

APPROVED CERTIFICATION MARKS FOR ELECTRICAL PRODUCTS**Date of Issue: January 17, 2024****No: B-E3 0710193
REVISION: 12**

This information bulletin supersedes Directive D-E3 060414 1 issued April 14, 2006.

General Details

Under section 21(1) of the Electrical Safety Regulation, electrical equipment must bear evidence of either a mark or a label of a certification agency accredited by the Standards Council of Canada, or an approval label issued by Technical Safety BC or other accredited organization under section 10 of the *Safety Standards Act* such as the SPE1000 model code field approval. Changes to accreditation of certification bodies, or their markings, may occur without notice. Visit the Standards Council of Canada website for a complete listing of accredited certification bodies (www.scc.ca). This Information Bulletin provides examples of certification and approval marks and labels that are acceptable in British Columbia and may not include all accepted marks.

The Standards Council of Canada accredits two types of organizations for electrical equipment approval,

- Certification bodies
- Inspection bodies.

The term “Certification Agency” is defined in the *Safety Standards Act*, and Electrical Safety Regulation, Section 20.1. However, the terms “certification body” (CB) and “inspection body” (IB) are also used throughout the industry. For the purpose of the *Safety Standards Act*, “certification agency” includes any “certification body” or “inspection body” that is accredited by the Standards Council of Canada. Details regarding the accreditation process can be found on the Standards Council of Canada website at www.scc.ca.

Additional information related to approved equipment may also be found in the following BC Safety Authority issued documents:

Directives

- Recreational Vehicle Directive D-EL 2015-01 Rev 1

Information Bulletins

- Approval of Manufactured Home, and Factory-Built Structures (IB-EL 2015-02)
- Minimum Requirements Retrofit of Fluorescent Fixtures (No. B-E3 100224 1 Revision 2)
- High Voltage Installations IB-EL-2016-02 Rev 1
- Incident and Hazard Reporting Requirements (No. IB-EL 2017 03)

Certification Agencies: Specific Details

The following provides contact information, as well as examples of marks and labels, that are acceptable evidence of approval within the province of British Columbia.

For a complete listing of all product certification and inspection bodies, please visit the Standards Council of Canada website at www.scc.ca. The information provided below may only show a few examples of accepted marks for each certification body. Please contact the certification bodies directly, for comprehensive information regarding their marks and programs.

Safety Standards Act***Definitions***

1 In this Act:

"certification agency" means a person or class of persons designated by the regulations as a certification agency;

*"certification mark" means a stamp, mark, seal, label, tag or other identification of a certification agency certifying that the regulated product to which it is affixed or attached or in which it is embedded meets the standard that the product must meet for that certification;
Provincial safety manager may approve regulated products for use.*

10 (1) Every provincial safety manager, other than the registrar, may approve regulated products in accordance with the regulations for use in British Columbia even if there is no certification mark present on the regulated product.

(2) If a provincial safety manager approves a product for use under subsection (1), the provincial safety manager may attach an approval mark that is readily identifiable as an approval mark or if it is impracticable to attach an approval mark, may order that notice of the product approval accompany the regulated product or be posted where the regulated product is to be used or installed.

Electrical Safety Regulation*Certification agencies*

20.1 An organization accredited by the Standards Council of Canada under the *Standards Council of Canada Act* as an organization engaged in conformity assessment is a certification agency for the purposes of this regulation.

Certification or approval mark required for electrical equipment

21 (1) Subject to subsections (3) and (4), a person must not use electrical equipment in British Columbia, or offer for sale, sell, display or otherwise dispose of electrical equipment for use in British Columbia, unless the electrical equipment displays a label or mark as follows:

- (a) a certification mark;
- (b) a label or mark of a certification agency that is acceptable to the appropriate provincial safety manager to certify electrical equipment for a specific installation;
- (c) an approval mark issued under section 10 of *the Act*;
- (d) in the case of used manufactured homes, used factory-built structures and used recreational vehicles, a label supplied by the appropriate provincial safety manager.

(2) An approval mark under subsection (1) (c) signifies compliance with requirements in respect of fire and electrical shock hazards only.

(3) Electrical equipment that does not require approval under the B.C. Electrical Code does not require a label or mark.

(4) Electrical equipment that has not been approved under subsection (1) may

- (a) be displayed for not more than 14 days if the regulatory authority gives written permission to do so, or
- (b) be used by a utility in its capacity as a utility if a professional engineer has certified that the use of the equipment is safe.
