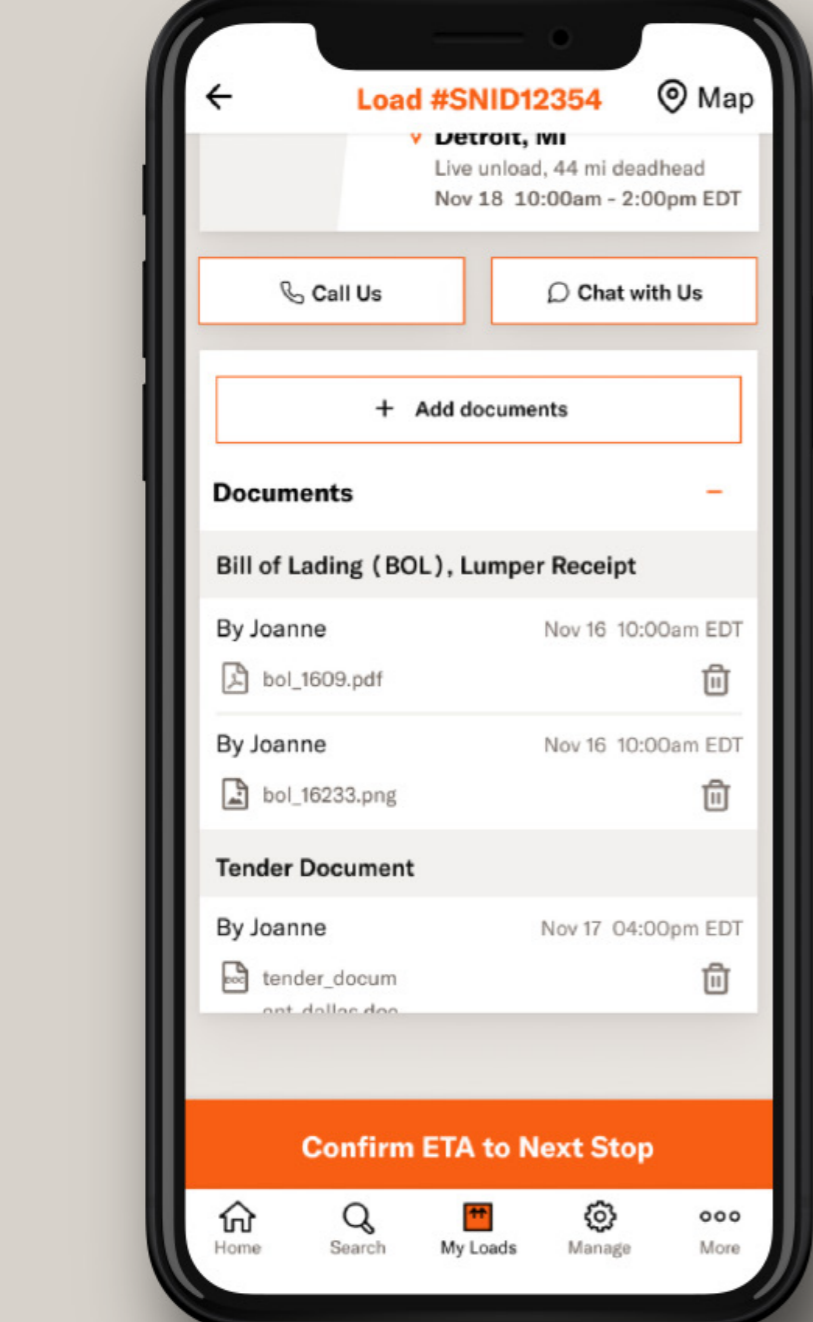

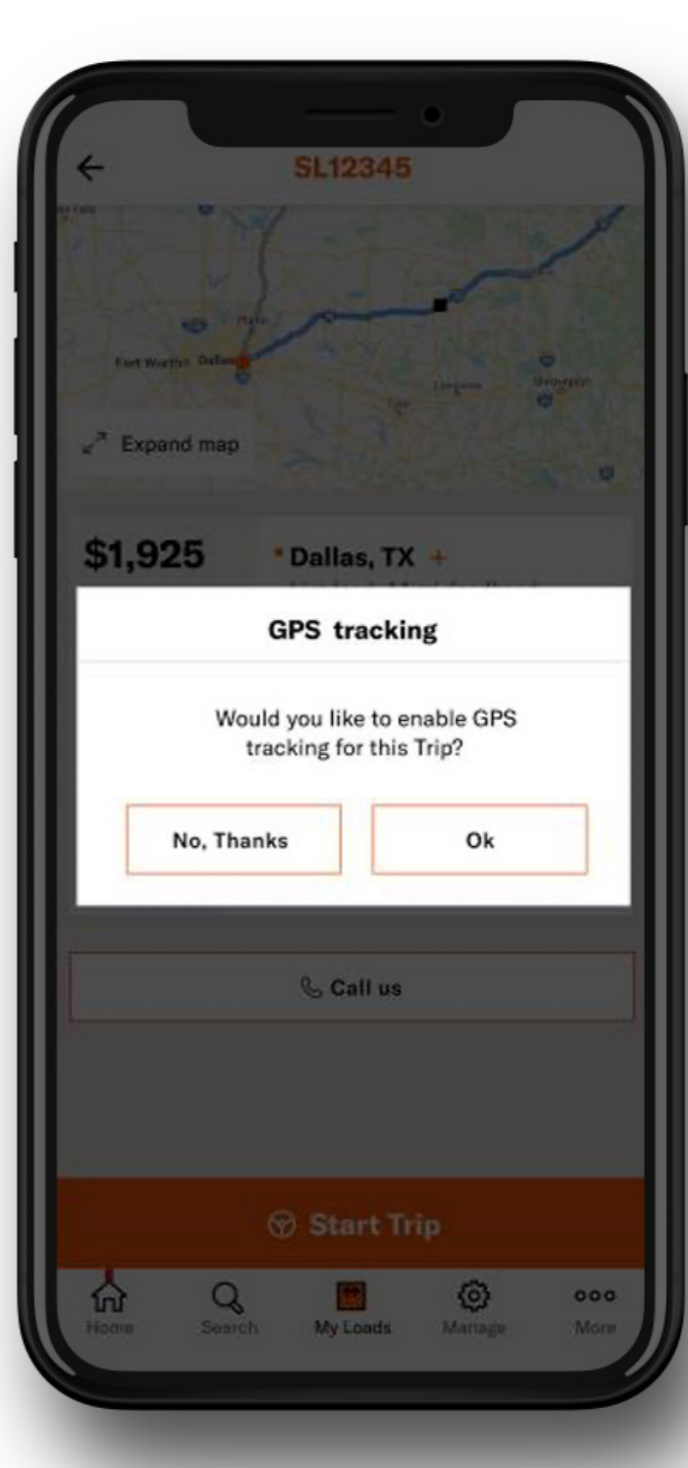

Book Now

- › Real freight prices are published next to available loads.
- › No back-and-forth negotiations with brokers saves time.
- › Instantly view and book a load.

GPS tracking

- › Geofencing and arrive/depart tracking provide automated, real-time driver updates.
- › Plan accordingly with real-time freight accuracy ETA.

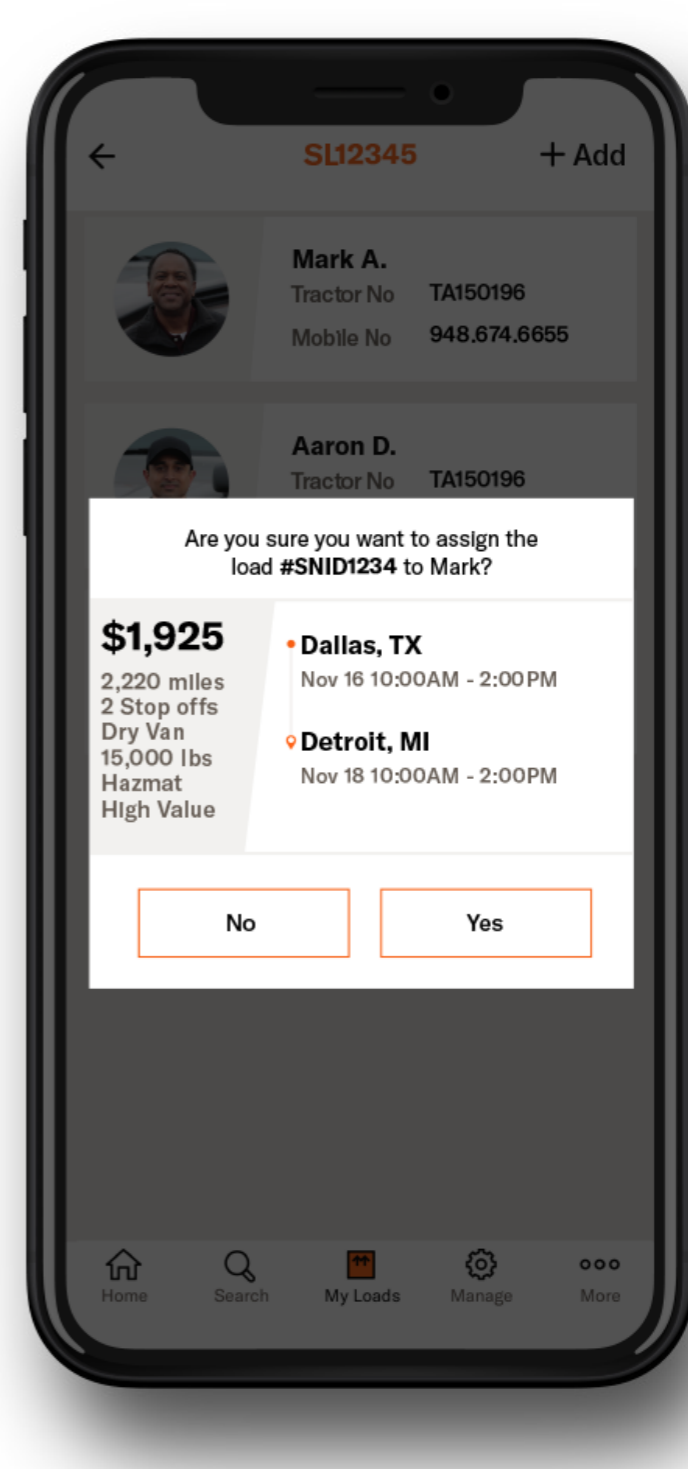

Trip information

- › Find all trip information in one place.
- › Direct visibility to location, routes, appointments, equipment and trailer info.
- › Eliminate incorrect information and time spent waiting for updates.

Manage fleet

- › A one-stop shop for fleet management.
- › Assign your drivers to loads.
- › Dispatchers can view and manage their driver activity.
- › Your drivers can accept and track loads.

Schneider FreightPower® is a powerful digital marketplace that allows you to do more for your business. Access the tools and features you need to quickly find quality loads worth hauling so you can get on your way.

Download the app now and start doing more for your business today.
