Not just a new TV. A whole new way to watch.

From launching the UK's first satellite TV network, to bringing the first high-definition TV service to the country, Sky has always been focused on using technology to transform the role of TV in the home.

With Sky Glass, we've developed a product that reflects how people watch television today and for years to come.

We wanted to create a TV smart enough to make life simple. A TV designed for the homes we live in and the way we live. A TV that seamlessly integrates the whole world of entertainment in one place, and that uses cutting edge technologies including far field-voice, Glance Motion Technology and intelligent recommendations, to help people quickly get to what they love. And, of course, great entertainment deserves exceptional sound and picture to match.

We've written this guide to give you a sense not only of the many capabilities and technologies of Sky Glass, but the rationale behind the decisions we've made during its development. Please test, compare and kick the tyres of Sky Glass; get stuck in and see what it's capable of. We're hugely proud of what we've created, and hope that once you've seen it in action, you'll understand why.

Fraser Stirling, Group Chief Product Officer, Sky

For me, Sky Glass
is more than just a
new TV – it's a whole
new category of TV.
Have fun with it.

Firing up

Three steps to get your Sky Glass up running and stunning.

01. Plug

Sky Glass keeps things simple.
One TV. One plug. One remote. Easy.

02. Pair

When the power light stops flashing, follow the on-screen set-up instructions to connect to WiFi.

03. Play

Get streaming. Yes, it really is that simple.

Warning: Please read the 'Important safety and product information' leaflet before installing or using your Sky Glass.

Technically brilliant

Sky Glass. The facts, figures, speeds and feeds.

Experience is everything

Everything you need to know about Sky Glass, the streaming TV from Sky.

Sky. Inside.

Sky Glass comes with Sky inside, so all you have to do is connect to WiFi and get streaming. One TV. One plug. One remote. Easy.

Behind the glass
Sky Glass is equipped with a powerful quad-core AmLogic ARM A55 processor to keep the whole operation speedy and slick.

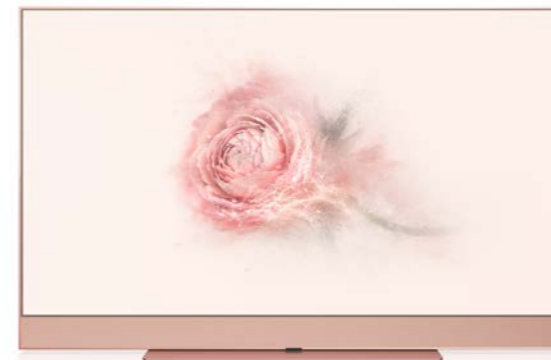

TV never looked so good

Elegantly designed and built with premium-grade, anodised aluminium and woven acoustic mesh, Sky Glass is engineered to harness formidable sound and vision.

Available in a unique collection of five rich hues, Sky Glass comes with a colour coordinated frame and stand. Plus customisable speaker fascias, with special editions coming soon.

Even picking the right size is easy. Small, medium, or large. Simple as that.

Sky Glass has a unique mounting bracket cleverly integrated into the TV so it fits elegantly against the wall. Or on a sleek, colour-matched stand. Whichever you prefer.

The collaboration with Sky enabled us to reinterpret the look and feel of the television as more of a domestic object. We employed a bold design approach which looks to celebrate the real estate created by the technology which is packed intricately inside. This helped to create a unique visual language which Sky could truly own within the congested landscape of consumer hardware.

Will Howe, Creative Director, Map Project Office

Pixel. Perfect.

