

## INCREASED CAPACITY

FOR INCREASED SHIPMENTS

This is how we helped a polymer manufacturer increase shipping capacity by using intermodal services to free up over-the-road drivers.

## THE SITUATION

Over-the-road driver shortage

Overwhelming delivery demands

Increased shipping costs

## THE SCHNEIDER SOLUTION

On-and-off intermodal rail ramp drayage

Truckload-to-intermodal conversion to double capacity

Increased access to over-the-road drivers

## THE RESULTS

### 8X INCREASE

in loads delivered per month

### MONEY SAVED

through increased intermodal loads

### GREATER CAPACITY

for more over-the-road shipments

### REDUCED ECO IMPACT

through lower fuel usage

Schneider's Bulk Intermodal staging service helped this manufacturer grow its business through improved capacity, lower shipping costs and more on-time deliveries.
