

## CUSTOMIZED OUTBOUND LOGISTICS SOLUTION REDUCES EXPEDITE SHIPPING

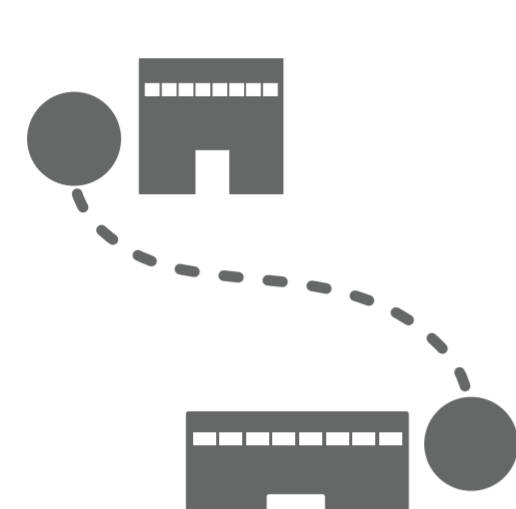

Growth is good, but a janitorial product manufacturer was experiencing the pains and increased costs of an overstressed warehouse. Using an out-of-the-box Transportation Management System (TMS) to manage freight resulted in improper load planning, inaccurate pallet estimation and rush shipments, so it turned to Schneider Supply Chain Management® to improve shipping practices.

### THE SITUATION

Incomplete orders resulted in expedited shipments, costing upwards of \$69,000 a month

A new warehouse was acquired to lessen the stress on the existing facility

Needed optimized set-up and processes for outbound shipments to reduce costs

### THE SCHNEIDER SOLUTION

A flexible and custom TMS in 8 weeks

Tailored reporting that dials in on changes to weight, pallet count and carrier moving the load

Custom bill of lading tool for a quick, no-hassle process

### THE RESULTS

**EXPEDITE SHIPPING COSTS DROPPED 90%**

**LOAD PLANNING REQUESTS HANDLED IN LESS THAN 30 MINUTES**

**+/- 3% FULL SHIPMENTS DAILY THAT REMAIN WITHIN 3 PERCENT OF PREDICTED-TO-ACTUAL**

Schneider Supply Chain Management took growing pains and turned them into gains with a customized TMS that enabled adaptable processes while also optimizing outbound shipments.