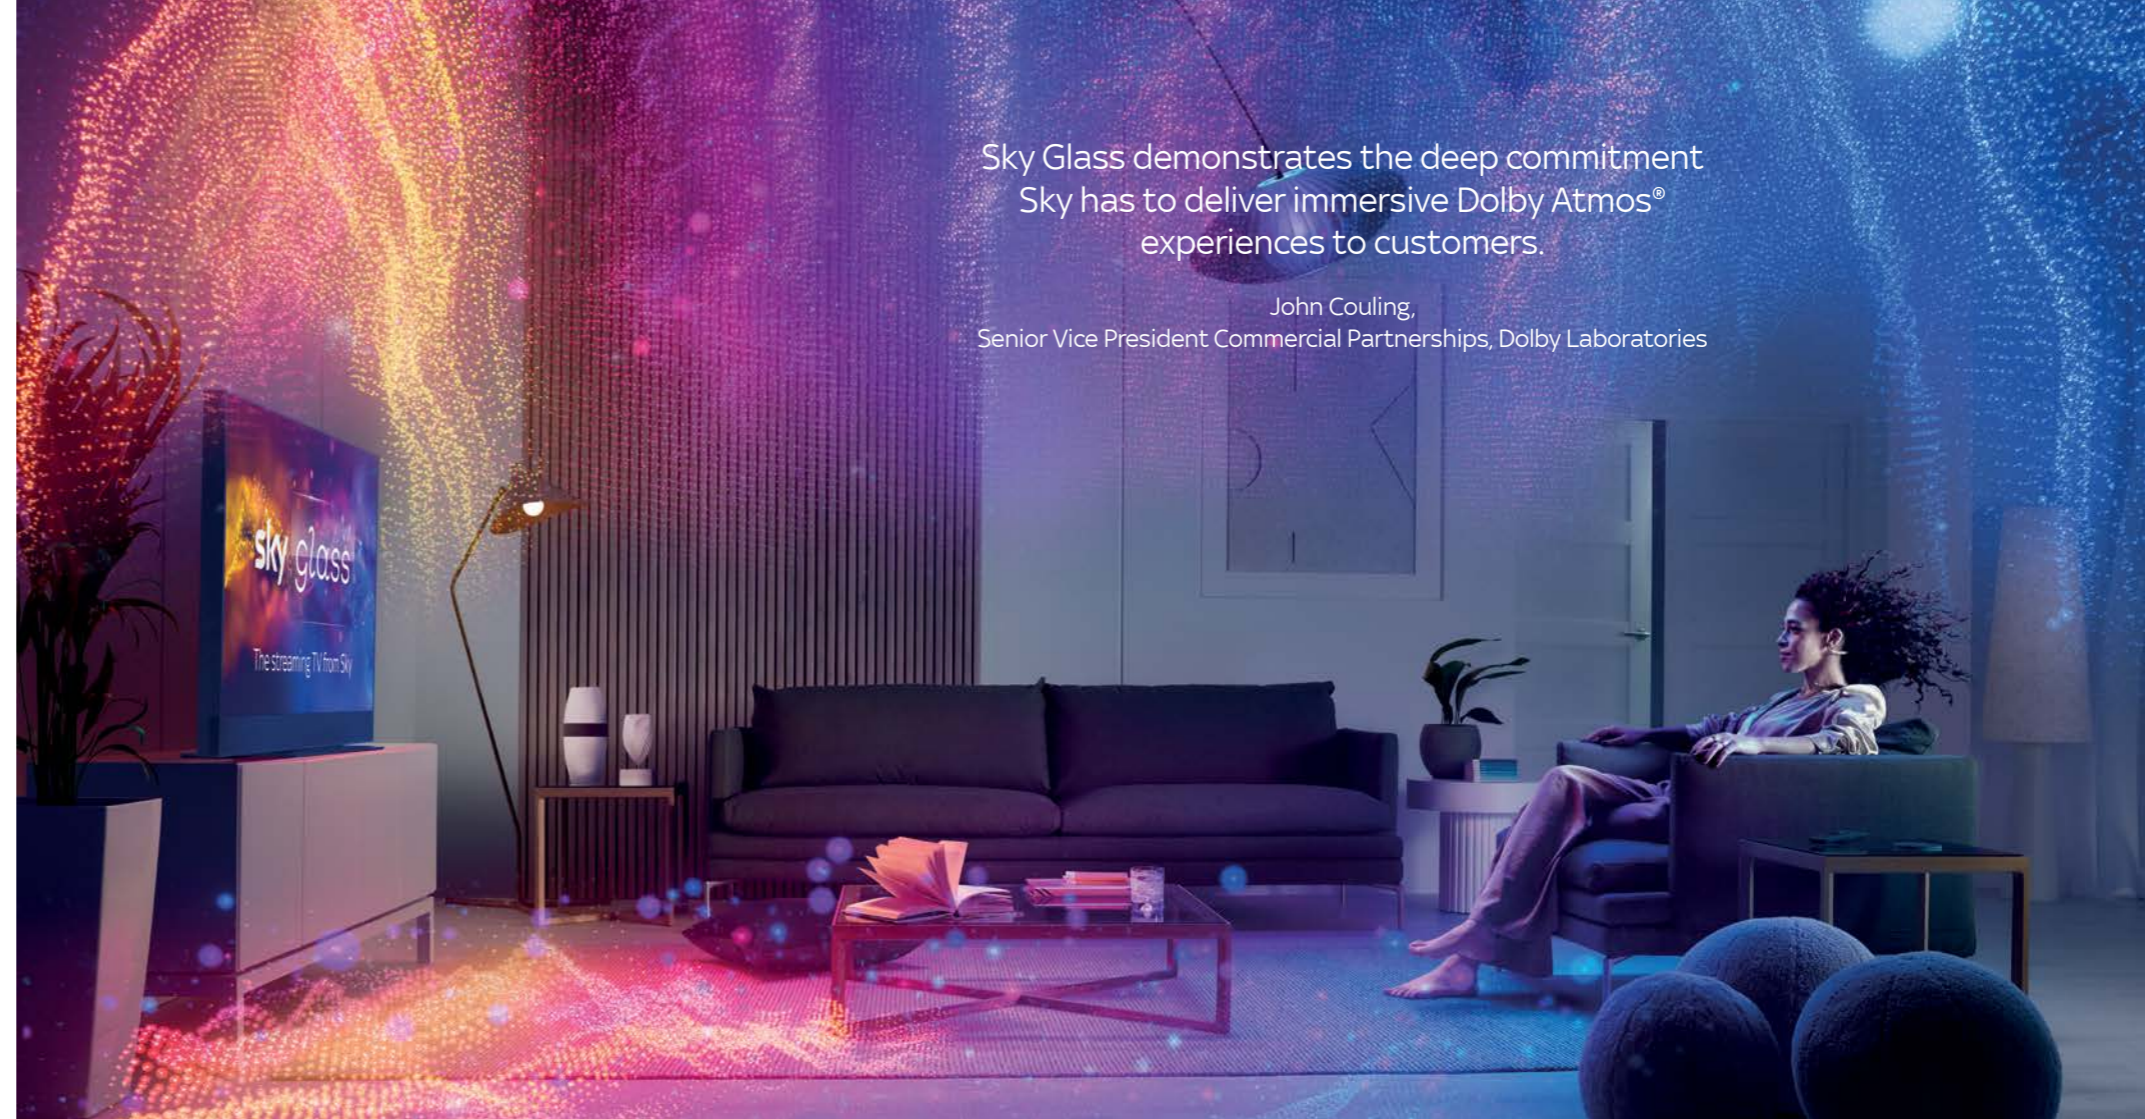

Sky Glass comes with a 4K Ultra HD Quantum Dot screen with 8.3 million pixels. Supporting HLG, HDR 10 and Dolby Vision®, delivering a vivid, crystal-clear picture with pinpoint precision and clarity. With Intelligent Zonal Technology, Sky Glass makes darks darker, brights look brighter and the TV you love look even better.

Sonic. Boom.

Six acoustically engineered speakers project sound upward, propel it outward and fire it forward. For room-filling, 360° Dolby Atmos® surround sound.

An epic subwoofer is designed in. You won't see it. But you'll hear it. And feel it. With rich, deep bass, Sky Glass just raised the soundbar - try listening in Party Mode for the full effect.

And Sky Auto-Enhance knows what you're watching and optimises sound and picture for you. Whether it's movies, music or matches. So you'll always get that front-row feeling.

