Coming From Alberta?

Are you an Alberta Master Electrician? There are two considerations when applying to be a Master Electrician in BC. 1. The ARD exam must be successfully completed by any qualified electrical applicant. This exam is administered by Technical Safety BC. 2. Technical Safety BC accepts many continuing education courses approved by the Alberta Safety Codes Council. You should check to see if they meet the hours requirements in BC of 8 hours for unrestricted A, B and C classes and 4 hours for restricted B and C classes as well as SA and LO classes. If the total hour requirements are not met, additional training may be required. It is the applicant's responsibility to ensure that the training is recognized by TSBC, through the institution they took the training.