Sky Glass demonstrates the deep commitment Sky has to deliver immersive Dolby Atmos® experiences to customers.

John Couling,
Senior Vice President Commercial Partnerships, Dolby Laboratories

The smarter TV

Only Sky Glass puts a world of TV at your instant voice command with its brand-new UI. Here's how:

01.

Sky Glass comes with a remote. But you don't need a remote. Just say, "Hello Sky" to find and watch with far-field voice technology. It's TV, hands-free.

02.

Search millions of stories and thousands of shows, across hundreds of channels and apps including Sky, Netflix, ITV Hub, BBC iPlayer, Disney+, All 4 and loads more... all at your voice command. Just ask, and Sky Glass finds it for you instantly.

04.

With Glance Motion Technology, Sky Glass springs to life when you pass in front of the TV and will show you a host of suggestions.

05.

Found something you like? Whether it's on demand, live, or something from your apps, quickly add it to your endless personal playlist. Tap the + button on the remote to add shows, movies, sports and more, with every available on-demand TV series added too, so you're always up to date.

Look both ways

Scrolling left on the top rail of the home screen gets you back to what you were watching or doing recently. The channels you watched. The last app you opened. Even connected devices such as Xbox or PlayStation.

03.

Looking for inspiration? Sky Glass quickly learns exactly which shows, channels and apps you love. Just say, "what should I watch?" to get recommendations tailored for you.

06.

Missed the beginning? Now you can play loads of live shows from the start and simply select the re-start option.

Doesn't cost the Earth

Sky Glass is the world's first TV to be certified as a CarbonNeutral® product. How? Four main ways:

Tech

Sky Glass saves you energy by bringing 3 devices in 1, and with auto-switch off. And when it's on, the screen adjusts brightness to optimal levels dependent on the room's lighting.

Materials

Sky Glass is the only TV that comes in recyclable packaging free from single-use plastics.

Renewable energy

Investing in Energy Attribute Certificates means Sky Glass is powered from renewable electricity for its first year of use in your home.

Carbon offsetting

For the carbon emissions we can't reduce yet, we are offsetting with Voluntary Carbon Standard projects enabling wind power infrastructure. In addition, we are investing in nature with a reforestation project planting 200,000 native trees in the Cairngorms in Scotland. Sowing the seeds for a net zero future.

Hi-tech. Low price.

With Sky Glass, everything you need is built in. So, no need to pay for a screen, soundbar and box separately. It's the ultimate package deal.

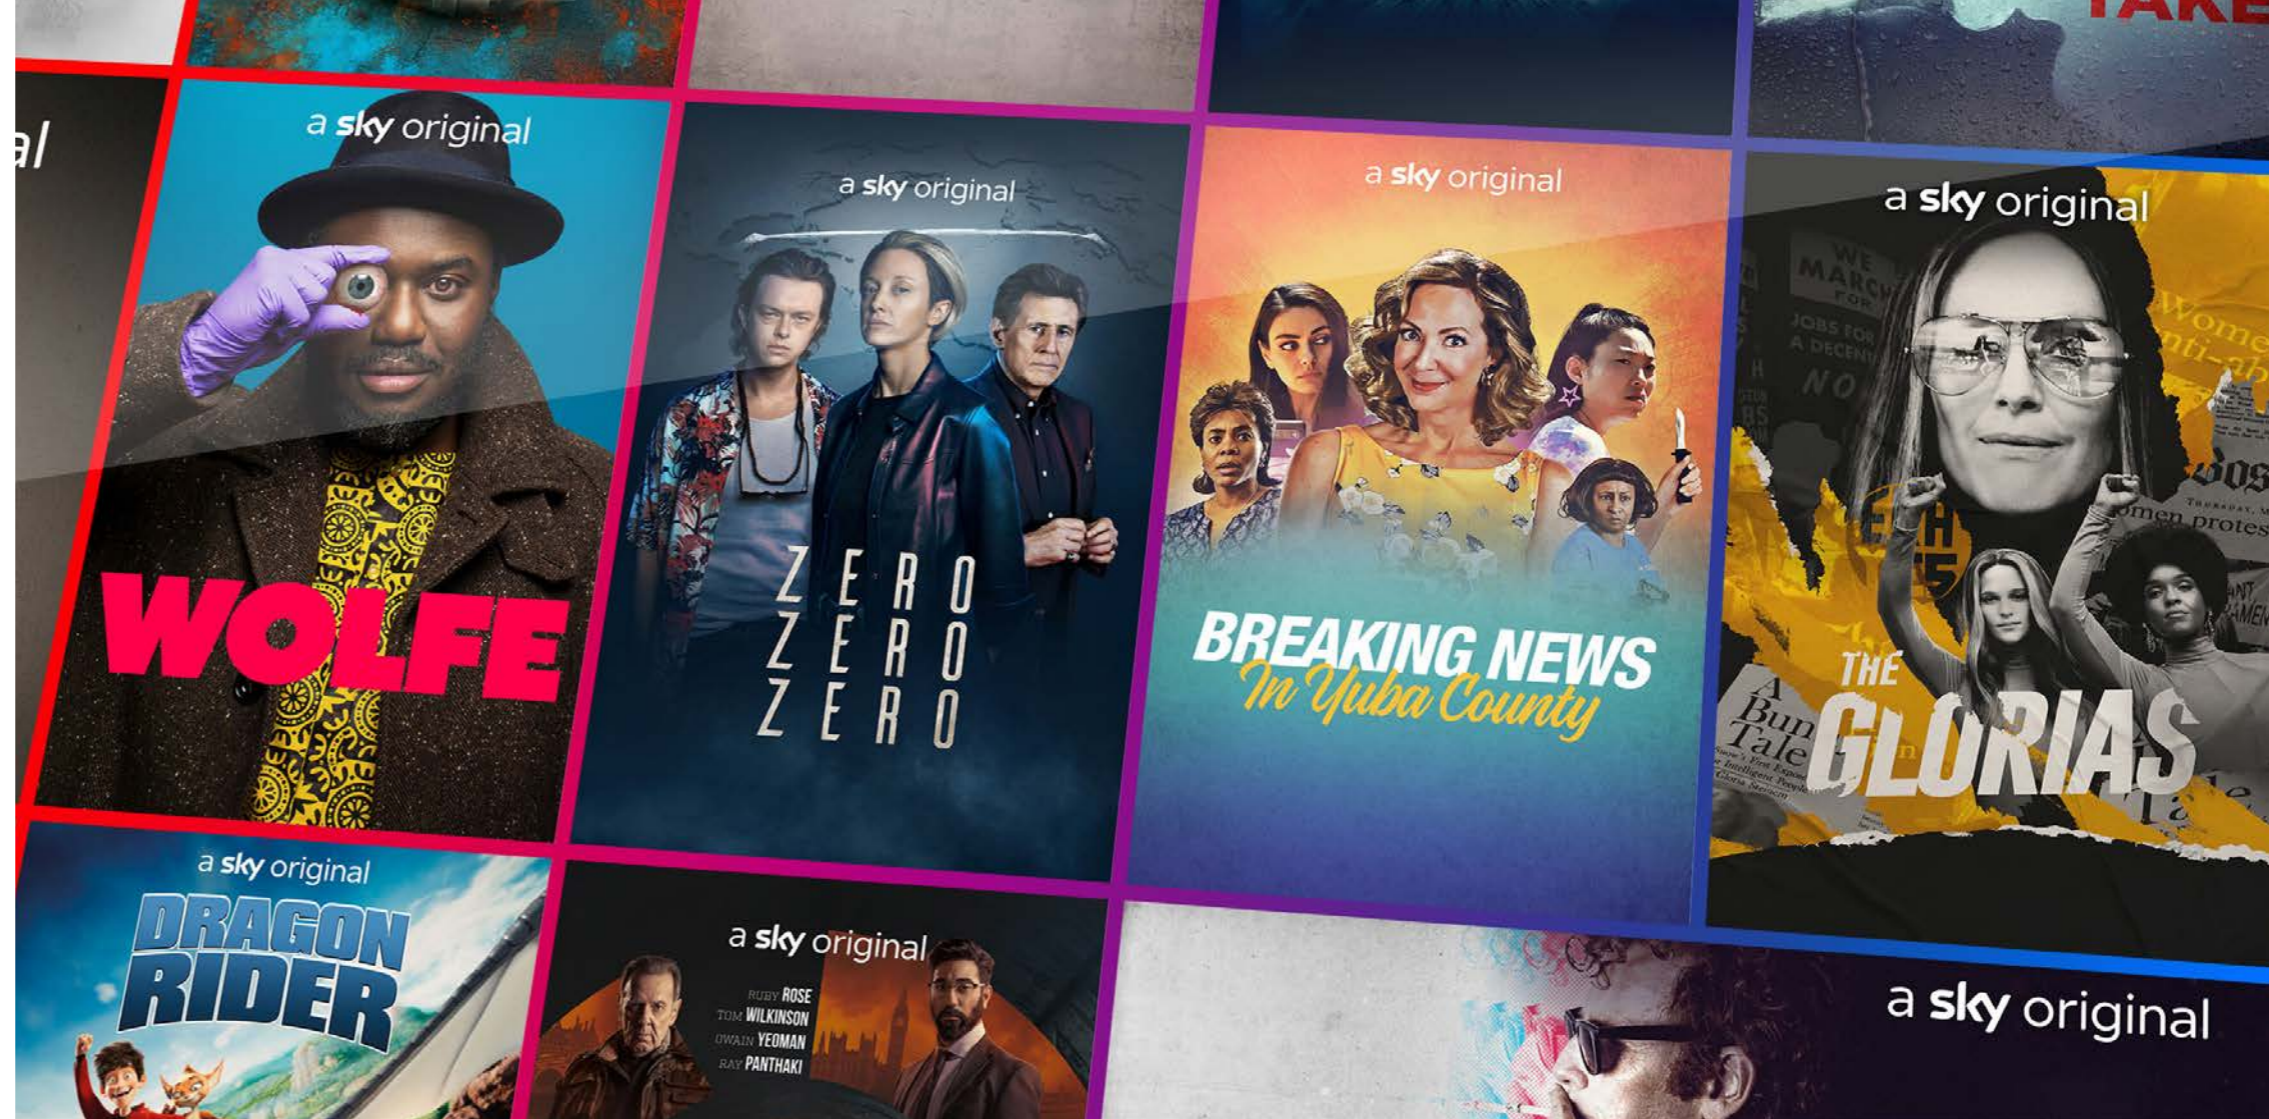

Available exclusively with Sky Ultimate TV with all our award-winning Sky Originals and Sky Exclusives. All your favourite channels and a fantastic range you won't find on Freeview. Netflix is all part of the deal too, so there'll always be something awesome to watch.

Get Sky Glass on a monthly payment plan, with 0% interest, just like you can a mobile phone. Sky Glass is available from £39 per month if you purchase with an interest free loan, that's £13 per month for Sky Glass and Sky Ultimate TV at just £26 per month. Or you can purchase Sky Glass in one go and just pay monthly for Sky Ultimate TV.

Content and Partner apps

Alongside our award-winning Sky Originals, Sky Exclusives, all your favourite channels and some you won't find on Freeview, you'll find all of these too:

Pricing and availability

With easy monthly payments, Sky Glass is cutting-edge technology and money-saving value. Win, win. The new streaming TV from Sky is available to buy in the UK from 18 October and will launch in other European markets from 2022.

Sky TV packs are on a 31-day rolling contract.

Sky Glass packs

Sky Ultra HDR and Dolby Atmos® pack

Sky Glass comes ready with Ultra HD 4K, High Dynamic Range and Dolby Atmos® technology built in. This pack unleashes this incredible sound and vision experience across Sky Entertainment, Sky Movies and Sky Sports. See and hear it all just as the director intended.

Whole Home pack

With the Whole Home pack, smarten up any TVs you've already got with Sky Stream pucks. Get voice control, endless playlists, and tailored recommendations. You can also stream unlimited entertainment to phones and tablets at home too with Sky Go.

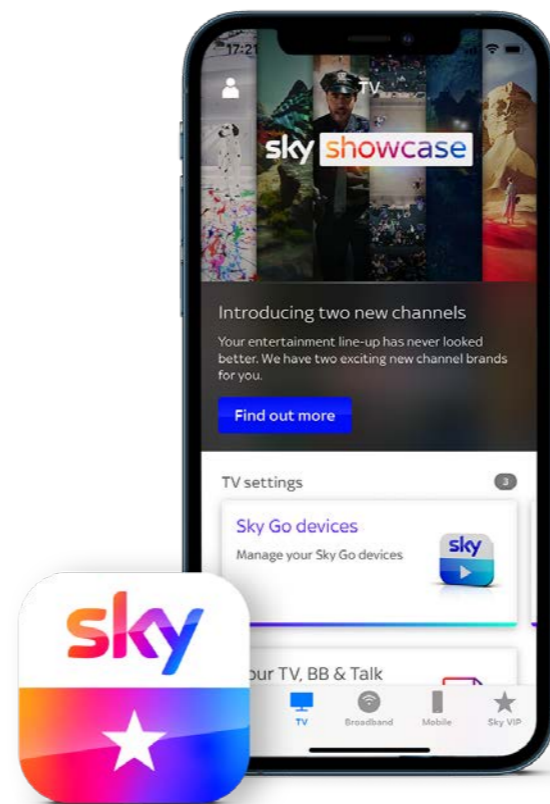

Delivery

When you order Sky Glass, it'll arrive within 3-5 days. Delivery is free, or you can choose to get your TV in just two days, or pay for a delivery slot that works for you.

We'll unbox it and take away the packaging. If you're using the stand, we'll put it in position for you. Then it's ready to connect to WiFi and get streaming.

If you want to wall mount your Sky Glass, you'll need to call in the professionals. Always have two people to lift it.

Your buddy for all things Sky

We've created the My Sky App with you in mind. Now it's easier than ever to manage your Sky TV, Sky Broadband and Sky Mobile accounts, as well as view your install date and find help whenever you need it.

Also, the My Sky app is the home of Sky VIP, your loyalty programme that gives more rewards the longer you're with us.

Got any questions?

Additional information

Sky Glass requires Sky Ultimate TV subscription (consists of Sky Entertainment and the Ultimate TV Add On – Netflix basic). Third party subscriptions required for some apps. BT Sport costs £24 a month when taken with Sky Sports. All content on Sky Glass is streamed via broadband, minimum speed of 10mbps required. Check speed with your BB provider. 18+. UK only.

Purchase with either a 24 month or 48 month interest free loan. **All loans subject to status and credit check.** £10 upfront fee if purchase on a 48 month interest free loan or £20 upfront fee if purchase on a 24 month loan. Option to purchase Sky Glass without a loan. All pricing set out in table above 31 day rolling contract for Sky TV.

Ultra HDR and Dolby Atmos® Pack: required to watch Sky content in UHD/HDR and with Dolby Atmos® – requires a minimum broadband speed of 25 mbps. Not all content available in UHD and/or HDR. Content must be optimised to watch in Dolby Atmos®.

A billion colours better than standard TVs.

Whole Home: required to watch Sky TV on multiple compatible devices - requires a minimum broadband speed of 15mbps for Whole Home plus one Sky Stream puck. Additional 5mbps required for each puck added. Sky Stream puck (£50) required to watch on another TV with compatible HDMI port. Watch on other compatible devices via Sky Go.

Professional install recommended to wall mount Sky Glass. Separate terms and conditions apply to Sky Glass and Sky TV subscriptions. You own Sky Glass. Maximum of 6 Sky Stream pucks per account/household. Sky Glass must be set up in Enhanced mode to use Voice or Glance Motion Technology to turn TV on from standby. Exclusions apply to warranty. Find out more and full terms at sky.com.
